

Gravity beyond Earth

If you throw or drop a ball, it falls to Earth. The reason the ball always falls is gravity. Gravity is a force—a push or a pull. Every time you let a ball go from your hand, it is pulled back to Earth. It's the same thing that keeps people, rocks, and other objects from floating off into space. But gravity does not only apply to Earth—it occurs in space as well.

Mass and Distance

The strength of gravitation depends on two things. First, it depends on the mass, or amount of matter, that a body contains. A body with a large amount of mass has a stronger gravitational force than a body with a small amount of mass. A massive object, such as a planet, has a stronger pull than a smaller object, like a boulder.

Second, the strength of gravitation depends on the distance between two bodies. The force of gravitation is strong between bodies that are close together, but it gets weaker as the bodies become farther apart.

Away from Earth

Earth's gravity affects us because Earth is very large and we are very close to it. Your weight is the measurement of the force of Earth's gravity on your mass. But if you were to travel into space, you would eventually escape Earth's pull. When you came close to other large objects—such as planets and moons—you would be affected by their gravity.

If you stood on the surface of the Moon, its gravity would hold you down, just as Earth's does. But because the Moon is smaller than Earth, its pull would be weaker. So your weight would be a fraction of what it is on Earth. You would be able to leap 10 feet (3 meters) off the ground. Lifting heavy weights would be easy. Also because of the Moon's weaker gravity, a ball dropped on the Moon would fall much more slowly than one dropped on Earth.

Stahl, 2005-03-23 The volume identifies critical issues and cutting

edge research in assessing children's reading comprehension **Developing Narrative Comprehension** Ute Bohnacker, Natalia Gagarina, 2020-12-15 Comprehension of texts and understanding of questions is a cornerstone of successful human communication. Whilst reading comprehension has been thoroughly investigated in the last decade, there is surprisingly little research on children's comprehension of picture stories, particularly for bilinguals. This can be partially explained by the lack of cross-culturally robust cross-linguistic instruments targeting early narration. This book presents an inference-based model of narrative comprehension and a tool that grew out of a large-scale European project on multilingualism. Covering a range of language settings, the book uses the Multilingual Assessment Instrument for Narratives to answer the question which narrative comprehension skills bilingual children can be expected to master at a certain age and explores how such comprehension is affected or not affected by linguistic and extra-linguistic factors. Linking theory to method, the book will appeal to researchers in linguistics and psychology and graduate students interested in narrative multilingualism and language acquisition **Cognitive Perspectives on Peer Learning** Angela M. O'Donnell, Alison King, 2014-04-08 The contribution of this book to the literature on peer learning is its focus on approaches to peer learning that are concerned with its underlying cognitive processes Children's Problems in Text Comprehension Nicola Yuill, Jane Oakhill, 1991-09-19 A 1991 examination of children's comprehension abilities by Yuill and Oakhill Introduction to Abnormal Child and Adolescent Psychology Robert Weis, 2020-08-27 Reflecting the latest advancements in the field and complete DSM-5 criteria, Robert Weis' *Introduction to Abnormal Child and Adolescent Psychology* provides students with a comprehensive and practical introduction to child psychopathology. The book uses a developmental psychopathology approach to explore the emergence of disorders over time, describe the risks and protective factors that influence developmental processes and trajectories, and examine child psychopathology in relation to typical development and children's sociocultural context. The fully revised Fourth Edition includes a new chapter on research methods, a greater emphasis on the ways social-cultural factors affect each disorder covered, and recent research findings on topics such as autism spectrum disorder and adolescents' use of nicotine and marijuana vaping products *The California ELD Standards Companion, Grades K-2* Ivannia Soto, Linda Carstens, Jim Burke, 2018-11-27 This is an era of extraordinary promise and support for addressing the needs of California's English learners.
