Active Learning: Theoretical Perspectives, Empirical Studies and Design Profiles Robert Cassidy, Elizabeth S. Charles, James D. Slotta, Nathaniel Lasry, 2019-07-11 This book represents the emerging efforts of a growing international network of researchers and practitioners to promote the development and uptake of evidence based pedagogies in higher education at something a level approaching large scale impact By offering a communication venue that attracts and enhances much needed partnerships among practitioners and researchers in pedagogical innovation we aim to change the conversation and focus on how we work and learn together i e extending the implementation and knowledge of co design methods In this first edition of our Research Topic on Active Learning we highlight two of the three types of publications we wish to promote First are studies aimed at understanding the pedagogical designs developed by practitioners in their own practices by bringing to bear the theoretical lenses developed and tested in the education research community These types of studies constitute the

practice pull that we see as a necessary counterbalance to knowledge push in a more productive pedagogical innovation ecosystem based on research practitioner partnerships Second are studies empirically examining the implementations of evidence based designs in naturalistic settings and under naturalistic conditions Interestingly the teams conducting these studies are already exemplars of partnerships between researchers and practitioners who are uniquely positioned as in between straddling the two worlds As a result these publications represent both the rigours of research and the pragmatism of reflective practice In forthcoming editions we will add to this collection a third type of publication design profiles These will present practitioner developed pedagogical designs at varying levels of abstraction to be held to scrutiny amongst practitioners instructional designers and researchers alike We hope by bringing these types of studies together in an open access format that we may contribute to the development of new forms of practitioner researcher interactions that promote co design in pedagogical innovation

Central Banks, Democratic States and Financial Power Jocelyn Pixley,2018-10-11 When the Federal Reserve European Central Bank and Bank of England purchased bank and state debt during the 2007 2008 crisis it became apparent that when technically divorced from fiscal policy monetary policy cannot revive but only prevent economic activity deteriorating further Pixley explains how conflicting social forces shape the diverse complex relations of central banks to the money production of democracies and the immense money creation by capitalist banking Central banks are never politically neutral and despite unfair demands are unable to prevent collapses to debt deflation or credit asset inflation They can produce debilitating depressions but not the recoveries desired in democracies and unwanted by capitalist banks or war finance logics Drawing on economic sociology and economic histories this book will appeal to informed readers interested in studying democracies banks and central banking s ambivalent positions via comparative and distributive perspectives
