Towards an embodied science of intersubjectivity: Widening the scope of social understanding research Ezequiel Di Paolo, Hanne De Jaegher, 2015-06-16 An important amount of research effort in psychology and neuroscience over the past decades has focused on the problem of social cognition This problem is understood as how we figure out other minds relying only on indirect manifestations of other people s intentional states which are assumed to be hidden private and internal Research on

this question has mostly investigated how individual cognitive mechanisms achieve this task A shift in the internalist assumptions regarding intentional states has expanded the research focus with hypotheses that explore the role of interactive phenomena and interpersonal histories and their implications for understanding individual cognitive processes This interactive expansion of the conceptual and methodological toolkit for investigating social cognition we now propose can be followed by an expansion into wider and deeply related research questions beyond but including that of social cognition narrowly construed Our social lives are populated by different kinds of cognitive and affective phenomena that are related to but not exhausted by the question of how we figure out other minds These phenomena include acting and perceiving together verbal and non verbal engagement experiences of dis connection management of relations in a group joint meaning making intimacy trust conflict negotiation asymmetric relations material mediation of social interaction collective action contextual engagement with socio cultural norms structures and roles etc These phenomena are often characterized by a strong participation by the cognitive agent in contrast with the spectatorial stance typical of social cognition research We use the broader notion of embodied intersubjectivity to refer to this wider set of phenomena This Research Topic aims to investigate relations between these different issues to help lay strong foundations for a science of intersubjectivity the social mind writ large To contribute to this goal we encouraged contributions in psychology neuroscience psychopathology philosophy and cognitive science that address this wider scope of intersubjectivity by extending the range of explanatory factors from purely individual to interactive from observational to participatory

to the debate around the New Uganda one which confronts the often sanitised and largely depoliticised accounts of the Museveni government and its proponents Harnessing a wealth of empirical materials the contributors offer a critical multi disciplinary analysis of the unprecedented political socio economic cultural and ecological transformations brought about by neoliberal capitalist restructuring since the 1980s The result is the most comprehensive collective study to date of a neoliberal market society in contemporary Africa offering crucial insights for other countries in the Global South **The Value of Drawing Instruction in the Visual Arts and Across Curricula** Seymour Simmons III,2021-03-29 By applying philosophical and historical perspectives to drawing instruction this volume demonstrates how diverse teaching methods contribute to cognitive and holistic development applicable within and beyond the visual arts Offering a new perspective on the art and science of drawing this text reveals the often unrecognized benefits that drawing can have on the human mind and thus argues for the importance of drawing instruction despite and even due to contemporary digitalization Given the predominance of visual information and digital media visual thinking in and through drawing may be an essential skill for the future As such the book counters recent declines in drawing instruction to propose five Paradigms for teaching drawing as design as seeing as experience and experiment as expression and as a visual language with exemplary curricula for pre K12 art and general education pre professional programs across the visual arts and continuing education With the aid of instructional examples this volume dispels the misconception of drawing as a talent reserved for the artistically gifted and posits it as a teachable skill that can be learned by all This text will be of primary interest to researchers scholars and doctoral students with interests in drawing theory and practice cognition in the arts positive psychology creativity theory as well as the philosophy and history of arts education Aligning with contemporary trends such as Design Thinking STEAM and Graphicacy the text will also have appeal to visual arts educators at all levels and other educators involved in arts integration

