Rhino Poaching 2014:

Operation Lock and the War on Rhino Poaching John Hanks, 2015-05-08 The aggressive poaching of rhinos needs to be countered with equal aggression So argued Prince Bernhard of the Netherlands the founder president of the World Wide Fund for Nature WWF at a 1987 meeting with John Hanks conservation expert and WWF s head in Africa The result was Operation Lock a secret initiative funded by Prince Bernhard and staffed by former SAS operatives Operation Lock set up headquarters in Johannesburg and extended its reach into neighbouring states Namibia Zambia Botswana Swaziland and Mozambique Its operatives planned to train game rangers to pose as rhino horn traders in order to entrap buyers and to expose the kingpins who were driving the trade It was a controversial approach all the more because it was working within apartheid South Africa in the late 1980s When the existence of the project was finally leaked WWF denied any involvement and John Hanks took the fall In *Operation Lock and the War on Rhino Poaching* John Hanks finally tells the story of these explosive events from 25 years ago As a leading international authority on conservation he also deals with the scourge of rhino poaching up to the present and gives powerful and controversial criticism of some of the current policies to curb poaching

Warchol, 2017-11 Illegally harvested ivory and endangered plants mammals reptiles birds and even insects are easily found for sale throughout East and Southern Africa And this is just one part of the multi billion dollar illegal global trade in wildlife Wildlife is an important and even vital asset for both intrinsic and economic reasons Yet it is illegally exploited on a massive scale to the point where some species now risk extinction *Exploiting the Wilderness* provides a concise overview of this shameful business describing some of the main species being exploited and examining select wildlife whose survival is imperiled due to heavy pressure from poachers to meet consumer demand Greg Warchol draws on his firsthand experience and research in Africa to examine the structure and operation of the illegal trade in wildlife He identifies the participants as well as their motivations and operations and explains the behavior of poachers traffickers and consumers of illegally obtained goods He concludes with a description of legislative and law enforcement efforts to control and prevent wildlife exploitation along with a number of contemporary conservation initiatives designed to improve the ability of rangers to protect wildlife

ecosystems in which they have developed their own behaviour patterns and interactions with other species They form an essential part of the animal kingdom and their loss would have significant ramifications for other dependant flora and fauna The large numbers of rhino orphans and the loss of pregnant females are decimating wild rhino populations This decline is mainly due to poaching for their horns that are made of keratin and which have no proven medical benefit to humans Greedy markets in China Vietnam and Yemen and criminal syndicates offer extremely high prices for rhino horn making it more valuable than gold Whilst tackling the poachers head on is essential it is sadly not enough and vigorous education programmes need to be put in place to inform people of the ecological economic aesthetic and touristic value of rhino This book is dedicated to the plight all rhino species face including museum specimens and fossils Global Environmental Sustainability Choy Yee Keong, 2020-10-31 Global Environmental Sustainability Case Studies and Analysis of the United Nations Journey toward Sustainable Development presents an integrated interdisciplinary analysis of sustainable development addressing global environmental problems in the contemporary world It critically examines current actions being taken on global and local scales particularly in relation to the UN s efforts to promote sustainable development This approach is supported by empirical analysis drawing upon a host of interweaving insights spanning economics politics ecology environmental philosophy and ethics among others As a result it offers a comprehensive and well balanced assessment of the overall perspective of sustainable development supported by in depth content analysis theoretical evaluation empirical and actual case studies premised on solid data and actual field work Also the book marks a milestone in placing the Covid 19 pandemic into a perspective for understanding the universality of human collective environmental behavior and action By utilizing in depth analysis both quantitative and qualitative and challenging the status quo of what is expected in the global approach to sustainable development Global Environmental Sustainability provides the theory and methodology of empirical sustainable development which is especially germane to our advanced society today which is deeply entrenched in a crisis of environmental morality More particularly it serves as a salient source of moral reconstitution of society grounded in empirical reality to liberate man s excessive spirit of individualism and self aggrandizement to the detriment of the environment Epistemologically the book furnishes a remarkable tour de force with a new level of analytical insight to help researchers practitioners and policymakers in sustainability and environmental science as well as the many other disciplines involved in sustainable development to better understand sustainability from a new perspective and provides a methodological direction to pursue solutions going forward Provides a systematic exposition of sustainable development in all its complexity with all the chapters complementing each other in an integral way Presents extensive empirical evidence of various environmental problems across the world including China the United States Canada Southeast Asia South America and Africa and the extent to which the United Nations has succeeded in driving toward global environmental sustainability Provides a cogent examination of the treatment of our global commons by some of the world s

