Syrian Refugee Children in the Middle East and Europe Michelle Pace, Somdeep Sen, 2018-04-09. Since the start of the conflict in Syria in 2011, Syrian refugee children have withstood violence, uncertainty, fear, trauma, and loss. This book follows their journeys by bringing together scholars and practitioners to reflect on how to make their situation better and to get this knowledge to as many front liners across European and neighbouring countries in the Middle East as possible. The book is premised on the underlying conception of refugee children as not merely a vulnerable contingent of the displaced Syrian population but one that possesses a certain agency for change and progress. In this vein, the various contributions aim to not just de-securitize the conversation on migration that frequently centres on the presumed insecurity that refugees personify. They also de-securitize the figure and image of the refugee. Through the stories of the youngest and most vulnerable, they demonstrate that refugee children are not mere opaque figures on whom we project our insecurities. Instead, they embody potentials and opportunities for progress that we need to nurture as young refugees find themselves compelled to both negotiate the practical realities of a life in exile and situate themselves in changing and unfamiliar sociocultural contexts. Drawing on extensive field research, this edited volume points in the direction of a new rights-based framework which will safeguard the future of these children and their well-being. Offering a comparative lens between approaches to tackling refugees in the Middle East and Europe, this book will appeal to students and scholars of refugees and migration studies, human rights, as well as anyone with an interest in the Middle East or Europe. **Integrated Life-Cycle and Risk Assessment for Industrial Processes and Products** Guido Sonnemann, Michael Tsang, Marta Schuhmacher, 2018-10-10. Life cycle assessment is a methodology used to evaluate the environmental impacts of a product, process, or service during its life cycle, and risk assessment is a tool to evaluate potential hazards to human health and the environment introduced by

pollutant emissions The United Nations Sustainable Development Goals call for among other objectives responsible consumption and production by decoupling environmental resource use and environmental impacts from economic growth and human well being Life cycle assessment and risk assessment are both analytical system approaches that allow scientists and other decision makers to address these issues and objectives according to the current understanding of environmental mechanisms This book is the first attempt to illustrate the existing interfaces between life cycle assessment and risk assessment and to indicate options for further integration of both tools The second edition Focuses on sustainability Considers new developments in life cycle assessment and environmental risk assessment over the last ten years at the international level Introduces broader concepts and discussions on integrative versus the complementary use of life cycle and risk assessments Extends the scope of integrated life cycle and risk assessments to critical raw materials Includes more case studies and discusses engineered nanomaterials Featuring contributions from leading experts Integrated Life Cycle and Risk Assessment for Industrial Processes and Products is a great reference for graduate students and professionals in environmental management and intends to catalyze communication between life cycle assessment and risk assessment experts and scientists in academia industry and governmental agencies The practical format of the book illustrated with flowcharts examples exercises and concrete applications makes it a useful manual for analyzing situations and making decisions
