

Co-Education

"Every man has three characters that he exhibits: that which he has and that which he thinks he has."
(Alphonse Karr)

Mixed education is teaching boys and girls under the same roof; it also means giving a kind of education to both sexes. First of all, it was introduced in Switzerland. The developed countries of Europe adopted it in the beginning. The Muslim countries did not like this system. But some westernized institutions took over with the passage of time. Now it has become very popular. Plato, the great philosopher, gave the idea: ***"Joint education is essential for the development of the personality."*** According to him, education is the only way to make girls and boys useful to society. That's why the best adopted this system a long time ago and started to reap the benefits.

Co-education is a controversial topic. People with radical ideas are in favor of it. Their advocacy is primarily based on economic considerations. They say it is very difficult to keep separate schools and colleges for boys and girls. The government cannot afford to fund two separate institutions in small towns and cities.

Moreover, education is essential to modern civilization. today women are expected to work side by side with men. They are seen in offices, factories, mills, farms everywhere. They compete with men in every area of life. Education should also be introduced to them under the same roof and system so that

education and the long often grimly comic history of the arguments that men with authority to speak have used and continue to use to rationalize limiting women's role. Everyone interested in the history of women in American universities should read this book. Robert W. Dimand, Brock University, Canada. These essays offer fresh insights on the question of the paucity of women in higher education and together form a thoughtful and contemporary response to Lawrence Summers and the Woman Question in the twenty-first century. This uniquely interdisciplinary study offers a provocative contemporary look at the Woman Question in relation to higher education at the dawn of the twenty-first century. Leading feminist scholars from a wide variety of perspectives and disciplines including history, philosophy, education, psychology, sociology, and economics evaluate the role of biology, discrimination, and choice in rationalizing women's exclusion from fully participating in the process of knowledge production as well as examining institutional impediments. Contextualizing arguments against women's inclusion and including contemporary perspectives on gender, this book offers a rich, multi-layered examination and critical insights into understanding the near-universal difficulties that women encounter as they seek to participate fully in the process of knowledge production. This book addresses one of the most compelling topics of our time and speaks to our need to understand the long struggle of women to gain an authoritative voice in higher education and the factors that underlie that struggle. Scholars and researchers of women's studies, higher education, and a range of humanities and social sciences will find this book a welcome addition to the literature. *The Politics of 1930s British Literature* Natasha Periyar, 2018-06-14 Winner of the 2018 International Standing Conference for the History of Education's First Book Award. Drawing on a rich array of archival sources and historical detail, *The Politics of 1930s British Literature* tells the story of a school-minded decade and illuminates new readings of the politics and aesthetics of 1930s literature. In a period of shifting political claims, educational policy shaped writers' social and gender ideals. This book explores how a wide array of writers including Virginia Woolf, W. H. Auden, George Orwell, Winifred Holtby, and Graham Greene were informed by their pedagogic work. It considers the ways in which education influenced writers' analysis of literary style and their conception of future literary forms. *The Politics of 1930s British Literature* argues that to those perennial symbols of the 1930s, the loudspeaker and the gramophone, should be added the textbook and the blackboard. *The Quarterly Review of the Evangelical Lutheran Church*, 1874

The Lost Boys of Zeta Psi Laurie A. Wilkie, 2010-04-02 *The Lost Boys of Zeta Psi* takes us inside the secret, amusing, and sometimes mundane world of a California fraternity around 1900. Gleaning history from recent archaeological excavations and from such intriguing sources as oral histories, architecture, and photographs, Laurie A. Wilkie uncovers details of everyday life in the first fraternity at the University of California, Berkeley, and sets this story into the rich social and historical context of West Coast America at the turn of the last century. In particular, Wilkie examines men's coming-of-age experiences in a period when gender roles and relations were undergoing dramatic changes. Her innovative study illuminates shifting notions of masculinity and at the same time reveals new insights about the inner workings of fraternal orders and their role in