most powerful leaders Includes data from field studies and in depth interviews with indigenous people in Borneo s rainforests of the Malaysian state of Sarawak most affected by environmental change *The Geography of Environmental Crime* Gary R. Potter, Angus Nurse, Matthew Hall, 2016-06-30 This book critically examines both theory and practice around conservation crimes It engages with the full complexity of environmental crimes and different responses to them including poaching conservation as a response to wildlife crime forest degradation environmental activism and the application of scientific and situational crime prevention techniques as preventative tools to deal with green crime Through the contributions of experts from both the social and ecological sciences the book deals with theoretical and practical considerations that impact on the effectiveness of contemporary environmental criminal justice It discusses the social construction of green crimes and the varied ways in which poaching and other conservation crimes are perceived operate and are ideologically driven as well as practical issues in environmental criminal justice With contributions based in varied ideological perspectives and drawn from a range of academic disciplines this volume provides a platform for scholars to debate new ideas about environmental law enforcement policy and crime prevention detection and punishment **Mozambique's foreign policy towards South Africa** Paulo Mateus Wache, 2022-01-01 This Book discusses the Mozambique s foreign policy framework in general and towards South Africa in particular searching to understand why it has been characterized by the hostility friendship dichotomy The Book argues that asymmetry alone cannot explain the occurrence of the dichotomy as suggested by Womack s asymmetry theory In the case of Mozambique s foreign policy the dichotomy is caused by combination of factors namely power asymmetry ideological differences leadership perceptions economic disagreements and economic ties However it is highlighted that power asymmetry is the main factor of the dichotomy This complexity and amalgamations of causes of the dichotomy makes it a permanent and distinctive feature of Mozambique s foreign policy towards South Africa Thus the major contribution of this book is twofold First it presents a detailed and comprehensive analysis of Mozambique s foreign affairs as they have interacted with South Africa Second by applying asymmetry theory to Mozambique the study makes a significant theoretical contribution to understanding the agency of the smaller side in bilateral asymmetric relationships **OECD Reviews of Risk Management Policies Illicit Trade Converging Criminal Networks** OECD, 2016-04-18 This report assesses the magnitude flows and drivers of illicit trade and the illegal economy including narcotics human trafficking wildlife sports betting counterfeit medicines alcohol and tobacco *Just Security in an Undergoverned World* William Durch, Joris Larik, Richard Ponzio, 2018-01-19 Just Security in an Undergoverned World examines how humankind can manage global problems to achieve both security and justice in an age of antithesis Global connectivity is increasing visibly and invisibly in trade finance culture and information helping to spur economic growth technological advance and greater understanding and freedom but global disconnects are growing as well Ubiquitous electronics rely on high value minerals scraped from the earth by miners kept poor by corruption and war People abandon burning states for the often indifferent

welcome of wealthier lands whose people in turn draw into themselves Humanity's very success underwritten in large part by lighting up gigatons of long buried carbon for 200 years now threatens humanity's future The global governance institutions established after World War II to manage global threats especially the twin scourges of war and poverty have expanded in reach and impact while paradoxically losing the political support of some of their wealthiest and most powerful members Their problems mimic those of their members in struggling to adapt to new problems and maintain trust in norms and public bodies This volume argues however that a properly mandated managed and modernized global architecture offers unparalleled potential to midwife solutions to intractable issues from violent conflict and climate change to poverty and pandemic disease that transcend borders and the capacities of individual actors It offers just security as a new framework for charting innovating solutions and strategies for effective and essential global governance

