

Installation Instructions

SAFETY INSTRUCTIONS

Accessory installation should be completed **before** the breaker is mounted and connected. If breaker is installed, be sure to **turn off power supplying breaker** before installing accessory. Disconnect and remove the breaker from the panel or enclosure to install the accessories.

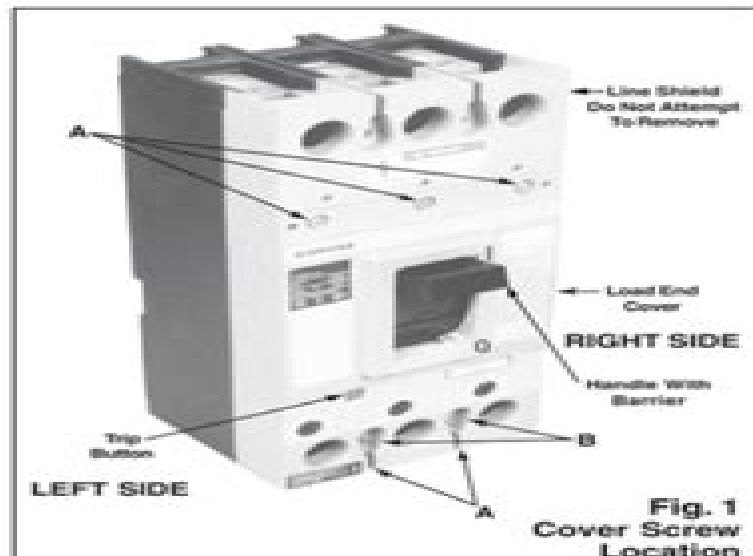

NOTE: This instruction outlines the recommended installation procedure. Accessory units can be mounted in either left or right poles of circuit breaker.

Circuit Breaker Preparation

1. Depress trip button (See Fig. 1) to trip circuit breaker prior to removing cover. Before installing accessory unit, breaker **must** be in tripped position.
2. Remove five load end cover screws (A, Fig. 1) and, if breaker is mounted, also remove two mounting screws (B, Fig. 1). Remove load end cover only, and remove handle and handle barrier.
3. Ref. Fig. 2: Locate the 5/16 x 5/32" channel for the accessory wire leads. On models with a molded in knock out, remove one half of the knock out for two wire accessories such as single auxiliary switches and the entire knockout for four wire accessories such as double auxiliary switches, shunt trip, alarm, undervoltage trip and low voltage switch. Remove channel knockouts only from the side in which the accessory is to be installed.
4. On models with access holes plugs, remove the access hole plug (T) from the 5/16 X 5/32" accessory lead access hole (C) by pushing the plug into the interior of the circuit breaker. (NOTE: The moveable contacts must be pushed downward slightly for removal of the plug from the circuit breaker.) Remove the plug only from the side in which the accessory is to be installed.

Accessory Mounting Instructions

NOTE: Shunt trip and Undervoltage trip may require special installation procedure. See Item 5.
