Environmental Protection Agency, 1983 *The Business Year: Mexico 2024* ,2024-02-23 To understand how the investment environment has evolved over recent months in Mexico our team conducted a year long on the ground research operation that included interviews with over 150 business leaders and officials defining

trends across every major sector of the economy It is an election year in Mexico meaning the often turbulent Obrador administration is drawing to a close In contrast with the nervousness and uncertainty we witnessed ahead of his inauguration our team notes a particular sense of ease around the upcoming elections as CEOs and investors are more familiarized with Morena the party founded by the incumbent president Overall 2024 is expected to see an unusual general continuity of business during an election year thanks to the fact that both of the main presidential candidates are not expected to announce disruptive macroeconomic policies Through this 220 page publication featuring interviews with top business leaders from every major sector of the economy as well as a range of articles and analysis we present a comprehensive snapshot of the Mexican economy and the investment environment at this crucial period
