

# Keeping Baby Safe while sleeping

Sudden Infant Death Syndrome (SIDS) is the unexplained death of a seemingly healthy baby usually during sleep. Although the exact cause is unknown and all babies are vulnerable, certain sleep environments have been linked to an increased risk.

## 9 ways to help protect your baby from SIDS

Ensure the crib is properly assembled and if there is any question, call the manufacturer.

Always place baby on his/her back to sleep.

Remove everything other than the mattress and fitted sheet from the crib when baby is sleeping. No pillows, blankets, toys, or bumpers.

Use a blanket sleeper, never use loose blankets.

Keep baby in Mom's room for the first few months, but in a separate sleeping area.

Do not over-clothe baby while sleeping, baby should be warm but not sweating or hot to the touch.

Keep a smoke-free zone around your baby.

Use a firm mattress with no more than two fingers width between the crib and mattress.

Once breastfeeding is established offer a pacifier.

There shouldn't be more than a soda can's width between bars.
