Biological terms: Interphase, Anaphase, Metaphase, Telophase, Collenchyma, phloem, Sclerenchyma, Parenchyma, cuticula, Transpirations, stomata, neuron, organic compound, connective tissue, chromatin, chromosome, foramen magnum, axial skeleton, cranium	
Chemistry of life	Cells
Difference between organic and inorganic compounds	Difference between animal cell and plant cell
Examples of organic and inorganic compounds	All the cell organelles and functions/rolls
Monomers of all organic compound	Describe the build of the nucleus, mitochondria, and chloroplast
Elements of all the organic compounds	Investigation: Osmose and diffusion (Look at the apparatus that we use and how to set up this Investigation)
Vitamins A, B, C, D, and E, and there deficiency diseases they can cause	Explain osmose and diffusion
Enzymes	
- Lock and key model	
- Function of enzymes	
Influence of temperature and pH on enzyme action	
Mitosis	Plant tissue
All the phases can identify and give reasons for your answers	Build and function of: Collenchyma, Sclerenchyma, Parenchyma, Phloem, Xylem and stomata
Product of Mitosis	Definition of tissue
Difference between telophase in plant cells and animal cells	
Biological importance of Mitosis	
Cancer: - Uncontrolled cell division and growth: Causes and treatment of cancer	
	Function and build of: Stomata, Xylem, and root hair
	Adaptions of Xylem for movement of water upwards
Animal tissue	Plant organs
Name and identify all the animal tissues and where in the human body are they located.	The labels and functions of the dorsiventral leaf.
	Adaptions of the different parts of the leaf
Functions of all the animal tissues	Definition of an organ
Name all the connective tissues	
Support and transport in plants	Support in animals
Labels of dicotyledonous stem and root	All the labels of the skeleton
Difference between a dicotyledons root and stem	Where do we find long bones in the skeleton
	Function of the skeleton
Investigation: The rate of transpirations (Potometer)	
The effect of environmental factors on transpiration (Wind, Temperature and Light.)

Scope Of Life Science November 2014:

Towards an embodied science of intersubjectivity: Widening the scope of social understanding research

Ezequiel Di Paolo, Hanne De Jaegher, 2015-06-16 An important amount of research effort in psychology and neuroscience over the past decades has focused on the problem of social cognition. This problem is understood as how we figure out other minds relying only on indirect manifestations of other people's intentional states which are assumed to be hidden, private and internal. Research on this question has mostly investigated how individual cognitive mechanisms achieve this task. A shift in the internalist assumptions regarding intentional states has expanded the research focus with hypotheses that explore the role of interactive phenomena and interpersonal histories and their implications for understanding individual cognitive processes. This interactive expansion of the conceptual and methodological toolkit for investigating social cognition we now propose can be followed by an expansion into wider and deeply related research questions beyond but including that of social cognition narrowly construed. Our social lives are populated by different kinds of cognitive and affective phenomena that are related to but not exhausted by the question of how we figure out other minds. These phenomena include acting and perceiving together, verbal and non-verbal engagement, experiences of disconnection, management of relations in a group, joint meaning making, intimacy, trust, conflict, negotiation, asymmetric relations, material mediation of social interaction, collective action, contextual engagement with socio-cultural norms, structures and roles etc. These phenomena are often characterized by a strong participation by the cognitive agent in contrast with the spectatorial stance typical of social cognition research. We use the broader notion of embodied intersubjectivity to refer to this wider set of phenomena. This Research Topic aims to investigate relations between these different issues to help lay strong foundations for a science of intersubjectivity, the social mind writ large. To contribute to this goal we encouraged contributions in psychology, neuroscience, psychopathology, philosophy and cognitive science that address this wider scope of intersubjectivity by extending the range of explanatory factors from purely individual to interactive, from observational to participatory. Power and Energy Richard Kong, 2015-05-06 Power and Energy contains 86 selected papers from the International Conference on Power and Energy CPE 2014 Shanghai China 29-30 November 2014 and presents a wide range of topics: Energy management, planning and policy making, Energy technologies and environment, Energy prospects, Conventional and renewable power generation, Power system man. **Learning Under the Lens** Annemaree Carroll, Ross Cunnington, Annita Nugent, 2020-12-01 Learning Under the Lens: Applying Findings from the Science of Learning to the Classroom highlights the innovative approach being undertaken by researchers from the disparate fields of neuroscience, education and psychology working together to gain a better understanding of how we learn and its potential to impact student learning outcomes. The book is structured in four parts: Science of learning, a policy perspective sets the scene for this emerging field of research, Self-regulation of learning and Technology and learning feature findings by eminent international and national researchers in the

field and provides an insight into some of the innovative research illustrating the depth breadth and multi disciplinarity of the research and Research translation focuses on the scaled up implementation of research findings in authentic learning settings and showcases research findings which are having impact in learning environments This fascinating book is intended as a reference tool to create awareness among researchers policy makers and education practitioners of the research being undertaken in the science of learning field and its potential to impact student learning outcomes **The Routledge**

