The End Of Science John Horgan, 2015-04-14 As staff writer for Scientific American John Horgan has a window on contemporary science unsurpassed in all the world Who else routinely interviews the likes of Lynn Margulis Roger Penrose Francis Crick Richard Dawkins Freeman Dyson Murray Gell Mann Stephen Jay Gould Stephen Hawking Thomas Kuhn Chris Langton Karl Popper Stephen Weinberg and E O Wilson with the freedom to probe their innermost thoughts In The End Of Science Horgan displays his genius for getting these larger than life figures to be simply human and scientists he writes are rarely so human so at their mercy of their fears and desires as when they are confronting the limits of knowledge This is the secret fear that Horgan pursues throughout this remarkable book Have the big questions all been answered Has all the knowledge worth pursuing become known Will there be a final theory of everything that signals the end Is the age of great discoverers behind us Is science today reduced to mere puzzle solving and adding details to existing theories Horgan extracts surprisingly candid answers to these and other delicate questions as he discusses God Star Trek superstrings quarks plectics consciousness Neural Darwinism Marx's view of progress Kuhn's view of revolutions cellular automata robots and the Omega Point with Fred Hoyle Noam Chomsky John Wheeler Clifford Geertz and dozens of other eminent scholars The resulting narrative will both infuriate and delight as it mindlessly Horgan's smart contrarian argument for endism with a witty thoughtful even profound overview of the entire scientific enterprise Scientists have always set themselves apart from other scholars in the belief that they do not construct the truth they discover it Their work is not interpretation but simple revelation of what exists in the empirical universe But science itself keeps imposing limits on its own power Special relativity prohibits the transmission of matter or information at speeds faster than that of light quantum mechanics dictates uncertainty and chaos theory confirms the impossibility of complete prediction Meanwhile the very idea of scientific rationality is under fire from Neo Luddites animal rights activists religious fundamentalists and New Agers alike As Horgan makes clear perhaps the greatest threat to science may come from losing its special place in the hierarchy of disciplines being reduced to something more akin to literary criticism as more and more theoreticians engage in the theory twiddling he calls ironic science Still while Horgan offers his critique grounded in the thinking of the world's leading researchers he offers homage too If science is ending he maintains it is only because it has done its work so well

Dictionary of Christianity and Science Zondervan, 2017-04-25

The definitive reference work on science and Christian belief. How does Christian theology relate to scientific inquiry? What are the competing philosophies of science and do they work with a Christian faith based on the Bible? No reference work has covered this terrain sufficiently until now. Featuring entries from over 140 international contributors, the *Dictionary of Christianity and Science* is a deeply researched, peer-reviewed, fair-minded work that illuminates the intersection of science and Christian belief. In one volume you get reliable summaries and critical analyses of over 450 relevant concepts, theories, terms, movements, individuals, and debates. You will find answers to your toughest questions about faith and science from the existence of Adam and Eve to the age of the earth, evolution, and string theory.

FEATURES INCLUDE: Over 450 entries that will help you think through some of today's most challenging scientific topics including climate change, evolution, bioethics, and much more. Essays from over 140 leading international scholars including Francis Beckwith, Michael Behe, Darrell Bock, William Lane Craig, Hugh Ross, Craig Keener, Davis Young, John Walton, and many more. Multiple view essays on controversial topics allow you to understand and compare differing Christian viewpoints. Learn about flesh and blood figures who have shaped the interaction of science and religion. Augustine, Aquinas, Bacon, Darwin, and Stephen Hawking are just the beginning. Fully cross-referenced entries include references and recommendations for further reading. Advance Praise: Every Christian studying science will want a copy within arm's reach. Scot McKnight, Northern Seminary. This is an invaluable resource that belongs in every Christian's library. I will be keeping my copy close by when I'm writing. Lee Strobel, Elizabeth and John Gibson, chair of apologetics, Houston Baptist University. Sparkles with passion, controversy, and diverse perspectives. Karl Giberson, professor of science and religion, Stonehill College. An impressive resource that presents a broad range of topics from a broad tent of evangelical scholars. Michael R. Licona, Houston Baptist University. I am certain that this dictionary will serve the church for many years in leading many to demonstrate that modern science can glorify our Creator and honor his creation. Denis O. Lamoureux, University of Alberta. Dictionary is too humble a

Disability and U.S. Politics Dana Lee Baker,2017-01-16 More than 1 billion people worldwide have a disability and they are all affected by politics This two volume work explores key topics at the heart of disability policy such as voting race gender age health care social security transportation abuse and the environment Disability policy is no longer an area that can be adequately addressed within major areas of public policy such as welfare health labor and education Disability has become widely acknowledged in recent decades partly because of the increasing number of disabled citizens across all demographic populations Advocates argue that diversity of all kinds deserves recognition and accommodation This set examines policies targeting disability to provide a multifaceted description of the political participation of people with disabilities as well as disability policy development in the United States The first volume focuses on political participation and voting issues and the second volume covers disability public policy In these two volumes numerous scholars and experts in the social sciences and humanities explore timely topics that are key to disability policy questions including activism voting race gender age health care social security civil rights abuse the environment and even death Readers will better understand the challenges that policymakers face in grappling with controversies over issues of social engineering and public policy often attempting to reconcile majority experience with minority rights The chapters analyze the history of disability politics describe the disability policy infrastructure as it currently exists in the United States and provide insight into current disability related controversies

