

An aerial photograph of a city, likely Los Angeles, with a dense urban landscape. Overlaid on the city is a 3D model of a city skyline, showing various building heights and colors (white, grey, brown, green). The model is positioned in the upper half of the image, appearing to float above the actual city.

**Urban Geography** **Housing in the Aftermath of the Fast Track Land Reform Programme in Zimbabwe** Lovemore Chipungu, Hangwelani Hope Magidimisha, 2020-12-10 This book delves into the Fast Track Land Reform Programme FTLRP in Zimbabwe to provide insight into how it facilitated the delivery of housing for low income urban households It highlights the politics of land reforms and the power of community engagement in housing development in urban areas Prior to the

FTLRP the Zimbabwean governments had never embraced popular modes of housing production as key factors in urban development In the area of low income housing informal housing schemes have always been treated with apathy and indifference This left the conventional mode of housing production to be the only legitimate means to house low income households despite its shortcomings However the onset of the FTLRP in 2000 resulted in homeless urban households grasping the opportunity to invade farms for housing development Through the lenses of Marxism and Neoliberalism this book analyses housing schemes that emerged and the overall impact of the FTLRP on housing and land delivery in Harare This analysis is based on empirical evidence obtained from key informants and household surveys conducted in Harare The authors argue that the FTLRP provided a platform for innovativeness by households supported by the unpronounced national urban vision and prowess of the political leadership Hence the success of these housing schemes can be measured by acquisition of land which guarantees households access to the city However some of these housing schemes pose challenges key among them being lack of infrastructure The book concludes by presenting a new model for effective delivery of land and housing for the urban poor This is envisaged as a useful policy tool for urban planners housing experts land economists urban and regional geographers as well as sociologists political scientists and social workers engaged in public administration of land and housing

Urban Regeneration in the UK Andrew Tallon, 2013-06-07 Striking transformations are taking place in the urban landscape The regeneration of urban areas in the UK and around the world has become an increasingly important issue amongst governments and populations since the global economic downturn This textbook provides an accessible and critical synthesis of urban regeneration in the UK analyzing key policies approaches issues and debates It places the historical and contemporary regeneration agenda in context The second edition has been extensively revised and updated to incorporate advances in literature policy and case study examples as well as giving greater discussion to the New Labour period of urban policy and the urban agenda and regeneration policies of the Conservative Liberal Democrat Coalition government elected in 2010 The book is divided into five sections with Section I establishing the conceptual and political framework for urban regeneration in the UK Section II traces policies that have been adopted by central government to influence the social economic and physical development of cities including early town and country and housing initiatives community focused urban policies of the late 1960s entrepreneurial property led regeneration of the 1980s competition for urban funds in the 1990s urban renaissance and neighborhood renewal policies of the late 1990s and early 2000s and new approaches since 2010 which have sought to stimulate enterprise and embrace localism in an age of austerity resulting from the global economic downturn Section III illustrates the key thematic policies and strategies that have been pursued by cities themselves focusing particularly on improving economic competitiveness tackling social disadvantage and promoting sustainable urban regeneration Section IV summarizes key issues and debates facing urban regeneration in the early 2010s and speculates upon future directions in an era of economic and political uncertainty Urban Regeneration in the UK

combines the approaches taken by central government and cities themselves to regenerate urban areas providing a comprehensive and up to date synthesis of the field Each chapter also contains case studies study questions suggested further reading and websites making this an essential resource for undergraduate students interested in Urban Studies Geography Planning and the Built Environment

