

I Can Zip!

Mom, look! I can zip my jacket! First, I put it on. Next, I put my hands by my hips. Then, I hold my jacket at the tip. Last, I go up, up, up! Zip, zip, zip! See mom? I can zip my jacket!

① What can the boy do?

② How does he start to zip his jacket?

③ Who is watching the boy zip his jacket?

Anonymous,2020-09-28 I finished the Preface to the first volume of my translation of the Hymns to the Maruts with the following words The second volume which I am now preparing for Press will contain the remaining hymns addressed to the Maruts The notes will necessarily have to be reduced to smaller dimensions but they must always constitute the more important part in a translation or more truly in a deciphering of Vedic hymns This was written more than twenty years ago but though since that time Vedic scholarship has advanced with giant steps I still hold exactly the same opinion which I held then with regard to the principles that ought to be followed by the first translators of the Veda I hold that they ought to be

decipherers and that they are bound to justify every word of their translation in exactly the same manner in which the decipherers of hieroglyphic or cuneiform inscriptions justify every step they take I therefore called my translation the first traduction raisonnée I took as an example which I tried to follow though well aware of my inability to reach its excellence the Commentaire sur le Yasna by my friend and teacher Eugène Burnouf Burnouf considered a commentary of 940 pages quarto as by no means excessive for a thorough interpretation of the first chapter of the Zoroastrian Veda and only those unacquainted with the real difficulties of the Rig veda would venture to say that its ancient words and thoughts required a less painstaking elucidation than those of the Avesta In spite of all that has been said and written to the contrary and with every wish to learn from those who think that the difficulties of a translation of Vedic hymns have been unduly exaggerated by me I cannot in the least modify what I said twenty or rather forty years ago that a mere translation of the Veda however accurate intelligible poetical and even beautiful is of absolutely no value for the advancement of Vedic scholarship unless it is followed by precise justificatives that is unless the translator gives his reasons why he has translated every word about which there can be any doubt in his own way and not in any other It is well known that Professor von Roth one of our most eminent Vedic scholars holds the very opposite opinion He declares that a metrical translation is the best commentary and that if he could ever think of a translation of the Rig veda he would throw the chief weight not on the notes but on the translation of the text A translation he writes must speak for itself As a rule it only requires a commentary where it is not directly convincing and where the translator does not feel secure Between opinions so diametrically opposed no compromise seems possible and yet I feel convinced that when we come to discuss any controverted passage Professor von Roth will have to adopt exactly the same principles of translation which I have followed **This Is How We Teach Reading...And It's**

Loporcaro, 2015-07-31 This book investigates the changes that affected vowel length during the development of Latin into the Romance languages and dialects In Latin vowel length was contrastive e.g. pila ball vs. pila pile like English bit vs. beat but no modern Romance language has retained that same contrast However many non standard Romance dialects as well as French up to the early 20th century have developed novel vowel length contrasts which are investigated in detail here Unlike previous studies of this phenomenon this book combines detailed historical evidence spanning three millennia as attested by

extant texts with extensive data from present day Romance varieties collected from first hand fieldwork which are subjected to both phonological and experimental phonetic analysis Professor Loporcaro puts forward a detailed account of the loss of contrastive vowel length in late Latin showing that this happened through the establishment of a process which lengthened all stressed vowels in open syllables as in modern Italian casa ka sa His analysis has implications for many of the most widely debated issues relating to the origin of novel vowel length contrasts in Romance which are also shown to have been preserved to different degrees in different areas The detailed investigation of the rise and fall of vowel length in dozens of lesser known non standard varieties is crucial in understanding the development of this aspect of Romance historical phonology and will be of interest not only to researchers and students in comparative Romance linguistics but also more generally to phonologists and those interested in historical linguistics beyond the Latin Romance language family **RTI**
