The Decline in Educational Standards James D. Williams, 2019-04-15 The Decline in Educational Standards From a Public Good to a Quasi Monopoly is about the commodification of education and the factors that have changed education from a public good into a commodity over the last 50 years When we look at today's education we see that academic standards in public education have been declining for decades even as education funding has reached nearly a trillion dollars per year to fund such failed programs as No Child Left Behind and Common Core Simultaneously tuition and fees at public universities have increased nearly 2000 percent over the last 30 years and student loan debt is now a staggering 1.5 trillion Quite simply education has become big business This book examines the various issues associated with the commodification of education especially neoliberalism and privatized Keynesianism what they are how they developed and how they have affected education and public policy It argues that neoliberalism and the related socioeconomic shift to debt based consumerism are at the center of commodification leading to a significant decline in the exchange value of a college degree It also argues that we cannot understand the changes in our public and higher education systems without examining the historical social economic and political factors that have essentially created an education system that is significantly different from what it was in the not so distant past

Modern Dystopian Fiction and Political Thought Adam Stock,2018-10-26 Over the past few years dystopia has become a word with increasing cultural currency This volume argues that we live in dystopian times and more specifically that a genre of fiction called dystopia has above others achieved symbolic cultural value in representing fears and anxieties about the future As such dystopian fictions do not merely mirror what is happening in the world in becoming such a ready referent for discussions about such varied topics as governance popular culture security structural discrimination environmental disasters and beyond the narrative conventions and generic

tropes of dystopian fiction affect the ways in which we grapple with contemporary political problems economic anxieties and social fears The volume addresses the development of the narrative methods and generic conventions of dystopian fiction as a mode of socio political critique across the first half of the twentieth century It examines how a series of texts from an age of political extremes contributed to political discourse and rhetoric both in its contemporary setting and in the terms in which we increasingly cast our cultural anxieties Focusing on interactions between temporality spatiality and narrative the analysis unpicks how the dystopian interacts with social and political events debates and ideas Stock evaluates modern dystopian fiction as a historically responsive mode of political literature He argues that amid the terrors and upheavals of the first half of the twentieth century dystopian fiction provided a unique space for writers to engage with historical and contemporary political thought in a mode that had popular cultural appeal Combining literary analysis informed by critical theory and the history of political thought with archival based historical research this volume works to shed new light on the intersection of popular culture and world politics It will be of interest to students and scholars in literary studies cultural and intellectual history politics and international relations *Introduction to Teaching* Gene E.