**Himalayan Quality of Life** Benjamin L. Saitluanga, 2017-04-18 The book is a study of intra urban inequality in quality of life QOL in Aizawl city The main objectives of the study include analysis of processes and patterns of social differentiation along the three dimensional space of Aizawl city as well as analysis of spatial inequality in QOL at the lowest administrative structure of the city An investigation into spatial pattern of residential differentiation was done at both horizontal and vertical spaces Spatial variation in well being of residents of Aizawl city and the quality of their immediate environment was also studied by taking both objective and subjective indicators The study employed a number of descriptive inferential and multivariate statistical techniques including correlation factor analysis principal component analysis cluster analysis and spatial autocorrelation methods like Moran's I and Local Indicators of Spatial Association LISA Mapping techniques and graphical methods like Choropleth map histogram and line graph were also used With the help of factor analysis the social space of Aizawl city was found to be differentiated along socio economic status family status household size status workers status and ethnic status The most important factor determining residential differentiation was socio economic status Choropleth map of factor scores reveals that the inner city localities were dominated by high socio economic class while poorer people dominated the peripheries Non local ethnic minorities were few but concentrated in some adjoining peripheral localities as well as in inner city localities which have been inhabited by their ancestors since the colonial period Vertical pattern of residential differentiation was also analyzed by taking income variable as a proxy of socio economic status Multi storey buildings in Aizawl city were co inhabited by both richer people and poorer people The richer people were found at the top floors while the poorer people occupied the basement floors Normally the owners of the buildings were found at the top floors while the basement floors were dominated by the renters Spatial variation in QOL was measured with the help of principal component analysis as a weighting technique by taking variables pertaining to both objective and subjective QOL dimensions The values of composite QOL index showed that the central localities have scored better than their peripheral counterparts Correlation analysis of the relationship between objective indicators and subjective indicators provided a low positive value indicating the absence of relationship between the two dimensions of quality of life Spatial autocorrelation analysis was also performed to see the pattern of clustering of spatially weighted QOL variables across Local Councils With the help of Global Moran's I spatial clusters and spatial outliers were observed for objective dimension of QOL within the study area The value of Moran's I was found to be insignificant for subjective QOL dimension indicating the absence of significant pattern of clustering The study also identified 7 social areas of Aizawl city on the basis of factor scores and composite scores of QOL variables calculated for all Local Councils The

identification of clusters was taken out with the help of hierarchical clustering method of cluster analysis These clusters were labeled appropriate names and their characteristics were described in detail The thesis concluded with recommendation of designating these social areas as social development planning zones for obtaining inclusive development      Global Environmental Issues Frances Harris,2012-02-08 Global Environmental Issues second edition builds on the popularity of the first edition viewing global environmental problems as complex issues with a network of causes influenced by a range of actors with differing priorities The book recognises that science underpins much of what happens in society and therefore it is important to be able to interpret the environmental and social consequences of scientific developments In addition to discussing the main biophysical causes the book illustrates how socio economic and political factors determine why and how people use land resources and technology and how this in turn affects natural resource management This edition includes new chapters on the politics of science International environmental regulation and treaties environmental issues in a globalised world and natural resource management Global Environmental Issues second edition is essential reading for upper level undergraduates and Masters students within departments of Environmental Science and Geography Includes case studies from around the world to provide a real life context for the issues tackled in each chapter Considers both the results of human actions and natural environmental change in order to provide balanced in depth debate Includes coverage of contemporary hot topics such as biodiversity globalization and sustainable development Chapters authored by experts in the field Includes new chapters on The politics of science International environmental regulation and treaties Environmental issues in a globalised world and Natural Resource Management Expanded sections include negotiating multilateral environmental agreements GM crops biofuels and marine and freshwater resources      *Global Suburbs* Lawrence Herzog,2014-07-17 Global Suburbs Urban Sprawl from the Rio Grande to Rio de Janeiro offers a critical new perspective on the emerging phenomenon of the global suburb in the western hemisphere American suburban sprawl has created a giant human habitat stretching from Las Vegas to San Diego and from Mexico to Brazil presented here in a clear and comprehensive style with in depth descriptions and images Challenging the ecological problems that stem from these flawed suburban developments Herzog targets an often overlooked and potentially disastrous global shift in urban development This book will give depth to courses on suburbs development urban studies and the environment      Japanese Population Geographies I Yoshitaka Ishikawa,2023-07-15 This is the first anthology that conveys in detail the actual situation of population geographies in Japan a country facing some of the world s most serious demographic trends such as low fertility population aging and depopulation The anthology consists of two volumes with the common title Japanese Population Geographies All of the included entries are based on original Japanese papers written by leading geographers and published within the past few years useful for understanding Japan s current population geographies The first volume analyzes the postwar transition of internal migration examining the structural changes of population in urban areas and proposes a new

measure different from the traditional resident population This volume also presents an investigation of the retirement migration of baby boomers as well as displacement migration due to the 2011 Great East Japan Earthquake The second volume s contents examine the residential choices of minority populations such as foreign residents and sexual minorities It also discusses future prospects associated with mono polar concentration into Tokyo regional forecasting using population projections based on small area units and the importance of a politico economic perspective in the future research Taken as a whole this anthology offers the following two significant contributions First the excellent achievements obtained in Japan which is experiencing serious demographic trends reflect key developments within the context of the world s population geography The second contribution is that the book brings the latest insights and important policy implications to countries that are facing various issues associated with decreasing fertility aging population and declining population Urbanization, Urban Sustainability and the Future of Cities B.
