Remote Instrumentation and Virtual Laboratories Franco Davoli,Norbert Meyer,Roberto Pugliese,Sandro Zappatore,2010-03-10 Accessing remote instrumentation worldwide is one of the goals of e Science The task of enabling the execution of complex experiments that involve the use of distributed scientific instruments must be supported by a number of different architectural domains which inter work in a coordinated fashion to provide the necessary functionality These domains embrace the physical instruments the communication network interconnecting the distributed systems the service oriented abstractions and their middleware The Grid paradigm or more generally the Service Oriented Architecture SOA viewed as a tool for the integration of distributed resources plays a significant role not only to manage computational aspects but increasingly as an aggregator of measurement instrumentation and pervasive large scale data acquisition platforms In

this context the functionality of a SOA allows managing maintaining and exploiting heterogeneous instrumentation and acquisition devices in a unified way by providing standardized interfaces and common working environments to their users but the peculiar aspects of dealing with real instruments of widely different categories may add new functional requirements to this scenario On the other hand the growing transport capacity of core and access networks allows data transfer at unprecedented speed but new challenges arise from wireless access wireless sensor networks and the traversal of heterogeneous network domains The book focuses on all aspects related to the effective exploitation of remote instrumentation and to the building complex virtual laboratories on top of real devices and infrastructures These include SOA and related middleware high speed networking in support of Grid applications wireless Grids for acquisition devices and sensor networks Quality of Service QoS provisioning for real time control measurement instrumentation and methodology as well as metrology issues in distributed systems   Microelectronics, Electromagnetics and Telecommunications Jaume Anguera,Suresh Chandra Satapathy,Vikrant Bhateja,K.V.N. Sunitha,2018-01-25 The volume contains 94 best selected research papers presented at the Third International Conference on Micro Electronics Electromagnetics and Telecommunications ICMEET 2017 The conference was held during 09 10 September 2017 at Department of Electronics and Communication Engineering BVRIT Hyderabad College of Engineering for Women Hyderabad Telangana India The volume includes original and application based research papers on microelectronics electromagnetics telecommunications wireless communications signal speech video processing and embedded systems   *LabVIEW* Rick Bitter,Taqi Mohiuddin,Matt Nawrocki,2000-08-10 The graphical nature of LabVIEW makes it ideal for test and measurement applications and its use brings significant improvements in productivity over conventional programming languages However comprehensive treatments of the more advanced topics have been scattered and difficult to find until now LabVIEW Advanced Programming Techniques of   **Data Acquisition Techniques Using PCs** Howard Austerlitz,2002-12-04 The second edition of this highly successful text focuses on the major changes that have taken place in this field in recent times Data Acquisition Techniques Using PCs Second Edition recognises that data acquisition is the core of most engineering and many life science systems in measurement and instrumentation It will prove invaluable to scientists engineers students and technicians wishing to keep up with the latest technological developments Teaches the reader how to set up a PC based system that measures analyzes and controls experiments and processes through detailed design examples Geared for beginning and advanced users with many tutorials for less experienced readers and detailed standards references for more experienced readers Fully revised new edition discusses latest programming languages and includes a list of over 80 product manufacurers to save valuable time   Virtual Bio-Instrumentation Jon B.
