**Exploiting the Wilderness** Greg L. Warchol,2017-11 Illegally harvested ivory and endangered plants mammals reptiles birds and even insects are easily found for sale throughout East and Southern Africa And this is just one part of the multi billion dollar illegal global trade in wildlife Wildlife is an important and even vital asset for both intrinsic and economic reasons Yet it is illegally exploited on a massive scale to the point where some species now risk extinction Exploiting the Wilderness provides a concise overview of this shameful business describing some of the main species being exploited and examining select wildlife whose survival is imperiled due to heavy pressure from poachers to meet consumer demand Greg Warchol draws on his firsthand experience and research in Africa to examine the structure and operation of the illegal trade in wildlife He identifies the participants as well as their motivations and operations and explains the behavior of poachers traffickers and consumers of illegally obtained goods He concludes with a description of legislative and law enforcement efforts to control and prevent wildlife exploitation along with a number of contemporary conservation initiatives designed to improve the ability of rangers to protect wildlife

**Just Security in an Undergoverned World** William Durch,Joris Larik,Richard Ponzio,2018-01-19 Just Security in an Undergoverned World examines how humankind can manage global problems to achieve both security and justice in an age of antithesis Global connectivity is increasing visibly and invisibly in trade finance culture and information helping to spur economic growth technological advance and greater understanding and freedom but global disconnects are growing as well Ubiquitous electronics rely on high value minerals scraped from the earth by miners kept poor by corruption and war People

abandon burning states for the often indifferent welcome of wealthier lands whose people in turn draw into themselves Humanity's very success underwritten in large part by lighting up gigatons of long buried carbon for 200 years now threatens humanity's future The global governance institutions established after World War II to manage global threats especially the twin scourges of war and poverty have expanded in reach and impact while paradoxically losing the political support of some of their wealthiest and most powerful members Their problems mimic those of their members in struggling to adapt to new problems and maintain trust in norms and public bodies This volume argues however that a properly mandated managed and modernized global architecture offers unparalleled potential to midwife solutions to intractable issues from violent conflict and climate change to poverty and pandemic disease that transcend borders and the capacities of individual actors It offers just security as a new framework for charing innovating solutions and strategies for effective and essential global governance

*Animals* ,1970 **The Nature of Politics** Annette A. LaRocco,2024-04-16 This case study of Botswana focuses on the state building qualities of biodiversity conservation in southern Africa Drawing on extensive fieldwork Annette A LaRocco argues that discourses and practices related to biodiversity conservation are essential to state building in the postcolonial era These discourses and practices invoke the ways the state exerts authority over people places and resources enacts and remakes territorial control crafts notions of ideal citizenship and identity and structures economic relationships at the local national and global levels The book s key innovation is its conceptualization of the conservation estate a term most often used as an apolitical descriptor denoting land set aside for the purpose of conservation LaRocco argues that this description is inadequate and proposes a novel and much needed alternative definition that is tied to its political elements The components of conservation control over land policing of human behavior and structuring of the authority that allows or disallows certain subjectivities render conservation a political phenomenon that can be analyzed separately from considerations of nature or wildlife In doing so it addresses a gap in the scholarship of rural African politics which focuses overwhelmingly on productive agrarian dynamics and often fails to recognize that land nonuse can be as politically significant and wide reaching as land use Botswana is an ideal empirical case study upon which to base these theoretical claims With 39 percent of its land set aside for conservation Botswana is home to large populations of wildlife particularly charismatic megafauna such as the largest herd of elephants on the continent Utilizing more than two hundred interviews participant observation and document analysis this book examines a series of conservation policies and their reception by people living on the conservation estate These phenomena include securitized antipoaching enforcement a national hunting ban 2014 19 restrictions on using wildlife products forced evictions from conservation areas limitations on mobility and freedom of movement the political economy of Botswana s wildlife tourism industry and the conservation of globally important charismatic megafauna species
