Gokten, 2017-09-20 We have spent a great deal of time on the continued development of accounting and auditing standards which are used as a primary component of corporate reporting to reach today's financial reporting framework However is it possible to say that currently financial statements provide full and prompt disclosure Or will they still be useful as a primary element with their current structures in corporate reporting Undoubtedly we are deeply concerned about these issues in recent times This volume contains chapters to discuss the today's and tomorrow's accounting and corporate reporting phenomena in a comprehensive and multidimensional way Therefore this book is organized into six sections Achieving Sustainability through Corporate Reporting International Standardization Financial Reporting Quality Accounting Profession and Behavioral Aspects Public Sector Accounting and Reporting and Managerial Accounting *Corporations, Accounting, Securities Laws, and the Extinction of Capitalism* Wm. Dennis Huber, 2022-07-18 Ever since Marx the future of capitalism has been fiercely debated Marx and his followers predicted capitalism will end by violent overthrow while others prophesied its demise will be the result of collapsing under its own weight Still others argue that capitalism will not only continue to exist but continue to expand globally This book takes a distinctively different approach by presenting solid evidence that capitalism has already ended The author argues that corporate statutory law securities laws and generally accepted accounting principles have combined to cause the extinction of capitalists Without capitalists as owners of capital there can be no capitalism The book examines the factors that converged to contribute to and hasten the extinction of capitalists and thus of capitalism as an economic system in an ironic case of the law of unintended consequences The very things that were intended to promote protect and sustain capitalism are the things that caused its death It exposes the fallacy that capitalism as an economic system not only continues to exist but is expanding globally Capitalism is extinct and the social system constructed on capitalism as an economic system cannot be sustained This book will appeal to economists accountants historians political scientists lawyers and sociologists as well as students of those disciplines *Business Challenges in the Changing Economic Landscape - Vol. 1* Mehmet Huseyin Bilgin, Hakan Danis, Ender Demir, Ugur Can, 2015-10-29 This book is the first of the two volumes featuring selected articles from the 14th Eurasia Business and Economics conference held in Barcelona Spain in October 2014 Peer reviewed articles in this first volume present latest research breakthroughs in the areas of Accounting Corporate Governance Finance and Banking Institutional and International Economics and Regional Studies The contributors are both distinguished and young scholars from different parts of the World **Perspectives, Trends, and Applications in Corporate Finance and Accounting** Zopounidis, Constantin, Christopoulos, Apostolos

G., Kalantonis, Petros, 2018-06-29 Financial analyses investments and accounting practices are continually developing and improving areas that have seen significant advancements in the past century. However, the recent bankruptcies by major banks, the debt crisis in the European Union, and the economic turmoil in several countries have caused severe downturns in financial markets and financial systems worldwide. As the world works to recover, it is important to learn from these financial crises to ensure a more secure and sustainable outlook for organizations and the global future. Perspectives, Trends, and Applications in Corporate Finance and Accounting is a crucial resource providing coverage on the stock market, public deficits, investment firms' performances, banking systems, and global economic trends. This publication highlights areas including but not limited to the relationship between the stock market and macroeconomics, earnings management, and pricing models, while also discussing previous financial crises. This book is a vital reference work for accountants, financial experts, investment firms, corporate leaders, researchers, and policy makers.

The Routledge Companion to Accounting, Reporting and Regulation Carien van Mourik, Peter Walton, 2013-10-01 Financial accounting, reporting, and regulation is a vast subject area of huge global importance, with interest rising significantly in the light of the ongoing global financial crisis. The authors begin with a broad overview of the subject of accounting, setting the stage for a discussion on the theoretical and practical issues and debates regarding financial reporting, which are expanded on in the second part of the book. This includes how to define the reporting entity, recognition and measurement of the elements of financial statements, fair values in financial reporting, and the costs and benefits of disclosure. The third part assesses the interest, need, and theories behind the accounting, reporting, and regulation industry, while parts four and five look at the institutional, social, and economic aspects, with issues such as accounting for environmental management and accounting regulation and financial reporting in Islamic countries, both issues of ever-increasing importance. This authoritative Companion presents a broad overview of the state of these disciplines today and will provide a comprehensive reference source for students and academics involved in accounting, regulation, and reporting.

Value Based Performance Measures Nils Eikermann, 2020-08-19 Nils Eikermann describes the framework conditions for the application of value-based performance measures and critically analyses selected ones. The disclosure of value-based performance indicators is important in order to demonstrate the successful management of a company and to satisfy the increasing information needs of investors. However, companies adapt the developed theoretical concepts of value-based performance measures to their practical needs, and thus investors are no longer able to compare the performance of companies. In addition, there is a variety of different metrics from which companies can choose. The empirical study aims to reduce existing research gaps and is

divided into three parts the analysis of annual reports of selected European companies the calculation of a standardised value based performance measure and a value relevance study in the form of an association study
