

Estimating Pressure Vessels Weights

It is important to be able to estimate vessel weights, since most cost estimating procedures start with the weight of the vessel. The vessel weight, both empty and full with water, may be necessary to adequately design a foundation or to assure that the vessel can be lifted or erected once it gets to the construction site.

The weight of a vessel is made up of the weight of the shell, the weight of the heads, and the weight of internals, nozzles, pedestals, and skirts. The last two terms are defined in Figure 12-3.

Figure 12-3. Vessel support devices.

The shell weight can be estimated from:

$$W = 11dsL \quad (12-5)$$

where W = weight, lb
 d = ID, in.
 t = wall thickness, in.
 L = shell length, ft.

The weight of one 2:1 ellipsoidal head is approximately:

$$W \cong 0.34 d^2 + 1.9 dt \quad (12-6)$$

The weight of a cone is:

$$W = \frac{0.23\pi d^2}{\sin \alpha} \quad (12-7)$$

α = one half the cone apex angle.

The weight of nozzles and internals can be estimated at 5 to 10% of the sum of the shell and head weights. The weight of a skirt can be estimated as the same weight per foot as the shell with a length given by Equation 12-8 for an ellipsoidal head and Equation 12-9 for a conical head.

Encyclopedia of Environmental Analysis and Remediation, Volume 3 Robert A. Meyers, 1998-03-23. This encyclopedia is composed of an eight volume set that provides an overview of the field of environmental analysis. The contents are divided into major content areas including air pollution control, environmental law and environmental sampling. The volumes are organized alphabetically with each article signed by the author. The individual articles begin with a summary of the topic heading and then divide the text into subtopics indicated by boldface headings. The articles are written clearly; however, the authors assume a basic knowledge of chemistry and math on the part of the reader. For example, the acid mine drainage article refers to the Arrhenius equation but does not clarify this statement in the text. Each article contains graphs as well as pictures to illustrate points made in the text. The articles are long and provide a detailed explanation of each topic. The authors also provide a bibliography at the end of each article. Special features of the encyclopedia include a list of contributors, a table of conversion factors and a list of abbreviations and acronyms. The preface outlines the general contents of the encyclopedia. The preface also includes sections that suggest the target audience and recommended usages for the set. The final volume of the set contains an alphabetic index to the topics contained in the volumes.