The main conceptual grounds of the book cover sustainability, sustainable development goals, SDGs, responsibility, vulnerability, adaptation, resilience, governance, local development, and inclusive growth. In this book, sustainability is seen as one of the most important issues currently facing the tourism sector, affecting all types and scales of tourism operations and environments in the region. Tourism is an increasingly important economy in the southern African region, and the industry is creating changes for communities and environment while also facing major challenges caused by global trends and changes. The book offers a case study driven approach to sustainability needs of tourism development in local community contexts. The case study chapters are linked through the book's focus on sustainable tourism and local community development. Through emphasizing the need to understand both global change and local contexts in sustainable tourism development, this book is a valuable resource for all those working in the field. Nuwer, 2025-04-08. An intrepid investigation of the criminal world of wildlife trafficking: the poachers, the traders, and the customers, and of those fighting against it. Journalist Rachel Nuwer plunges the reader into the underground of global wildlife trafficking, a topic she has been investigating for nearly a decade. Our insatiable demand for animals for jewelry, pets, medicine, meat, trophies, and fur is driving a worldwide poaching epidemic threatening the continued existence of countless species. Illegal wildlife trade now ranks among the largest contraband industries in the world, yet compared to drug, arms, or human trafficking, the wildlife crisis has received scant attention and support, leaving it up to passionate individuals fighting on the ground to try to ensure that elephants, tigers, rhinos, and more are still around for future generations. As *Reefer Madness*, Schlosser took us into the drug market, or Susan Orlean descended into the swampy obsessions of *The Orchid Thief*, Nuwer, an award-winning science journalist with a background in ecology, takes readers on a narrative journey to the front lines of the trade: to killing fields in Africa, traditional medicine black markets in China, and wild meat restaurants in Vietnam. Through exhaustive first-hand reporting that took her to ten countries, Nuwer explores the forces currently driving demand for animals and their parts, the toll that demand is extracting on species across the planet, and the conservationists, rangers, and activists who believe it is not too late to stop the impending extinctions. More than a depressing list of statistics, *Poached* is the story of the people who believe this is a battle that can be won, that our animals are not beyond salvation. **Analysis of Select**

Wildlife Cases in South Africa Didi Wamukoya, Mira Dutschke, 2017-10-18. The world is in the midst of a poaching and Illegal Wildlife Trade (IWT) crisis which threatens survival of many species. Poaching and IWT involves a wide range of species including insects, reptiles, amphibians, fish, and mammals. IWT has been estimated by different sources to be worth USD 7.23 Billion annually. Targeted species in South Africa include terrestrial mammals such as rhino, endangered plants including cycads, and marine species such as abalone. South Africa lost 1,215 rhinos to poaching in 2014, up from 13 rhinos lost in 2007.

