

# HOW TO WRITE A COLLEGE APPLICATION ESSAY

By Margaret Metzger  
*Brookline High School, Massachusetts*

Many colleges require a short essay as part of the application process. The directions for the essay vary from college to college. Most colleges offer some variation of the topic. "Tell us more about yourself."

Like most students, you might hate this subject and dread writing the essay. You know that it is a crucial piece of writing and that it must be done, but secretly you hope somehow to avoid the task. Like most tasks, the tension created by procrastinating is worse than the work itself-in this case, just sitting down and writing the essay.

You can use the college essay to strengthen your application. In fact, your essay can be the strongest part, presenting you as a thoughtful, sincere, interesting applicant. You can use the college essay to explain mistakes of the past-failed courses, low SAT® scores, or few extracurricular activities. Best of all, you can demonstrate that you know how to write well, an ability all colleges value.

## FIND A TOPIC

Colleges genuinely want to know who you are. Although it is difficult to believe, they do not have an "ideal student" in mind. They want a variety of students. They understand that they can't know everything about you by your grade point average and your SAT scores. They want to know what kind of person you are, what aspirations you have, what struggles you have gone through, what is important to you. They ask you to write an essay about yourself because they want more personal information.

Before you write, think about how you may be different from other applicants. What unusual experience would you bring to the college? What interests, activities, travel, struggles, or situations have had a particular impact on you? You are probably thinking, "Nothing is special about me; I'm just an average kid." That's what most students think. Sometimes it helps to ask other people what they think is unique about you.

If you know exactly what you want to write about, you are lucky. Use that topic. Be sure to consider the traditional, but appropriate and effective, topics, such as academic achievements, extracurricular activities, travel and work experiences, and life-changing events.

Writing and Learning in Cross-national Perspective David Foster, 2017-10-03 Despite the increasingly global implications of conversations about writing and learning U S composition studies has devoted little attention to cross national perspectives on student writing and its roles in wider cultural contexts Caught up in our own concerns about how U S students make the transition as writers from secondary school to postsecondary education we often overlook the fact that students around the world are undergoing the same evolution How do the students in China England France Germany Kenya or South Africa the educational systems represented in this collection write their way into the communities of their chosen disciplines How for instance do students whose mother tongue is not the language of instruction cope with the demands of academic and discipline specific writing And in what ways is U S students development as academic writers similar to or different from that of students in other countries With this collection editors David Foster and David R Russell broaden the discussion about the role of writing in various educational systems and cultures Students development as academic writers raises issues of student authorship and agency as well as larger issues of educational access institutional power relations system goals and students roles in society The contributors to this collection discuss selected writing purposes and forms characteristic of a specific national education system describe students agency as writers and identify contextual factors social economic linguistic cultural that shape institutional responses to writing development In discussions that bookend these studies of different educational structures

the editors compare U S postsecondary writing practices and pedagogies with those in other national systems and suggest new perspectives for cross national study of learning writing issues important to all educational systems Given the worldwide increase in students entering higher education and the endless need for effective writing across disciplines and nations the insights offered here and the call for further studies are especially welcome and timely **Winning Scholarships For**

consistently demonstrates that the social context of writing determines the majority of conventions any writer must observe Still most universities organize the required first year composition course as if there were an intuitive set of general writing skills usable across academic and work world settings In College Writing and Beyond A New Framework for University Writing Instruction Anne Beaufort reports on a longitudinal study comparing one student s experience in FYC in history in engineering and in his post college writing Her data illuminate the struggle of college students to transfer what they learn

about general writing from one context to another Her findings suggest ultimately not that we must abolish FYC but that we must go beyond even genre theory in reconceiving it Accordingly Beaufort would argue that the FYC course should abandon its hope to teach a sort of general academic discourse and instead should systematically teach strategies of responding to contextual elements that impinge on the writing situation Her data urge attention to issues of learning transfer and to developmentally sound linkages in writing instruction within and across disciplines Beaufort advocates special attention to discourse community theory for its power to help students perceive and understand the context of writing

Tracing the Impact of First-Year Writing Laura Wilder, 2024-11-15 Tracing the Impact of First Year Writing presents the results of a large scale longitudinal study of college writers that explores the impact of a required first year writing course with a comparative approach not previously available Over five years Laura Wilder conducted 143 interviews with and collected 774 pages of writing from 58 students half of whom had taken a new first year writing course and half who had not Wilder found that while in many ways the experiences of both groups are comparable demonstrating how students receive valuable educations in rhetoric and writing from a variety of sources beyond a first year writing course students who took the first year writing course were much more likely to identify as writers This identification supported students use of writing in powerfully generative and knowledge building ways that they carried with them long after the course into other appropriate contexts In contrast to previous longitudinal studies of college writers undertaken at institutions with high prestige and resources Tracing the Impact of First Year Writing explores the role of writing at a regional public university and documents how students experiences with writing can be highly divergent across the curriculum and unequal across campuses Additionally this book includes the voices of students who do not identify as capable writers and have strongly negative emotional reactions to writing and writing instruction and adds empirical support to innovative calls in the field to transform the first year writing course into one that inspires students to reflectively consider writing itself
