Footprints McLean Sibanda, 2021-09-06 Footprints is a captivating story about intellectual property IP. It speaks to its role in society, trade, industry and economy and expounds on the actual meaning of IP. The book lays a solid foundation for innovators, entrepreneurs, businesses and nations to realise their full potential through IP policy, legislation, use and practices. McLean Sibanda shares his personal story together with stories and testimonies of fellow travellers taking us through their journey into the field of IP. He meticulously recounts South Africa's path in transforming the management of IP emanating from publicly financed research and development, R & D development of critical human capital and other infrastructure to ensure effective IP commercialisation and technology transfer. Footprints is a timely masterpiece given IP issues in Africa's scramble for Covid 19 vaccines and implementation of the agreement establishing the African Continental Free Trade Area (AfCFTA). The book provides strategies of how African countries can use IP and innovation to develop industries to ensure health, security and trading of goods that can benefit from the AfCFTA. Narrated through a series of significant moments, Footprints demonstrates the importance of vision, solid foundation, collaboration, champions and intentional steps for economic transformation. With glimpses into how countries such as China and Korea used IP to develop their economies, this book makes a compelling case for embracing IP, increased R & D investment, relevant human capital and appropriate use of IP in the development of new products and services necessary for knowledge-based and industrialised economies. Footprints is a must-read for any academic, aspiring intellectual property scholar, policy maker, economist, development activist, entrepreneur, researcher, innovator, professional and technology transfer specialist. Intellectual property is everywhere around us and impacts our lives. For entrepreneurs and businesses alike, intellectual property is about value creation; it is the insurance you need for when you succeed. McLean Sibanda.

*Mobility, Data and Learner Agency in Networked Learning* Nina Bonderup Dohn, Petar Jandrić, Thomas Ryberg, Maarten de Laat, 2020-03-26 The chapters in this book are based on selected peer reviewed research papers presented at the 11th biennial Networked Learning Conference NLC 2018 held in Zagreb and were chosen as exemplars of cutting edge research on networked learning The chapters are organized into three main sections 1 Aspects of mobility for Networked Learning in a global world 2 Use and misuse of algorithms and learning analytics 3 Understanding and empowering learners The three main sections are flanked by chapters which introduce and reflect on Networked Learning as epistemic practice The concluding chapter draws out perspectives from the chapters and discusses emerging issues The book focuses on the nature of learning and interactions as an important characteristic sought out by researchers and practitioners in this field

*Geriatric Medicine* Michael R. Wasserman, Debra Bakerjian, Sunny Linnebur, Sharon Brangman, Matteo Cesari, Sonja Rosen, 2024-02-19 Both

volumes sold as a combined set for a one time purchase Older adults represent the most rapidly growing demographic in the U S and in many developed countries around the world The field of geriatric medicine is still relatively young and is only recently seeing a significant increase in peer reviewed literature Medicare and Medicaid expenditures related to older adults are nearly a trillion dollars year in the US How our healthcare system cares for older adults and how those older adults navigate an increasingly complex system is of the utmost importance According to the Institute of Medicine physicians and other healthcare professionals receive an inadequate amount of training in geriatric medicine Geriatric medicine is based on the concept of delivering person centered care with a focus on function and quality of life It is essential that physicians nurse practitioners physician assistants pharmacists social workers and other health care professionals all be knowledgeable about the geriatric approach to care Geriatric medicine varies from most other fields in medicine While many specialties function on the basis of evidence based literature geriatricians and other clinicians caring for older adults must integrate relatively limited evidence with variable physiological changes and complex psychosocial determinants Geriatricians are used to caring for 90 year olds with multiple chronic illnesses Their variable physiology leads to uncertain responses to pharmacotherapy and their personal goals and wishes need to be incorporated into any plan of care Practicing geriatric medicine requires the ability to see patterns But it goes one step further as the rules are constantly in flux Every patient is an individual with particular needs and goals In order to provide true person centered care to older adults one has to incorporate these factors into the decision making process The proposed handbook is designed to present a comprehensive and state of the art update that incorporates existing literature with clinical experience Basic science and the physiology of aging create a background but are not the main focus This is because every chapter has been written through the lens of person centered care This book is about focusing on what matters to the person and how that is not always about pathology and physiology The reader generally will not find simple solutions to symptoms diseases and syndromes In fact the key to caring for geriatric patients is the ability to think both critically and divergently at the same time Geriatrics encompasses multiple disciplines and spans all of the subspecialties It requires knowledge of working within an interdisciplinary team It requires an appreciation of how quality of life varies with each individual and creates treatment and care plans that also vary And most of all it requires a firm commitment to first learning who the person is so that all of the necessary data can be analyzed and integrated into a true person centered plan of care This book aims to serve as an unparalleled resource for meeting these challenges Updated and revised from the previous edition this text features over 40 new peer reviewed chapters new references and a wide array of useful new tools that are updated on a regular basis by interdisciplinary and interprofessional experts in geriatric medicine

**Sea Narratives: Cultural Responses to the Sea, 1600-Present** Charlotte Mathieson, 2016-06-07 Sea Narratives Cultural Responses to the Sea 1600 Present explores the relationship between the sea and culture from the early modern period to the present The collection uses the concept of the sea narrative as a lens through which to consider the multiple

ways in which the sea has shaped challenged and expanded modes of cultural representation to produce varied contested and provocative chronicles of the sea across a variety of cultural forms within diverse socio cultural moments Sea Narratives provides a unique perspective on the relationship between the sea and cultural production it reveals the sea to be more than simply a source of creative inspiration instead showing how the sea has had a demonstrable effect on new modes and forms of narration across the cultural sphere and in turn how these forms have been essential in shaping socio cultural understandings of the sea The result is an incisive exploration of the sea s force as a cultural presence
