## CHAPTER ONE LINEAR MOTION

### Introduction:

Study of motion is divided into two:

1. Kinematics
2. Dynamics

In kinematics forces causing motion are disregarded while dynamics deals with motion of objects and the forces causing them.

### A. Displacement

Distance covered by a body in a specified direction is called displacement. It is denoted by letter 's' and has both magnitude and direction. Distance is the movement from one point to another. The SI unit for displacement is the metre (m).

### B. Speed

This is the distance covered per unit time.

Speed = distance covered/ time taken. Distance is a scalar quantity since it has magnitude only. The SI unit for speed is metres per second (m/s or ms<sup>-1</sup>).

Average speed = total distance covered/total time taken

Other units for speed used are km/h.

Examples

1. A body covers a distance of 20m in 4 seconds, it rests for 10 seconds and finally covers a distance of 50m in 10 seconds. Calculate the average speed.

Solution

Total distance covered = 20 + 50 = 70m

Total time taken = 4 + 10 + 10 = 24 seconds

Therefore average speed = 70/24 = 2.9m/s

2. Calculate the distance in metres covered by a body moving with a uniform speed of 100 km/h in 20 seconds.

Solution

Distance covered = speed × time

$$= 100 \times \frac{20}{3600} = 0.555 \text{ km}$$

$$= 555 \text{ m}$$

$$= 0.555 \text{ km}$$

3. Calculate the time in seconds taken a body moving with a uniform speed of 100 km/h to cover a distance of 2.000 km?

Solution

Speed: 100 km/h =  $100 \times \frac{1000}{3600} = 27.78 \text{ m/s}$

Time = distance/speed

$$= \frac{2000}{27.78} = 72 \text{ s}$$

$$= 72 \text{ s}$$

### C. Velocity

This is the change of displacement per unit time. It is a vector quantity.

Velocity = change in displacement/total time taken

The SI unit for velocity is m/s

**Color Vision Sensation and Perception** Marcelo Fernandes Costa, 2016-09-15 Color vision is considered a microcosm of the visual science. Special physiological and psychological processes make this scientific topic an intriguing and complex research field that can aggregate around molecular biologists, neurophysiologists, physicists, psychophysicists, and cognitive neuroscientists. Our purpose is to present the frontier knowledge of this area of visual science, showing in the end the future prospects of application and basic studies of color perception. *Geological Carbon Storage* Stéphanie Vialle, Jonathan Ajo-Franklin, J. William Carey, 2018-11-12 Geological Carbon Storage: Subsurface Seals and Caprock Integrity. Seals and caprocks are an essential component of subsurface hydrogeological systems, guiding the movement and entrapment of hydrocarbon and other fluids. Geological Carbon Storage: Subsurface Seals and Caprock Integrity offers a survey of the wealth of recent scientific work on caprock integrity, with a focus on the geological controls of permanent and safe carbon dioxide storage and the commercial deployment of geological carbon storage. Volume highlights include: Low permeability rock characterization from the pore scale to the core scale; Flow and transport properties of low permeability rocks; Fundamentals of fracture generation, self-healing, and permeability; Coupled geochemical transport and geomechanical processes in caprock; Analysis of caprock behavior from natural analogues; Geochemical and geophysical monitoring techniques of caprock failure and integrity; Potential environmental impacts of carbon dioxide migration on groundwater resources; Carbon dioxide leakage mitigation and remediation techniques. Geological Carbon Storage: Subsurface Seals and Caprock Integrity is an invaluable resource for geoscientists from academic and research institutions with interests in energy and environment-related problems, as well as professionals in the field.

**Handbook of Differential Equations** Daniel Zwillinger, Vladimir Dobrushkin, 2021-12-30 Through the previous three editions, Handbook of Differential Equations has proven an invaluable reference for anyone working within the field of mathematics, including academics, students, scientists, and professional engineers. The book is a compilation of methods for solving and approximating differential equations. These include the most widely applicable methods for solving and approximating differential equations, as well as numerous methods. Topics include methods for ordinary differential equations, partial differential equations, stochastic differential equations, and systems of such equations. Included for nearly every method are the types of equations to which the method is

