Digital-Enabled Intelligent Future Yiliu Paul Tu,Maomao Chi,2024-05-22 The three volume set LNBIP 515 516 517 constitutes the refereed proceedings of the 23rd Wuhan International Conference WHICEB 2024 which was held in Wuhan China in May 2024 The 109 full papers presented in these proceedings were carefully reviewed and selected from 354 submissions They focus on cutting edge research solutions and methodologies that leverage the Internet as a powerful tool for global commerce This year s theme is New Challenges and Opportunities for a Digital Enabled Intelligent Future In Search of the Virtual Class Lalita Rajasingham,John Tiffin,2002-09-11 Shirley zips into her skin tight school uniform which on the outside looks something like a ski suit The lining of the suit in fact contains cabling that makes the suit a communication system and there are pressure pads where the suit touches skin that give a sense of touch Next she sits astride something

that is a bit like a motorbike except that it has no wheels and is attached firmly to the floor Her feet fit on to something similar to a brake and accelerator and her gloved hands hold onto handlebars She shouts I m off to school Dad Her father who is taking time out from his teleworking begins to remind her that the family are going teleshopping in the virtual city later in the day but it is too late his daughter has already donned her school helmet She is no longer in the real world of her real home she is in the virtual world of her virtual school Is this the shape of the future of education This book presents a vision of what will happen to education and training as information technology develops The argument is simple To prepare people for life in an information society they need to be taught with the technology of an information society But what shape will that take Can the classroom as we know it a communications system which has been in place for four thousand years be replaced The authors argue that through the development of telecommunications for telelearning a genuine revolution in education is in the making The book describes how through the convergence of a cluster of new technologies including virtual reality artificial intelligence nanotechnology and the superhighways of telecommunications a new educational paradigm will emerge in the form of a virtual class Teachers trainers and educators who worry about how best to prepare students for life in an ever changing world will find much inspiration in this engagingly written and jargon free book New Technological Applications in the Flipped Learning Model Reyes Ruiz, Gerardo,2025-03-19 The flipped learning model evolves with the integration of new technological applications These innovations revolutionize how educators engage students and how students access and interact with learning materials Advanced digital tools transform the way content is delivered allowing for more dynamic and immersive learning experiences Adaptive learning technologies tailor instructional content to the individual needs of each student providing real time feedback and enhancing the learning process Collaborative technologies enable peer to peer interactions and project based learning fostering a deeper sense of engagement and critical thinking As these technological advancements emerge the flipped learning model becomes more flexible accessible and capable of supporting a diverse range of learning styles empowering both educators and students to achieve effective educational outcomes New Technological Applications in the Flipped Learning Model examines the integration of education technology into flipped classrooms It examines the flipped learning model its benefits challenges and best practices for accessible student learning This book covers topics such as digital technology higher education and metaverse and is a useful resource for computer engineers educators academicians researchers and scientists **Fast Families, Virtual Children** Ben Agger,Beth Anne Shelton,2016-01-20 The Internet cell phones and other technologies have changed the ways in which people conduct their family lives raise children and navigate the blurry boundary between work and home Private life is colonized by employers teachers corporations family time is taken up by work homework and shopping What it means to be parents and children has changed dramatically This book shows how the nurturance of family has increasingly become a willful radical idea in an era of pervasive technology The authors analyze important trends

including the acceleration and attenuation of childhood and offer a children's bill of rights and accompanying parental responsibilities

Womanhood and Girlhood in Twenty-First Century Middle Class Kenya Besi Brilliant Muhonja, 2017-12-29

This study of twenty first century girlhoods and womanhoods charts a new area of scholarship on Kenya. The chapters investigate questions related to how new rituals of girlhood and womanhood that materialize when religious indigenous and foreign worlds encounter each other are restructuring family and society recasting roles and informing fresh conceptualizations of African girlhood and womanhood. The author's interdisciplinary analysis and writing journeys through the different stages of girlhood and womanhood as ritualized by Kenya's 21st century middle class and teases out the implications of these peculiarities to identity re-creation and the restructuring of societies' organs and traditionally gendered institutions. Applying a critical African studies lens the arguments in this book center women as originators of action and thought without inquiring into a male other. Essentially this work disrupts patri-centered constructions and examinations of female bodies and identities. The resulting deductions inform on the substratum of Kenyan girls and women's self definitions as manifest through their experiences and ritualized practices and articulate the impact of the performances of these bodies and identities on Kenyan and global societies.

Second Life as a Virtual Playground for Language Education Julian Chen, 2022-12-27

This insightful book offers language teachers and teachers in training the opportunity to delve into 3D virtual worlds and see the benefits they provide for effective language teaching. Based on a decade of experience teaching and researching in Second Life SL Chen demystifies the dos and don'ts of SL teaching and research whilst vividly walking readers through each step of the journey. Written in an accessible jargon free and personalised tone the book is divided into three parts. Part I builds the foundation in SL research task based language teaching TBLT and understanding fundamental skills for SL teaching. Part II showcases the author's SL teaching blog that generously unveils their task based SL enabled lessons participant observations critical reflections and lessons learned from each SL session. Part III is complete with the highlights of the author's SL research and hands on resources and tips for readers. Each chapter also features a Checkpoint section to gauge reader understanding of chapter content followed by a Your Task section to promote learning by doing in SL. Teachers and curriculum designers will find the well detailed and guided lesson planning useful when starting their first SL class. Graduate students and novice researchers will also find the systematically recorded data collection helpful for their SL research.