Research Council Support for Knowledge Transfer Great Britain: Parliament: House of Commons: Science and Technology Committee,2006-06-15 Research council support for knowledge Transfer Third report of session 2005 06 Vol 2 Oral and written Evidence Science under siege Peter Banks,Daniel Lunney,Chris Dickman,2012-11-01 On Saturday 29 November 2008 the Royal Zoological Society of NSW held a forum with the theme of Science under siege As the RZS is a zoological society zoology under threat became the secondary theme and the basis for selecting speakers This book records that forum with the papers developed for this book as the

written word from the spoken presentations Papers that were presented as posters are included as are the edited plenary sessions which featured questions from the floor with answers and comments encouraged from anyone in the forum We were delighted that Mark Horstman from ABC Catalyst was willing to replace his peripatetic colleague Paul Willis who was nonetheless very happy to write the foreword There is a place for such skilled science communicators we need more of them and scientists at the lab bench or in the field or exploring computer models or those that have now taken a job in the policy world need to stay in touch with them Some might say that the title Science under siege seems a bit extreme but we invite you to examine the evidence as presented in this book What follows is an edited version of the introductory material that advertised the forum The title looks dramatic but if you ask yourself is anything killing the science in your area of interest you might be surprised that you come up with a point or two Then ask a wider set of questions such as are there any pressures that preclude people from doing good zoology do either political budgetary constraints impact on your field is science in the media a subject that influences the outcome of your work are there economic impediments to careers in zoology is the education mix in Australia right for this new century are the best researchers becoming full time administrators or the converse the poor researchers becoming the administrators can you place the Australian situation in an international context are there reduced opportunities for human interactions with the natural world is the virtual world killing reality and what are your predictions of the future To deal with such issues the Royal Zoological Society of NSW has structured the day to emphasize a range of themes beginning with identifying the issues including those that are persistent and those that are emerging and encompassing palpable hits to science Direct and indirect hits to science include such matters as the withdrawal of funding subversion of science death by 1000 cuts redirection of funding to fashion issues and using the name of science to justify things that are really not justifiable The name of science is being dragged down We need to confront the ever present problem of ignoring the scientifically accurate for the politically correct This raises such questions as to whether basic skills in biology are not being acquired because of public concern based on extreme animal rights propaganda Good science is not optional but what can be done if you are under siege The answers include understanding the philosophy of science the legal perspective and asking what scientists are or should be doing Audience participation will be a central part of this forum The plenary sessions will address questions raised by the speakers and the posters and debate issues and consider options for future directions It is widely known that it is hard to pull a major paper together on this theme but so many scientists know of at least one matter that they would like to draw to public attention So short contributions are included Listen to the speakers present some overarching themes or compelling case studies contribute to the debate on the day then examine your stance on a variety of these subjects to see whether the day changes your view of this often cryptic aspect of zoology As editors we wish to acknowledge the skills of the referees all papers were refereed by two peers and the patience of the authors for what has been a long gap between the date of the forum and this

publication By the end of 2008 the Royal Zoological Society of NSW along with everyone else was caught by the GFC Global Financial Crisis and we simply had to extend the length of the queue for publication We also reassessed our mode of publication The Council of the Society voted to publish this production as an ebook as well as a short print run for formal library deposit and other essential matters The ebook is open access to enhance the reach of the papers and the ideas At the same time the Royal Zoological Society of NSW signed a contract for a more international mode of access of the publications of the Society and papers are now available via Metapress <http://rzsnsw.metapress.com> Science remains under siege in our view and now we have been alerted to the range of issues it becomes easier to spot the small irritating closing of options that collectively amount to a denial of science and its relegation to an optional way of looking at the world During production of this book this matter became obvious on a number of fronts which led us to invite the paper by Rosie Cooney and colleagues to defend their science of kangaroo conservation and commercial harvesting from an attack on the science We also saw that this issue of science under siege needs more airing and the Royal Zoological Society of NSW is planning its forum for the end of 2012 to take up another strand of this theme by capitalizing on the lifelong insights of scientists under the rubric of grumpy scientists an ecological conscience of a nation This idea in fact derives directly from the suggestions in the plenary sessions by Nick Holmes and Charley Krebs We are also concerned for young scientists with science under siege manifesting often in a failure to create permanent careers for science graduates that advance science itself and zoology in particular from flourishing and identifying problems and finding solutions If we want to conserve the native fauna of Australia then Australian zoologists will have to be key team members We contend that to put science under siege and zoology under threat we not only further imperil our native wildlife but also the careers of the small band of specialists that can see the issues find the problems implement solutions and evaluate the outcomes In short science under siege is not a light matter and no one in this forum thought so Read on form an opinion and speak up and publish your thoughts your examples and your solutions
