Rockefeller Vision: Arts of Africa, Oceania, and the Americas Alisa LaGamma, Joanne Pillsbury, Eric Kjellgren, Yaëlle Biro, 2014-08-01 This Bulletin and the exhibition it accompanies The Nelson A Rockefeller Vision In Pursuit of the Best in Arts of Africa Oceania and the Americas reflect on an extraordinary act of philanthropy that was also a catalyst for momentous change in the art world In establishing the Museum of Primitive Art MPA in 1956 the precursor to what is today the Department of the Arts of Africa Oceania and the Americas AAOA at the Metropolitan Museum Nelson Rockefeller was a true pioneer assembling what remains the greatest collection of fine art from these disparate fields Perhaps even more important than this singular achievement however was Rockefeller's long campaign to place his collection at the Metropolitan Museum as a gift to the city and to the world which he finally achieved in 1969 after nearly forty years of effort Rockefeller's gift carried the unequivocal message that artists from Africa Oceania and the Americas are equal in every respect to those of their peers across the globe and throughout history Yet until that time there was famously skepticism in the Western art world on this point as well as resistance from earlier generations of Metropolitan directors in viewing non Western art as part of the institution's mission Relying on his formidable powers of persuasion Rockefeller eventually brokered an agreement to transfer the collections staff and library of the of the MPA to the Metropolitan an astounding triumph that fundamentally changed the character of the museum making the collections truly encyclopedic Film - An International Bibliography Malte Hagener, Michael Töteberg, 2016-12-16 Kommentierte Bibliografie Sie gibt Wissenschaftlern Studierenden und Journalisten zuverl ssig Auskunft ber rund 6000 internationale Ver ffentlichungen zum Thema Film und Medien Die vorgestellten Rubriken reichen von Nachschlagewerk ber Filmgeschichte bis Making Strange Kim Sichel, 2020-03-17 A richly illustrated look at some of the most hin zu Fernsehen Video Multimedia important photobooks of the 20th century France experienced a golden age of photobook production from the late 1920s through the 1950s Avant garde experiments in photography text design and printing within the context of a growing modernist publishing scene contributed to an outpouring of brilliantly designed books Making Strange offers a detailed examination of photobook innovation in France exploring seminal publications by Brassa Henri Cartier Bresson Robert Frank Pierre Jahan William Klein and Germaine Krull Kim Sichel argues that these books both held a mirror to their time and created an unprecedented modernist visual language Sichel provides an engaging analysis through the lens of materiality emphasizing the photobook as an object with which the viewer interacts haptically as well as visually Rich in historical context and beautifully illustrated Making Strange reasserts the role of French photobooks in the history of modern art

Puzzling the Reader Gregg A. Hecimovich, 2008 Puzzling the Reader establishes the place of charms and riddles in nineteenth century British literature by exploring the literary and political work riddles performed at cultural thresholds courtship initiation death rituals moments of greeting and intercultural relations Furthermore Puzzling the Reader investigates the new narrative genre that riddles uncover by transforming traditional narrative techniques Far from disappearing from view the oral tradition of the riddles rises into view alongside the literary narratives of William Blake John Keats and Charles Dickens The folk tradition of the riddle is imported into print media and reaches its zenith in the nineteenth century Through analyses of riddles in weekly literature and satire magazines parlor game books and popular collected riddles such as Queen Victoria s Windsor Enigma this volume examines the literary and political roles riddles play as they migrate into mass print culture Three crucial texts illustrate this argument Blake s Jerusalem Keats s The Eve of St Agnes and Dickens s Our Mutual Friend Each is a work of formal experimentation and each typifies the full range of word play in the period From Blake to Keats to Dickens nineteenth century British literature charts a history of the literary riddle

Landscape Theory in Design Susan Herrington, 2016-12-08 Phenomenology Materiality Cybernetics Palimpsest Cybergs Landscape Urbanism Typology Semiotics Deconstruction the minefield of theoretical ideas that students must navigate today can be utterly confusing and how do these theories translate to the design studio Landscape Theory in Design introduces theoretical ideas to students without the use of jargon or an assumption of extensive knowledge in other fields and in doing so links these ideas to the processes of design In five thematic chapters Susan Herrington explains the theoretic groundings of the theory of philosophy why it matters to design an example of the theory in a work of landscape architecture from the twentieth and twenty first centuries debates surrounding the theory particularly as they elaborate modern and postmodern thought and primary readings that can be read as companions to her text An extensive glossary of theoretical terms also adds a vital contribution to students comprehension of theories relevant to the design of landscapes and gardens Covering the design of over 40 landscape architects and designers in 111 distinct projects from 20 different countries Landscape Theory in Design is essential reading for any student of the landscape **Visions of Belonging** Julia B. Rosenbaum, 2006 In the late nineteenth and early twentieth centuries depictions of New England flooded the American art scene Childe Hassam Willard Metcalf Theodore Robinson and Julian Weir and other well known artists produced images of quaint villages agricultural labor scenic rural churches and the distinctive New England landscape Julia B Rosenbaum asks why and how a range of artists including Impressionist and Modernist painters and sculptors and exhibitors fashioned this particular vision of New England in their work Against the backdrop of industrialization immigration and persistent post Civil War sectionalism many Americans yearned for national unity and identity As Rosenbaum finds New England emerged as symbolic of cultural and spiritual achievement and democratic values that served as an example for the nation By addressing the struggles for national unity the book offers a new interpretation of turn of the century American art Ultimately Visions of

