heterarchy heteronomy and ontology Arguing that colonialists similarly denied Africans of their human essence the tome problematises queer sexualities homosexuality ecosexuality cybersexuality and humanoid robotic sexuality all of which complicate supposedly fundamental distinctions between human beings and animals and machines Provocatively questioning queer sexuality and liberalised orifices that serve to divert African attention from the more serious unfinished business of repossessing material resources the book insightfully compares Robert Gabriel Mugabe Thomas Sankara and Julius Kambarage Nyerere who emphasised the imperatives of African autonomy ownership control and sovereignty over natural resources Observing Africans interest in repossessing ownership and control over their resources the book wonders why so much queer international attention is focused on foisting queer sexuality while downplaying more burning issues of resource repossession human dignity equality and equity craved by Africans for whom life is not confined to sexuality With insights for scholars in sociology development studies law politics African studies anthropology transformation decolonisation and decoloniality the book argues that liberal democracy is a fa ade in a world that is actually ruled through criminocracy

Universities and Epistemic Justice in a Plural World

Margaret Meredith, 2024-02-26 This book explains why universities and academics within them must engage with the diversity of knowledges and knowers that exist in the world. Through philosophical perspectives, theoretical frameworks and practical examples from around the world, the book searches for opportunities for renewal and inclusion in universities. It explains how higher education can better serve the purposes of social justice by re-evaluating the types of knowledge it promotes. Going beyond the identification and analysis of injustices in ways of knowing in academia, the book offers insights and examples of practices in teaching, research and work with the community which aim to move towards justice on an epistemic level. It argues that inclusion in the domain of knowledge can lead to the generation of knowledges and understandings that are more robust and better equipped to address the pressing needs of the plural worlds outside the university. Contributions are included from authors working in varied disciplinary and cultural contexts in universities who describe and explicate their work towards identifying epistemic injustice and finding spaces to advance knowledge justice in theory and in practice. The book will be beneficial to academics and those with an interest in the role of universities in serving the public good.

Universities as Living Labs for Sustainable Development Walter Leal Filho, Amanda Lange Salvia, Rudi W.

Pretorius, Luciana Londero Brandli, Evangelos Manolas, Fatima Alves, Ulisses Azeiteiro, Judy Rogers, Chris Shiel, Armin da Do Paco, 2019-04-30 This book fills an important gap in the literature and presents contributions from scientists and researchers working in the field of sustainable development who have engaged in dynamic approaches to implementing sustainability in higher education. It is widely known that universities are key players in terms of the implementation and further development of sustainability, with some having the potential of acting as living labs in this rapidly growing field. Yet there are virtually no publications that explore the living labs concept as it relates to sustainability and in an integrated manner. The aims of this book, which is an outcome of the 4th World Symposium on Sustainable Development at Universities (WSSD U 2018) held in Malaysia in 2018, are as follows: i) to document the experiences of universities from all around the world in curriculum innovation, research activities and practical projects as they relate to sustainable development at the university level; ii) to disseminate information, ideas and experiences acquired in the execution of projects including successful initiatives and good practice; iii) to introduce and discuss methodological approaches and projects that seek to integrate the topic of sustainable development in the curricula of universities; and iv) to promote the scalability of existing and future models from universities as living labs for sustainable development. The papers are innovative, cross-cutting and many reflect practice-based
