Ontos and the US Army's M56 Scorpion were both intended to be fast light air droppable tank killers for the Cold War
battlefield an answer to the cumbersome and ineffective World War II vintage tanks that had taken to the battlefield during
the Korean War Although they shared the aim of bringing light mobile and lethal antitank firepower to the infantry the two
vehicles varied wildly in design to cater for their unique mission demands They first saw service in the Lebanon intervention
of 1958 but it was in the Vietnam War that they made their name with the M50 Ontos seeing intense combat action in the
Battle of Hue in 1968 Detailed illustrations and expert analysis provide the reader with a comprehensive history of these
deadly antitank vehicles from early development through to their combat history and the eventual disbandment of the Marine

and science scholarship has experienced a considerable expansion This volume explores the historical and contemporary
perspectives of the relationship between religion technology and science with a focus on South and East Asia These three
areas are not seen as monolithic entities but as discursive fields embedded in dynamic processes of cultural exchange and
transformation Bridging these arenas of knowledge and practice traditionally seen as distinct and disconnected the book
reflects on the ways of exploring the various dimensions of their interconnection Through its various chapters the collection
provides an examination of the use of modern scientific concepts in the theologies of new religious organizations and
challenges the traditional notions of space by Western scientific conceptions in the 19th century It looks at the synthesis of
ritual elements and medical treatment in China and India and at new funeral practices in Japan It discusses the intersections
between contemporary Western Buddhism modern technology and global culture and goes on to look at women s rights in
contemporary Pakistani media Using case studies grounded in carefully delineated temporal and regional frameworks
chapters are grouped in two sections one on religion and science and another on religion and technology Illustrating the
manifold perspectives and the potential for further research and discussion this book is an important contribution to the