Goldenberg,2021-03-09 The public has voiced concern over the adverse effects of vaccines from the moment Dr Edward Jenner introduced the first smallpox vaccine in 1796 The controversy over childhood immunization intensified in 1998 when Dr Andrew Wakefield linked the MMR vaccine to autism Although Wakefield s findings were later discredited and retracted and medical and scientific evidence suggests routine immunizations have significantly reduced life threatening conditions like measles whooping cough and polio vaccine refusal and vaccine preventable outbreaks are on the rise This book explores vaccine hesitancy and refusal among parents in the industrialized North Although biomedical public health and popular science literature has focused on a scientifically ignorant public the real problem Maya J Goldenberg argues lies not in misunderstanding but in mistrust Public confidence in scientific institutions and government bodies has been shaken by fraud research scandals and misconduct Her book reveals how vaccine studies sponsored by the pharmaceutical industry compelling rhetorics from the anti vaccine movement and the spread of populist knowledge on social media have all contributed to a public mistrust of the scientific consensus Importantly it also emphasizes how historical and current discrimination in health care against marginalized communities continues to shape public perception of institutional trustworthiness Goldenberg ultimately reframes vaccine hesitancy as a crisis of public trust rather than a war on science arguing that having good scientific support of vaccine efficacy and safety is not enough In a fraught communications landscape Vaccine Hesitancy advocates for trust building measures that focus on relationships transparency and justice     **Military Nuclear Accidents** Jean-Claude Amiard,2018-11-26 The use of atomic energy for military purposes has given rise to a variety of nuclear accidents from the outset This applies to all levels of use from the manufacture of weapons to their commissioning This book provides an overview of the potential impact of such accidents The prospective consequences of local and global nuclear war are detailed Similarly for each accident the environmental ecological health and socio economic consequences are reviewed The contamination of the environment and its fauna and flora is detailed and the effects of ionizing radiation are reported The same is provided for human populations and the adverse effects on the health and physical and mental states of the populations concerned The economic cost of accidents is also evaluated The research presented in this book is based on scientifically recognized publications and reports from the military forces of the various countries concerned and from the national and international organizations competent in this field IAEA WHO UNSCEAR IRSN ICPR etc     **Big Science, Innovation, and Societal Contributions** Shantha Liyanage,Markus Nordberg,Marilena Streit-Bianchi,2024-03-12 Big Science Innovation and Societal Contributions offers a connection between Big Science and its societal impacts from a

**The Dynamics of Science** Grant Ramsey,Andreas De Block,2022-11-22 Millions of scientific articles are published each year making it difficult to stay abreast of advances within even the smallest subdisciplines Traditional approaches to the study of science such as the history and philosophy of science involve closely reading a relatively small set of journal articles And yet many questions benefit from casting a wider net Is most scientific change gradual or revolutionary What are the key sources of scientific novelty Over the past several decades a massive effort to digitize the academic literature and equip computers with algorithms that can distantly read and analyze a digital database has taken us one step closer to answering these questions The Dynamics of Science brings together a diverse array of contributors to examine the largely unexplored computational frontiers of history and philosophy of science Together they reveal how tools and data from automated textual analysis or machine reading combined with methods and models from game theory and cultural evolutionary theory can begin to answer fundamental questions about the nature and history of science

**Disrupt Science** Mihai Nadin,2023-11-18 Reaction to breakdowns is more expensive by many orders of magnitude than prevention This again became clear during the COVID 19 pandemic and is evinced in the sustainability crisis The dynamics of living matter transcends deterministic reaction

Embodied in machines determinism empowered the human being providing the path to prosperity However in conjunction with reductionism it does away with complexity in which life is couched The living is by necessity anticipatory Awareness of the future means preserving life not in reaction to but in anticipation of change Living entities from the simplest bacteria to plants and insects to human beings are adaptive goal oriented and capable of self healing Anticipatory actions are expressed through non deterministic processes that unfold in concert with reactions They engage the wholeness of life including its interactions with the environment Awareness of consequences together with memory of the past informs actions that reflect the creative nature of human beings Redefining science and implicitly medicine is not a negation of its past but rather an affirmation of trust in explaining life s capacity to renew itself As opposed to increasingly expensive medicine as a practice of repair to prevent and to heal is to make life sustainable The moment of truth can no longer be postponed At stake is the future of humankind and even of life on planet Earth Reductionist determinism informs the obsession with progress at any cost Awareness of the fact that the human condition transcends that of the matter in which it is embodied explains and indeed justifies the call to Disrupt Science in its current state The age of the digital machine in particular of artificial intelligence is one of opportunities that pale when compared to its inherent risks The record of breakdowns including so called natural disasters by now global in scale is part of the empirical premise for the call for completing the Cartesian Revolution A Second Revolution in Science could unleash humanity s remaking free of surrendering to want Science has the opportunity not only to measure everything life included and accumulate data and process it for its own sake but also to realize its meaning The book cover is designed by Baruch Gorkin who is celebrated internationally for exquisite typefaces and for books reflecting meaning driven design
