The Oxford History of the Novel in English Cyrus R. K. Patell, Deborah Lindsay Williams, 2024-03-05 The Oxford History of the Novel in English is a twelve volume series presenting a comprehensive global and up to date history of English language prose fiction written by a large international team of scholars The series is concerned with novels as a whole not just the literary novel and each volume includes chapters on the processes of production distribution and reception and on popular fiction and the fictional sub genres as well as outlining the work of major novelists movements and tendencies This book offers an account of US fiction during a period demarcated by two traumatic moments the eve of the entry of the United States into the Second World War and the onset of the Covid 19 pandemic The aftermath of the Second World War was arguably the high point of US nationalism but in the years that followed US writers would increasingly explore the possibility that US democracy was a failure both at home and abroad For so many of the writers whose work this volume explores the idea of nation became suspect as did the idea of national literature as the foundation for US writing Looking at post 1940s writing the literary historian might well chart a movement within literary cultures away from nationalism and toward what we would call cosmopolitanism a perspective that fosters conversations between the occupants of different cultural spaces and that regards difference as an opportunity to be embraced rather than a problem to be solved During this period the novel has had significant competition for the US public s attention from other forms of narrative and media film television comic books videogames and the internet and the various forms of social media that it spawned If however the novel becomes a residual form during this period it is by no means archaic The novel has been reinvigorated over the past eighty years by its encounters with both emergent forms such as film television comic books and digital media and the emergent voices typically associated with multiculturalism in the United States The Oxford History of the Novel in English Priscilla Wald, Michael A. Elliott, 2014-01-21 Witnessing the end of a war that nearly terminated the nation the abolition of racial slavery and rise of legal segregation the rise of Modernism and Hollywood the closing of the frontier and two World Wars the literary historical period represented in this volume constitutes the crucible of American literary history. Here 35 essays by top researchers in the field detail how considerations of race and citizenship immigration and assimilation gender and sexuality nationalism and empire all reverberate throughout novels written in the United States between 1870 and 1940 Contributors discuss the professionalization of literary production after the Civil War alongside legal and political debates over segregation and citizenship while chapters on journalism geography religion and immigration offer discussions on everything from the lasting role of literary realism in American fiction to the Spanish American War s effect on developing theories of aesthetics and popular culture The volume offers thorough coverage of the emergence of serial fiction children's fiction crime and detective fiction science fiction and even cinema and comics as new media and artistic revolutions like the Harlem Renaissance helped usher in the new international aesthetic movement of Modernism The final chapters in the volume explore the relationship of the novel to the emergence of American literature as a category in the academy in public criticism and journalism and in mass culture Reading the Novel in English 1950 - 2000 Brian W. Shaffer, 2009-02-09 Written in clear jargon free prose this introductory text charts the variety of novel writing in English in the second half of the twentieth century An engaging introduction to the English language novel from 1950 2000 exclusive of the US Provides students both with strategies for interpretation and with fresh readings of selected seminal texts Maps out the most important contexts and concepts for understanding this fiction Features readings of ten influential English language novels including Margaret Atwood s The Handmaid's Tale Kazuo Ishiguro's Remains of the Day and Chinua Achebe's Things Fall Apart **Urban Rehearsals and** Novel Plots in the Early American City Elizabeth Klimasmith, 2021 Explores how early American Republic literary texts about urban life played an important role in constructing urban spaces and identities in the young United States and how books allowed readers to access and practice being urban New Directions in the History of the Novel P. Parrinder, A. Nash, N. Wilson, 2014-02-25 New Directions in the History of the Novel challenges received views of literary history and sets out new areas for research A re examination of the nature of prose fiction in English and its study from the Renaissance to the 21st century it will become required reading for teachers and students of the novel and its history **Update** ,1984 Urban Rehearsals and Novel Plots in the Early American City Betsy Klimasmith, 2021-11-04 Urban Rehearsals and Novel Plots in the Early American City sheds new light on the literature of the early US by exploring how literature theatre architecture and images worked together to allow readers to imagine themselves as urbanites even before cities developed In the four decades following the Revolutionary War the new nation was a loose network of nascent cities connected by print Before a national culture could develop local city cultures took shape literary texts played key roles in helping new Americans become city people Drawing on extensive archival research Urban Rehearsals argues that literature

particularly novels and plays allowed Bostonians to navigate the transition from colonial town to post revolution city enabled Philadelphians to grieve their experiences of the 1793 Yellow Fever epidemic and rebuild in the epidemic's aftermath and showed New Yorkers how the domestic practices that reinforced their urbanity could be opened to the broader public Throughout attention to underrepresented voices and texts calls attention to the possibilities for women immigrants and Black Americans in developing urban spaces while showing how those possibilities would be foreclosed as the nation developed Balancing attention to canonical texts of the early Republic including The Power of Sympathy Charlotte Temple and Benjamin Franklin's Autobiography with novels whose depiction of early cities deserves greater attention such as Ormond The Boarding School Monima and Kelrov this volume shows how US cities developed on the pages and stages of the early Republic building urban imaginations that would construct the nation s early cities Representing (Post)Human Enhancement Technologies in Twenty-First Century US Fiction Carmen Laguarta-Bueno, 2022-10-07 This work studies three twenty first century novels by Richard Powers Dave Eggers and Don DeLillo as representative of a new trend of US fiction concerned with the topic of the technological augmentation of the human condition. The different chapters provide from the double perspective of the optimistic transhumanist philosophy and the more balanced approach of critical posthumanism an overview of the narrative strategies used by the writers to explore the possibilities that biotechnology digital technologies and cryonics open up to transcend our human limitations while also warning their readers of their most nefarious consequences Ultimately the book puts forward the claim that even if the writers approach the subject from a variety of perspectives and using different narrative styles and techniques they all share a critical posthumanist fear that an unrestrained and unquestioned use of technology for enhancement purposes may bring about disembodiment and dehumanization American Literary Gazette and Publishers' Circular ,1871 The American Novel 1870-1940 Priscilla Wald, Michael A.