Belonging demonstrates how the local became so important to the national how art was crucial to the formation of national identity and how internal nation building takes place within the realm of culture as well as politics And even as later artists such as Georgia O Keeffe challenged New England's cultural hegemony the appeal of linking regional identity to national ideals continued in distinctive ways Beautifully illustrated with color plates and almost sixty halftones Visions of Belonging explores the interplay between art objects and the shaping of loyalties and identities in a formative phase of American culture It will appeal not only to art historians but also to anyone with an interest in nineteenth century studies the Gilded Age and Progressive Era American studies New England history and culture and American cultural and intellectual history

Art History: The Basics Diana Newall, Grant Pooke, 2021-03-28 Now in its second edition this volume is an accessible introduction to the history of art Using an international range of examples it provides the reader with a toolkit of concepts ideas and methods relevant to understanding art history This new edition is fully updated with colour illustrations increased coverage of non western art and extended discussions of contemporary art theory It introduces key ideas issues and debates exploring questions such as What is art and what is meant by art history What approaches and methodologies are used to interpret and evaluate art How have ideas regarding medium gender identity and difference informed representation What perspectives can psychoanalysis semiotics and social art histories bring to the study of the discipline How are the processes of postcolonialism decolonisation and globalisation changing approaches to art history Complete with helpful subject summaries a glossary suggestions for future reading and guidance on relevant image archives this book is an ideal starting point for anyone studying art history as well as general readers with an interest in the subject **Gustave Caillebotte** Michael Marrinan, 2017-01-21 Gustave Caillebotte 1848 1894 the son of a wealthy businessman is perhaps best known as the painter who organized and funded several of the groundbreaking exhibitions of the Impressionist painters collected their works and ensured the Impressionists presence in the French national museums by bequeathing his own personal collection Trained at the cole des Beaux Arts and sharing artistic sympathies with his renegade friends Caillebotte painted a series of extraordinary pictures inspired by the look and feel of modern Paris that also grappled with his own place in the Parisian art scene Gustave Caillebotte Painting the Paris of Naturalism 1872 1887 is the first book to study the life and artistic development of this painter in depth and in the context of the urban life and upper class Paris that shaped the man and his work Michael Marrinan's ambitious study draws upon new documents and establishes compelling connections between Caillebotte's painting and literature commerce and technology It offers new ways of thinking about Paris and its changing development in the nineteenth century exploring the cultural context of Parisian bachelor life and revealing layers of meaning in upscale privilege ranging from haute cuisine to sport and relaxation Marrinan has written what is sure to be a central text for the study of nineteenth century art and culture Sensing Machines Chris Salter, 2022-04-19 How we are tracked surveilled tantalized and seduced by machines ranging from smart watches and Roombas to immersive art

installations Sensing machines are everywhere in our world As we move through the day electronic sensors and computers adjust our thermostats guide our Roombas count our steps change the orientation of an image when we rotate our phones There are more of these electronic devices in the world than there are people in 2020 thirty to fifty billion of them versus 7 8 billion people with more than a trillion expected in the next decade In Sensing Machines Chris Salter examines how we are tracked surveilled tantalized and seduced by machines ranging from smart watches and mood trackers to massive immersive art installations Salter an artist scholar who has worked with sensors and computers for more than twenty years explains that the quantification of bodies senses and experience did not begin with the surveillance capitalism practiced by Facebook Amazon Netflix and Google but can be traced back to mathematical and statistical techniques of the nineteenth century He describes the emergence of the sensed self investigating how sensor technology has been deployed in music and gaming programmable and immersive art environments driving and even eating with e tongues and e noses that can taste and smell for us Sensing technology turns our experience into data but Salter's story isn't just about what these machines want from us but what we want from them new sensations the thrill of the uncanny and magic that will transport us from our daily grind