Artificial Intelligence in Pathogenic Microorganism Research Chen Li,Yu-Dong Yao,Marcin Grzegorzec,2025-05-26 Infections caused by pathogenic microorganisms including bacteria viruses fungi and other eukaryotic microbes seriously threaten human health Traditional research methods and laboratory techniques have many limitations and focus more on the identification and classification of pathogenic microorganisms In recent years technologies such as whole genome sequencing and advanced bioinformatics analysis have promoted the research of pathogenic microorganisms However with the interplay of multiple factors like global climate change ecological and environmental changes urbanization social behavior and lifestyle changes pathogenic microorganisms transmission patterns and impact scope are gradually changing There is an urgent need for multidimensional technological approaches to achieve epidemiological monitoring and evolutionary direction prediction of pathogenic microorganisms Additionally more robust data processing and analysis capabilities are required for rapid identification and diagnosis monitoring of drug

resistance development of antimicrobial drugs and vaccines and optimization of treatment plans Therefore Artificial Intelligence AI has entered our field of vision In the field of pathogenic microorganisms AI has shown tremendous potential In epidemiological research AI technology can quickly and automatically collect integrate and analyze the epidemic data of infectious diseases from different regions so as to predict the trend and scope of disease transmission and track the source of infection In the process of diagnosis and treatment of infectious diseases machine learning can not only analyze the microscopic images of pathogens but also analyze the genome sequences of multiple pathogens in a short time and predict their sensitivity or resistance to specific antibiotics greatly improving the efficiency and accuracy of diagnosis and treatment of infectious diseases In drug or vaccine development researchers can use AI models to predict efficient antigens for diseases such as HIV and influenza and thus design more effective vaccine candidates AI models can also analyze the interactions between drugs pathogens and patients in order to design the optimal dosing regimen for each patient In a word AI can help human beings better deal with infectious diseases We welcome original reviews articles and other contributions in related fields which mainly include the following aspects 1 The application of AI in the differential diagnosis of pathogenic microorganisms 2 The application of AI in the formulation of anti infection treatment plans 3 The application of AI in monitoring and predicting the prevalence of pathogenic microorganisms 4 Application of AI in the prediction and prevention of infectious diseases caused by pathogenic microorganisms 5 The application of AI in the research and development of anti infective drugs and vaccines

Interconnecting the Violences of Men Kate Seymour, Bob Pease, Sofia Strid, Jeff Hearn, 2024-11-04 This book aims to expand and enrich understandings of violences by focusing on

gendered continuities interconnections and intersections across multiple forms and manifestations of men's violence. In actively countering both the compartmentalisation of studies of violence by type and form and the tendency to conceptualise violence narrowly it aims to flesh out not delimit understandings of violence. Bringing together cross disciplinary indeed transdisciplinary perspectives this book addresses how what are often seen as specific and separate violences connect closely and intricately with wider understandings of violence how there are gendered continuities between violences and how gendered violences take many forms and manifestations and are themselves intersectional. Grounded by the recognition that violence is itself a form of inequality the contributors to this volume traverse the intersectional complexities across both experiences of violent inequality and what is seen to count as violence. The international scope of this book will be of interest to students and academics across many fields including sociology criminology psychology social work politics gender studies child and youth studies military and peace studies environmental studies and colonial studies as well as practitioners activists and policymakers engaged in violence prevention.

The SAGE Handbook of Early Childhood Policy Linda Miller, Claire Cameron, Carmen Dalli, Nancy Barbour, 2017-10-02 Recent authoritative evidence suggests that an estimated 200 million children under five fail to achieve their developmental potential due to factors including poor health and nutrition and the lack of stable high quality care. A significant number of the world's children today lack the basic rights to health development and protection. In light of such statistics early childhood services for young children have expanded around the world. The SAGE Handbook of Early Childhood Policy draws critical attention to policy in Early Childhood Education and Care (ECEC) its relationship to service provision and its impact on the lives of children and families. The perspectives of leading academics and researchers from Europe North America South America Africa Australasia and Asia have been arranged around five key themes: Part 1 The Relationship Between Research Policy And Practice Country Case Studies Part 2 Equitable Early Childhood Services Intervention to Improve Children's Life Chances Part 3 Extending Practice The Role of Early Childhood Services In Family Support Part 4 Participation Rights and Diversity Part 5 Future Directions for Early Childhood Policy. This handbook is essential reading for practitioners stakeholders and others committed to working within early years services to achieve an awareness of policy and its implications for services and practice.