Companion to European Business Gabriele Suder, Monica Riviere, Johan Lindeque, 2018-07-18 International Business is a well established research field in which regionalisation has gained prominence in the last decade Because Europe is a market that shows specific patterns of highly advanced market integration European Business is a subject in its own right and with its own research momentum In particular firms view Europe as a challenging mostly yet not entirely mature market location that is subject to complexities that help reveal strategic corporate strengths and weaknesses Europe represents a location that undergoes frequent and rapid change due to its geo economic and geopolitical position This comprehensive reference volume brings together a global team of contributors to analyze and overview the key issues themes and phenomena that affect business in Europe With interdisciplinary perspectives from key disciplines the book covers a range of vital themes such as culture entrepreneurship identity human rights and climate change The selection of authors reflects the international scope of this book and is drawn from institutions located in 17 countries across Europe A unique resource this book covers a region undergoing significant geoeconomic and geopolitical change and provides a comprehensive guide to research students and scholars of business and the social sciences **Art and Future** Peter Stupples, Jane Venis, 2018-04-18 This

selection of essays examines the future of art in a changing world In particular contributors discuss the agency of art in conditions of ecological threats to the natural world to climate change and the effects of globalisation neoliberal economics and mass tourism Following the lead of Chicago based Frances Whitehead whose essay is a key text some contributors take positions on working with local government agencies to embed art thinking within development projects going back to the art thinking at the centre of Kazimir Malevich's work in Vitebsk one hundred years ago in Russia Other papers highlight small scale art interventions that bring ecological issues to public notice and suggest positive responses whilst others discuss large scale problems brought about by the social economic and laissez faire history of the emerging Anthropocene with possible dystopic outcomes **Handbook of Theory and Practice of Sustainable Development in Higher Education** Walter

Leal Filho, Constantina Skanavis, Arminda do Paço, Judy Rogers, Olga Kuznetsova, Paula Castro, 2016-11-23 This Handbook approaches sustainable development in higher education from an integrated perspective addressing the dearth of publications on the subject It offers a unique overview of what universities around the world are doing to implement sustainable development i.e. via curriculum innovation research activities or practical projects and how their efforts relate to education for sustainable development at the university level The Handbook gathers a wealth of information ideas best

practices and lessons learned in the context of executing concrete projects and assesses methodological approaches to integrating the topic of sustainable development in university curricula Lastly it documents and disseminates the veritable treasure trove of practical experience currently available on sustainability in higher education Religious Perspectives on Social Responsibility in Health Joseph Tham,Chris Durante,Alberto García Gómez,2018-04-26 This book discuss the meaning and implications of the social and ethical implications of the notion of social responsibility in healthcare in six major world religions Buddhism Christianity Confucianism Hinduism Islam Judaism This collection of papers is based on a four day workshop where bioethics experts from various religious traditions gathered They discussed the ways in which their respective traditions could or could not uphold the tenets of Article 14 of UNESCO s Universal Declaration of bioethics and Human Rights The different papers presented in this book are based on this interchange of ideas at the workshop The book explores the potential points of convergence among the various perspectives presented as well as a discussion on the ways in which their moral differences may be managed The managing of these moral differences through international socio ethical mechanisms contributes significantly to the UNESCO Universal Declaration of Bioethics and Human Rights goal of simultaneously respecting religio cultural pluralism while upholding a commitment to human rights Dual-use life science research and biosecurity in the 21st Century: Social, Technical, Policy, and Ethical Challenges Jonathan E. inhabit the human body and are collectively referred to as the human microbiome. Until recently the role of the human microbiome in maintaining human health was not fully appreciated. Today however research is beginning to elucidate associations between perturbations in the human microbiome and human disease and the factors that might be responsible for the perturbations. Studies have indicated that the human microbiome could be affected by environmental chemicals or could modulate exposure to environmental chemicals. Environmental Chemicals the Human Microbiome and Health Risk presents a research strategy to improve our understanding of the interactions between environmental chemicals and the human microbiome and the implications of those interactions for human health risk. This report identifies barriers to such research and opportunities for collaboration highlights key aspects of the human microbiome and its relation to health describes potential interactions between environmental chemicals and the human microbiome reviews the risk assessment framework and reasons for incorporating chemical microbiome interactions.

Preventing Environmental Damage from Products Eléonore Maitre-Ekern, Carl Dalhammar, Hans Christian Bugge, 2018-04-19 How to tackle environmental damage from the throwaway society is one of the defining questions of the twenty first century. By establishing a circular economy we can encourage and support sustainable production and consumption. These essays by an international group of leading scholars from a range of disciplines analyse policies and legal instruments and challenge mainstream assumptions from the choice of a policy mix to the actual effect of imposing standards on the market and from corporate objectives and priorities to the use of precaution in assessing particularly harmful substances. Each chapter contributes to a better understanding of the current policy and regulatory framework in Europe and identifies the challenges and opportunities ahead. The book breaks new ground by examining how product policies can contribute to important objectives and visions such as the aims of the circular economy. It is a must read for researchers as well as for policymakers and practitioners.

Healing Roots Julie Laplante, 2015-02-01 Umhlonyane also known as Artemisia afra is one of the oldest and best documented indigenous medicines in South Africa. This bush which grows wild throughout the sub Saharan region smells and tastes like medicine thus easily making its way into people's lives and becoming the choice of everyday healing for Xhosa healer diviners and Rastafarian herbalists. This natural remedy has recently sparked curiosity as scientists search for new molecules against a tuberculosis pandemic while hoping to recognize indigenous medicine. Laplante follows umhlonyane on its trails and trials of becoming a biopharmaceutical from the open air to controlled environments learning from the plant and from the people who use it with hopes in healing.
