

## Education Is a Key to Success Essay Example

Who does not want to be successful in life? Success is what everybody in this world strives to achieve, but not everybody can taste it because they do not know how. To be successful you must take some decisions, you must know what you want to accomplish and create a strategic plan as a guideline to get the ultimate results you want for your life. College is one of the tools you can use to be successful because it gives you the necessary skills to succeed and prepares you for a career. However, not having a degree, some people can become success as well.

Therefore, to be successful education is not the only way. Personally, I strongly disagree with this concept that says education is an essential way to success. I think there are many way to success and one of the most essential keys to be successful is to have the natural skill and talents. From sports to music and art, for example, they do not need practicing. They just use their talent from their birth for their work. Walt Disney became known for his cartoon characters that included Mickey Mouse, for example, didn't graduate from college or high school and was enormously successful. He had the ambition and the motivation to press on and it paid off; others can do the same. In addition, everyone has to struggle here in this world to overcome every obstacle in the way to success. For this hard work is necessary.

Without working hard and just by sitting idle it will be hard for one to get success. Since from childhood and till now I always remember the sentence that my parents used to tell me "to be a better person in life and to get success you have to work hard, the result of hard work is always fruitful, so you have to work hard". I want to give examples from athletes like Michael Jordan to executives like Howard Schultz, these people are known for waking up early and working toward a goal while other people are still in bed, and staying later than everyone else too.

Furthermore, one reason that is a person become success is that he or she has confident on himself or herself. According to Bill Gates, who is so successful in this business, always dream to become a millionaire before he is thirty, and he made it. Now he is the richest person in the world, and it would surprise that he has a low degree of education. However, education is the base way to introduce where you should go, and at least you can write, read, understand other people what they want to say, and so on.

It means that when you are educated, at it can help to have a good livelihood, awareness in life, a degree, or education mainly, that are a necessary component for your life. In conclusion, I do agree that educatio
