Ezechukwu,2023-03-17 Mobile technology offers an innovative and cost effective channel for delivering a range of financial services including mobile payments In some jurisdictions mobile payments simply provide a convenient option for facilitating payment transactions In other jurisdictions mobile payments are viewed as potentially transformative because they present an opportunity to expand access to financial services However as with other innovations mobile payments raise consumer protection concerns and require robust regulatory mechanisms to address such concerns Against this backdrop the book adopts a typology of consumer policy tools which can be used to address the identified consumer concerns This typology guides the enquiry into the existing consumer protection frameworks applying to mobile payments in selected jurisdictions Canada Kenya and the United Kingdom The main objective of this endeavour is to identify best practices that national authorities seeking to leverage mobile payments and similar innovations can emulate This book will be of interest to policymakers regulators industry stakeholders students and scholars interested in the regulation of innovative financial services particularly from a consumer protection perspective **Economic Evaluation in Education** Henry M.

Levin,Patrick J. McEwan,Clive Belfield,A. Brooks Bowden,Robert Shand,2017-06-15 The past decade has seen increased attention to cost effectiveness and benefit cost analysis in education as administrators are being asked to accomplish more with the same or even fewer resources philanthropists are keen to calculate their return on investment in social programs and the general public is increasingly scrutinizing how resources are allocated to schools and colleges This text titled Cost Effectiveness Analysis in its previous editions is the only full length book to provide readers with the step by step methods they need to plan and implement a benefit cost analysis in education The authors examine a range of issues including how to identify measure and distribute costs how to measure effectiveness utility and benefits and how to incorporate cost evaluations into the decision making process The updates to the Third Edition reflect the considerable methodological development in the evaluation literature and the greater empiricism practiced by education researchers to help readers learn to apply more advanced methods to their own analyses SAGE congratulates author Henry M Levin winner of the 2017 AERA

**What Is Enlightenment?** Mohammed D. Cherkaoui,2016-04-11 Political sociology has struggled with predicting the next turn of transformation in the MENA countries after the 2011 Uprisings Arab activists did not articulate explicitly any modalities of their desired system although

their slogans ushered to a fully democratic society These unguided Uprisings showcase an open ended freedom to question after Arabs underwent their freedom from struggle from authoritarianism The new conflicts in Egypt Syria Yemen and Libya have fragmented shar iya legitimacy into distinct conceptualizations revolutionary legitimacy electoral legitimacy legitimacy of the street and consensual legitimacy This volume examines whether the Uprisings would introduce a replica of the European Enlightenment or rather stimulate an Arab Islamic awakening with its own cultural specificity and political philosophy By placing Immanuel Kant in Tahrir Square this book adopts a comparative analysis of two enlightenment projects one Arab still under construction with possible progression toward modernity or regression toward neo authoritarianism and one European shaped by the past two centuries Mohammed D Cherkaoui and the contributing authors use a hybrid theoretical framework drawing on three tanwiri enlightenment philosophers from different eras Ibn Rushd known in the west as Averroes the twelfth century Immanuel Kant the eighteenth century and Mohamed Abed Al Jabri the twentieth century The authors propose a few projections about the outcome of the competition between an Islamocracy vision and what Cherkaoui terms as a Demoslamic vision since it implies the Islamist movements flexibility to reconcile their religious absolutism with the prerequisites of liberal democracy This book also traces the patterns of change which point to a possible Arab Axial Age It ends with the trials of modernity and tradition in Tunisia and an imaginary speech Kant would deliver at the Tunisian Parliament after those vibrant debates of the new constitution in 2014

energies On the one hand the goal is to achieve a decarbonization of the energy economy by reducing the use of fossil energy sources such as petroleum carbon and natural gas On the other and in response to the Fukushima nuclear accident a phase out is intended to eliminate the dangers of nuclear technologies Achieving these goals poses tremendous challenges for the two countries energy policies partly because the energy transition will not only affect energy production but also energy consumption From a Law and Economics perspective a number of questions arise to what extent is it justifiable to rely on markets and continued technological innovation especially with regard to the present exploitation of scarce resources To what extent is it necessary for states to intervene in energy markets Regulatory instruments are available to create and maintain more sustainable societies command and control regulations restraints Pigovian taxes emission certificates nudging policies and more If regulation in a certain legal field is necessary which policies and methods will most effectively spur the sustainable consumption and production of energy in order to protect the environment while mitigating any potential negative impacts on economic development Do neoclassical and behavioural economics provide us with a suitable framework for predicting the market s complex reactions to a changing energy policy This book provides theoretical insights as well as empirical findings in order to answer these vital questions
