

Sophie never stopped talking. She even sleep-talked. It was as if someone had turned her onto talk mode, and broken the switch. Actually, there was no switch. No "Off" at all.

Lewis liked to listen. He had turned ten a month ago and his parents still wondered when he would start talking. He sat behind Sophie in class and

listened to her. He never got annoyed, he thought she was funny. Every now and then he would say something to her like "Uh-huh" or "Wow" and when he felt like making a big effort he might even say, "What happened next?" or "Did you really?"

They were both pretty clever kids in their own ways. Fortunately for Lewis he showed how clever he was in his schoolwork. Unfortunately for Sophie, she was too busy talking, (and being sent to the corner, to the office, and to the principal) to get much work done.

One Monday afternoon, when it was Lewis' turn on message delivery duty, and Sophie had spent twenty minutes writing, "I will be quiet in class" over and over on the whiteboard, their teacher sent them both out together to run a couple of errands.

Teaching Integrated Reading Strategies in the Middle School Library Media Center Kathleen M.

Alley, 2008-06-30 Drawing on the success of the popular elementary level book *Teaching Reading Strategies in the School Library*, Walker and Shaw Libraries Unlimited 2004, this title will provide library media specialists with a resource to help integrate research based reading strategies into the middle school library curriculum as part of the library lesson. The strategies discussed are those commonly used by teachers in the classroom and are easily adapted to use in the library media center, allowing library teachers to support school wide reading initiatives through instruction while sharing appreciation of literature. Reading strategies are incorporated in a chapter format explaining the strategy and benefits of integration as well as offering resources, a review of the relevant research methods and a clear step by step approach to instruction. Chapters share general knowledge about reading instruction and illustrate how media specialists can incorporate specific examples including reproducible items and graphic organizers. The overall outline of the book parallels the usual reading instructional pattern of strategies to use before, during and after reading. Grades 6-8
