Much has changed with Finale since my first edition of Finale for Composers It has taken me several years to write this
second edition With a new version of Finale every year it was difficult to stay current In a nutshell there are a now fewer
tools but the tools that remain are more powerful and perform multiple functions No longer do you have to use two or three
tools to accomplish a common task You are able do the same thing more quickly and more efficiently with the same tool You
may even think that the tools have become smarter Almost all tools now have contextual menus which change based on what
is selected You access these menus by right clicking if you have a two button mouse or by option clicking on the Mac
Commonly used functions such as changing the key or time signature can be easily accomplished with one right click on the
mouse The other major upgrade in Finale is the addition of the Garritan Instruments No longer are you stuck with the wimpy
QuickTime sounds nor do you have to connect to an external synthesizer With each new edition the playback has become
better and better After countless hours of using Finale hundreds of phone calls from musicians asking for help in Finale and
numerous lectures in the classroom teaching Finale at Carnegie Mellon University I finally took the advice of my many
colleagues clients friends and students and set out to write a book on Finale But not just any book a book that focuses on
Finale as a tool for composers In order to get the most out of this book I would suggest that you have at least a basic
knowledge of the workings of Finale While I will cover the more elusive features which many users may not know I
occasionally have omitted some of the more basic skills These skills can be easily learned from the user guide In the
beginning Coda created Finale and it was good Well okay it was good but very few people realized its potential at first The
interface was clunky with a different type of click needed to accomplish various tasks command click for this shift click for
that and option click for who remembers what And the learning curve was steeper than Mount Everest making it all the more
appealing to me I love a challenge and no program no matter how difficult was going to get the better of me So after a few
weeks of fooling around with the thing reading all of the manuals watching the video and hours of trial and error I became a

Finale aficionado From that point on I jumped right in for every upgrade they offered I even switched between Mac and PC a few times just for good measure and used it on everything from my old Mac SE 30 to my current 2.4 GHz Quad Core 2 Duo running Vista Ultimate 64 bit I have used Finale to print everything from simple rhythmic patterns for Eurhythmics exercises to full blown Symphonies and Operas that were performed by professional orchestras as well as everything in between Finale has helped me when I needed to quickly arrange a hymn for my limited voice church choir and has brought me enough clients to start a side business as a music copyist You may have laughed earlier when I said that Finale has changed my life but I believe that Finale has made all of these things possible for me I would be at a very different place in my life if it were not for Finale Now I would like to share my success in using Finale with you in this book so you can see what it can do for you