A Gift of Angels, 2010-09-20 It rises suddenly out of the Sonoran Desert landscape towering over the tallest tree or cactus a commanding building with a sensuous dome elliptical vaults and sturdy bell towers There is nothing else like it around nor does it seem there should be This incongruity of setting is what strikes first time visitors to Mission San Xavier del Bac This great church is of another place and another time while its beauty is universal and timeless Mission San Xavier del Bac is a two century old Spanish church in southern Arizona located just a few miles from downtown Tucson a metropolis of more than half a million people in the American Southwest A National Historic Landmark since 1963 the mission s graceful baroque art and architecture have drawn visitors from all over the world Now Bernard Fontana the leading expert on San Xavier and award winning photographer Edward McCain team up to bring us a comprehensive view of the mission as we ve never seen it before With 200 stunning full color photographs and incisive text illuminating the religious historical and motivational context of these images A Gift of Angels is a must have for tourists scholars and other visitors to San Xavier From its glorious architecture all the way down to the finest details of its art Mission San Xavier del Bac is indeed a gift of angels What Art Is Michelle Kamhi, Louis Torres, 2016-05-26 What is art The arts establishment has a simple answer anything is art if a reputed artist or expert says it is Though many people are skeptical about the alleged new art forms that have proliferated since the early twentieth century today s critics claim that all such work however incomprehensible is art A groundbreaking alternative to this view is provided by philosopher novelist Ayn Rand 1901 1982 Best known as the author of The Fountainhead and Atlas Shrugged Rand also created an original and illuminating theory of art which confirms the widespread view that much of today s purported art is not really art at all In What Art Is Torres and Kamhi present a lucid introduction to Rand's esthetic theory contrasting her ideas with those of other thinkers They conclude that in its basic

principles her account is compelling and is corroborated by evidence from anthropology neurology cognitive science and psychology The authors apply Rand s theory to a debunking of the work of prominent modernists and postmodernists from Mondrian Jackson Pollock and Samuel Beckett to John Cage Merce Cunningham and other highly regarded postmodernist figures Finally they explore the implications of Rand's ideas for the issues of government and corporate support of the arts art law and art education This is one of the most interesting provocative and well written books on aesthetics that I know While fully accessible to the general reader What Art Is should be of great interest to specialists as well Ayn Rand's largely unknown writings on art especially as interpreted released from dogma and smoothed out by Torres and Kamhi are remarkably refined Moreover her ideas are positively therapeutic after a century of artistic floundering and aesthetic quibbling Anyone interested in aesthetics in the purpose of art or in the troubling issues posed by modernism and post modernism should read this book Randall R Dipert Author of Artifacts Art Works and Agency Torres and Kamhi effectively situate Rand's long neglected esthetic theory in the wider history of ideas They not only illuminate her significant contribution to an understanding of the nature of art they also apply her ideas to a trenchant critique of the twentieth century's advanced art Their exposure of the invalidity of abstract art is itself worth the price of admission Chris Matthew Sciabarra Author of Ayn Rand The Russian Radical Rand's aesthetic theory merits careful study and thoughtful criticism which Torres and Kamhi provide Their scholarship is sound their presentation is clear and their judgment is refreshingly free from the biases that Rand's supporters and detractors alike tend to bring to considerations of her work Stephen Cox University of California San Diego The Right to See with Technology Marc Jonathan Blitz, 2025-09-01 This book asks if we have a constitutional right to see or sense our surroundings with technology Do we have a constitutional right to record our surroundings with cameras embedded in smartphones or drones Or to enhance our vision with extended reality technology bionic eyes or brain computer interfaces Courts in the United States have already provided a possible foundation for answering such questions There is they have said a right to document matters of public concern by creating and sharing recordings with others Such recordings extend our perception They let us watch events that are remote in space and time Yet sharing them is also a kind of communication and thus the creation of speech protected by the First Amendment So too might be other ways of seeing with technology This emerging case law raises interesting questions and challenges such as how enhancement of our perceptions can leave room for others privacy This book explores such questions focusing on American constitutional jurisprudence It also argues that in doing so it is helpful to recognize that our interest in using and enhancing our perceptual power isn t only an interest in doing so as part of First Amendment communication It is also linked closely to other rights to personal integrity and the liberty to use our body s perceptual powers and to the constitution s protection for freedom of thought or what some scholars call cognitive liberty Our exercise of perception and our use of it to learn about our surroundings is a crucial part of exercising our and shaping our mind Color Science and the Visual Arts

Roy S. Berns,2016-07-01 A curator a paintings conservator a photographer and a conservation scientist walk into a bar What happens next In lively and accessible prose color science expert Roy S Berns helps the reader understand complex color technology concepts and offers solutions to problems that occur when art is displayed conserved imaged or reproduced Berns writes for two types of audiences museum professionals seeking explanations for common color related issues and students in conservation museum studies and art history programs The seven chapters in the book fall naturally into two sections fundamentals covering topics such as spectral measurements metamerism and color inconstancy and applications where artwork display painting materials and color reproduction are discussed A unique feature of this book is the use of more than 200 images as its main medium of communication employing color physics color vision and imaging science to produce visualizations throughout the pages An annotated bibliography complements the main text with suggestions for further reading and more in depth study of particular topics Engaging incisive and absolutely critical for any scholar or student interested in color science Color Science and the Visual Arts is sure to become a key reference for the entire field