Demand for wildlife and wildlife products was driven by need for pharmaceuticals food pets ornamental and traditional medicinal purposes The poaching crisis and IWT are no longer emerging issues The poaching crisis began in the mid 2000 s when demand for ivory and rhino horn significantly increased From that time wildlife crime has become more sophisticated and now involves large scale transnational organised crime The spike in wildlife crime poses a growing threat not only to wildlife but also to national security rule of law sustainable development and the well being of local communities The scale and nature of the challenges posed by wildlife crime have been recognized in international fora International organizations such as CITES and INTERPOL have held discussions and made decisions on interventions to reduce or curb this crime High level political conferences have also addressed the issue Despite these national and international efforts corruption weak legislation weak judicial systems and light sentences allow criminal networks to continue being involved in IWT because to them it is a low risk business with high returns South Africa has enhanced its law enforcement efforts to combat poaching and IWT The South African government s approach to criminal justice is contained in the overarching 1996 National Crime Prevention Strategy NCPS The NCPS motivated a shift in emphasis from crime control to crime prevention which is a shift towards understanding crime as a social issue rather than a solely security issue It is based on 3 pillars that is improving the criminal justice process reducing crime through environmental design changing public values and education and reducing transnational crime The 1998 White Paper on Safety and Security builds on this NCPS framework It focuses on three key areas namely law enforcement crime prevention and institutional reform to meet delivery goals While both these documents are still applicable to understand South Africa s approach to criminal justice the overall strategies seem to have shifted The South African Police Service adopted a high profile strategy in March 2000 to combat crime in particular hotspots The White Paper on Local Government 1998 also calls for crime prevention and encourages its integration with other aspects of local development Partnerships with NGOs and community based organizations are called for especially in areas where local government lacks skills including crime prevention In 2012 Cabinet approved the Integrated Social Crime Prevention Strategy developed by the National Department of Social Development Further the White Paper on Community Safety Forums 2012 led to the establishment of community safety forums which are supposed to be coordinating structures at local government level The National Development Plan published in 2012 also attaches significant importance to the safety The key enforcement institution for wildlife crimes in South Africa is the Department of Environmental Affairs DEA through its Environmental Management Inspectorate EMI According to the DEA illegal hunting continued to be the predominant wildlife crime in the 2014 2015 fiscal year There were 386 arrests for rhino related offences which was an increase from 343 arrests in 2013 The number of environmental crimes finalised increased from 165 to 265 cases in the 2014 2015 reporting period compared to the 2013 2014 reporting period The conviction rate also increased from 86% to 94 7% Land Rights, Biodiversity Conservation and Justice Sharlene Mollett,Thembela Kepe,2018-04-17 In the context of sustainable development

recent land debates tend to construct two porous camps On the one side norms of land justice and their advocates dictate that people's rights to tenure security are tantamount and even sometimes key to successful conservation practice On the other hand biodiversity protection and conservation advocates supported by global environmental organizations and states remain committed to conservation strategies steeped in genetics and biological sciences working on behalf of a global mandate for biodiversity and climate change mitigation Land Rights Biodiversity Conservation and Justice seeks to illuminate struggles for land and territory in the context of biodiversity conservation This edited volume explores the particular ideologies narratives and practices that are mobilized when the agendas of biodiversity conservation practice meet clash and blend with the demands for land and access and control of resources from people living in and in close proximity to parks The book maintains that while biodiversity conservation is an important goal in a time where climate change is a real threat to human existence the successful and just future of biodiversity conservation is contingent upon land tenure security for local people The original research gathered together in this volume will be of considerable interest to researchers of development studies political ecology land rights and conservation

Dark Commerce Louise I. Shelley, 2020-11-10 Though mankind has traded tangible goods for millennia recent technology has changed the fundamentals of trade in both legitimate and illegal economies In the past three decades the most advanced forms of illicit trade have broken with all historical precedents and as Dark Commerce shows now operate as if on steroids tied to computers and social media In this new world of illicit commerce which benefits states and diverse participants trade is impersonal and anonymized and vast profits are made in short periods with limited accountability to sellers intermediaries and purchasers Louise Shelley examines how new technology communications and globalization fuel the exponential growth of dangerous forms of illegal trade the markets for narcotics and child pornography online the escalation of sex trafficking through web advertisements and the sale of endangered species for which revenues total in the hundreds of millions of dollars The illicit economy exacerbates many of the world's destabilizing phenomena the perpetuation of conflicts the proliferation of arms and weapons of mass destruction and environmental degradation and extinction Shelley explores illicit trade in tangible goods drugs human beings arms wildlife and timber fish antiquities and ubiquitous counterfeits and contrasts this with the damaging trade in cyberspace where intangible commodities cost consumers and organizations billions as they lose identities bank accounts access to computer data and intellectual property
