**Performance Assessment Measure That Indicates Geometry Sufficiency of State Highways** Andrew Tarko,Aveedibya Dey,Mario Romero,2015-09-01 The Indiana Department of Transportation INDOT selects projects for implementation by taking into account several criteria related to cross section alignment and safety to evaluate various geometry improvements to be carried out as a part of projects The existing practice uses an intuitive point allocation method to score these individual categories The current study proposes a methodology to evaluate these projects considering the safety and mobility impacts of the improvements which lie in the scope of each project This methodology is also used to screen roads based on existing geometry deficiencies with respect to a desirable design standard The road screening process and the project evaluation process form two steps that support the asset management process The road screening process helps in filtering road segments based on geometry deficiencies and identifies the least adequate road segments Projects may be further developed with estimated improvements to be carried out on such segments using detailed information regarding these improvements The asset management components discussed here rely on the evaluation of safety and mobility benefits corresponding to geometry changes To develop an up to date method the safety performance functions used in this method have been calibrated based on the latest crash data available for 2009 2011 Safety performance functions have been developed for rural two lane rural multi lane urban two lane and urban multi lane roads in the state of Indiana The crash modification factors

derived from these safety performance functions and speed adjustments from earlier studies supplemented with data available in Highway Capacity Manual are used to calculate the safety and mobility benefits

**Assessment of Authentic Performance in School Mathematics** Richard A. Lesh, Susan J. Lamon, 2013-04-03 This book is the result of a conference sponsored by the Educational Testing Service and the University of Wisconsin's National Center for Research in Mathematical Sciences Education The purpose of the conference was to facilitate the work of a group of scholars whose interests included the assessment of higher order understandings and processes in foundation level pre high school mathematics Discussions focused on such issues as the purposes of assessment guidelines for producing and scoring real life assessment activities and the meanings of such terms as deeper and higher order understanding cognitive objectives and authentic mathematical activities Assessment was viewed as a critical component of complex dynamic and continually adapting educational systems During the time that the chapters in this book were being written sweeping changes in mathematics education were being initiated in response to powerful recent advances in technology cognitive psychology and mathematics as well as to numerous public demands for educational reform These changes have already resulted in significant reappraisals of what it means to understand mathematics of the nature of mathematics teaching and learning and of the real life situations in which mathematics is useful The challenge was to pursue assessment related initiatives that are systematically valid in the sense that they work to complement and enhance other improvements in the educational system rather than act as an impediment to badly needed curriculum reforms To address these issues most chapters in this book focus on clarifying and articulating the goals of assessment and instruction and they stress the content of assessment above its mode of delivery Computer or portfolio based assessments are interpreted as means to ends not as ends in themselves Assessment is conceived as an ongoing documentation process seamless with instruction whose quality hinges upon its ability to provide complete and appropriate information as needed to inform priorities in instructional decision making This book tackles some of the most complicated issues related to assessment and it offers fresh perspectives from leaders in the field with the hope that the ultimate consumer in the instruction assessment enterprise the individual student will reclaim his or her potential for self directed mathematics learning
