**Plant Identification** William Hawthorne, Anna Lawrence, 2013-06-17 An important prerequisite for successful conservation is a good understanding of what we seek to conserve. Nowhere is this more the case than in the fight to protect plant biodiversity, which is threatened by human activity in many regions worldwide. This book is written in the belief that tools that enable more people to understand biodiversity can not only aid protection efforts but also contribute to rural livelihoods. Among the most important of those tools is the field guide. *Plant Identification* provides potential authors of field guides with practical advice about all aspects of producing user-friendly guides which help to identify plants for the purposes of conservation, sustainable use, participatory monitoring, or greater appreciation of biodiversity. The book draws on both scientific and participatory processes supported by the experience of contributors from across the tropics. It presents a core process for producing a field guide, setting out key steps, options, and techniques available to the authors of a guide, and through illustration helps authors choose methods and media appropriate to their context.

*Trees Of South India* Paul Blanchflower, Marie Demont, 2024-01-22 *Trees of South India* is a result of over fifty years of dedicated work of restoring and researching the forests and native trees of the Coromandel Coast of South India, all the way to the lower reaches of the Western Ghats and on to the hillocks of the Eastern Ghats, a contiguous woodland until a few thousand years ago.
