Fanon, iek, and the Violence of Resistance Zahi Zalloua, 2025-06-26 In a novel pairing of anti colonial theorist Frantz Fanon with Marxist Lacanian philosopher Slavoj iek Zahi Zalloua explores the ways both thinkers expose the violence of political structures This inventive exploration advances an anti racist critique describing how ontology operates in a racial matrix to produce some human bodies that count and others deemed not quite or non human that do not For Fanon and iek the violence of ontology must be met with another form of violence a revolutionary violence that delegitimizes the logic of the symbolic order and troubles its collective fantasies Whereas Fanon begins his challenge to ontology by exposing its historical linkages to Europe s destructive imperialist procedures before proceeding to stretch Marxism along with psychoanalysis to account for the crushing neo colonial situation iek premises his work on the refusal to accept the totality of ontology Because of these different points of intervention Fanon and iek together offer a powerful and multifaceted assessment of the liberal anti racist paradigm whose propensity for identity politics and aversion to class struggle silence the cry of the dispossessed and foreclose radical change Avoiding contemporary separatist temptations decoloniality and Afropessimism and breaking with a non violent sentimentalist futurology that announces more of the same Fanon and iek point in a different direction one that eschews identitarian thought in favor of a collective struggle for freedom and equality

Neuroinflammation and Behaviour Luba Sominsky, Adam K. Walker, Deborah M. Hodgson, 2015-07-21 The brain and immune system are involved in an intricate network of bidirectional communication This relationship is vital for optimal physiological and psychological development and functioning but can also result in unwanted outcomes In particular this interaction plays an important role in cognition mood and behaviour Neuroinflammation is known to contribute to neurological and affective disorders including impaired learning and memory depressive anxiety and schizoaffective symptoms as well as pain The development of these conditions often occurs on the backdrop of pre existing physical illnesses which give rise to increased activation of the immune system such as cancer obesity infection and autoimmune disorders Similarly psychological states can alter regulation of the immune system This has been most extensively studied in the context of stress and immune function Understanding the underlying mechanisms that lead to the onset of inflammation induced neuropathology and stress induced immune suppression will contribute to the development of novel and effective treatment strategies for both the disease and its neurological side effects In this research topic we explored the relationship between the immune system and the brain throughout life We include both original research and review papers from animal clinical and molecular perspectives

Syrian Refugee Children in the Middle East and Europe Michelle Pace, Somdeep Sen, 2018-04-09 Since the start of the conflict in Syria in 2011 Syrian refugee children have withstood violence uncertainty fear trauma and loss This book follows their journeys by bringing together scholars and practitioners to reflect on how to make their situation better and to get this knowledge to as many front liners across European and neighbouring countries in the Middle East as possible The book is premised on the underlying conception of refugee children as not merely a vulnerable contingent of the displaced Syrian population but one that possesses a certain agency for change and progress In this vein the various contributions aim to not just de securitize the conversation on migration that frequently centres on the presumed insecurity that refugees personify They also de securitize the figure and image of the refugee Through the stories of the youngest and most vulnerable they demonstrate that refugee children are not mere opaque figures on who we project our insecurities Instead they embody potentials and opportunities for progress that we need to nurture as young refugees find themselves compelled to both negotiate the practical realities of a life in exile and situate themselves in changing and unfamiliar sociocultural contexts Drawing on extensive field research this edited volume points in the direction of a new rights based framework which will safeguard the future of these children and their well being Offering a comparative lens between approaches to tackling

refugees in the Middle East and Europe this book will appeal to students and scholars of refugees and migration studies human rights as well as anyone with an interest in the Middle East or Europe
