It is a technique of quantifying a person's requirements in terms of money. This study aims at answering these questions; Q1: how can the investor plan for his financial resources? Q2: What is the overview of the investor in short and long term goals? For data collection, the researcher has collected primary data by surveying investor's investment objectives and risk profile. The result found that the comprehensive study about each aspect of this topic has shown that the Financial Planning is a dynamic and flexible concept which involves regular and systematic analysis, proper management, judgment, and actions.*

1. Introduction

Financial planning is not just about investments. There are many ways to use a business plan for the duration of the economic period. You agree to manage your finances to relate them to your goals and what you want to achieve. Making an independent investment in a life insurance product doesn't mean anything if you don't know the amount of coverage needed, if the expired product is adequate, or if life coverage is required.

In all the world, everyone earns money to achieve one or more of their life goals. People use the money for pure purposes, like financing their daily expenses to buy exotic luxuries for a better life. Payment can be recorded, accumulated, and increased to support various financial goals of an individual or group. Such as education, life insurance, marriage, buying a house, retirement, and even the transfer of inheritance to the next generation of power on the market. The money earned is used to finance some of the immediate expenses or a goal in the distant future. When the payment is received to support one of the future objectives, it must invest optimally to offer the maximum return and minimize costs and risks.

The individual's risk profile and time horizon of the goal and the taxation Aspects related to personal finance. Since 2012 financial Planning is increasing day by day.

Financial planning and investment of individuals are an integral part of any individual life, especially in this modern world, where the value of everything expressed in terms of money. An active working span of human life is short as compared to the life span. It means people will be spending approximately the same number of years after retirement what they have spent in their active working life.

Thus, it becomes essential to save and invest while working so that people will continue to earn money and enjoy a comfortable lifestyle.

The Financial planning enables a person to identify their goals and objective, assess the current position, and takes

essential steps to achieve the goals and objectives. It helps us to understand how the financial decisions made an effect on the life for us.

Financial planning, by proper financial planning, a person can have a comfortable and secure economic life.

1.1 Significant of the study

The significant of study is to achieve higher long-term returns; you have to be prepared to accept or reject that the value of your investment may fall significantly in the short-term. This because investments that provide higher returns are usually more volatile than those producing

Low returns. There is a trade-off between risk and return.

1.2 Objective of the study

This project executed to know what is precisely the Financial Planning. How is it carried out? Who carries it out? Why is it carried out? When it will be carried out?? What is the interest of carrying it out?

- To take an overview of the investor's short and long-term goals and objectives.
- To have the current financial strengths and weaknesses and effect of the financial plan for the investor.
- To study the financial objectives anchored to current resources for the investor.
- To give a particular summation of all recommendations.
- To suggest an appropriate financial plan for mutually selected recommendation
- To also give a comprehensive economic overview of the financial plan for the investor, supported by financial statements and the other parties.
- To follow step by step enforcement and monitoring plan.

1.3 Study question

- 1) What is the overview of the investors in short and long term goals?
- 2) What is the financial strengths and weakness the investors having to implement financial planning?

with the regulation of high cost credit specifically payday lending These products have received significant attention in both the media and political arena The inadequacy of regulatory interventions has created ongoing problems with the provision of high cost credit particularly for consumers with lesser bargaining power and who are already financially vulnerable The book tackles two specific gaps in the existing literature The first involves inadequate analysis of the relevant philosophical concepts around high cost credit which can result in an over simplification of what are particularly complex issues The second is a lack of engagement in both the market and lived experience of borrowers resulting in limited understanding of those who use these financial products The Future of High Cost Credit explores the theoretical grounding policy initiatives and interdisciplinary perspectives associated with high cost credit making a novel and insightful contribution to the existing literature The problems with debt extend far beyond the legal sphere and the book will therefore be of interest to many other academic disciplines as well as for those working in public policy and the third sector

Study of the Armed Services Procurement Regulation and Departmental Implementation Thereto, Hearings Before the Subcommittee for Special Investigations of ... , 85-2 Under the Authority of H. Res. 67, July 16, 17, and 18, 1958 United States.

Congress. House. Committee on Armed Services,1958 Insufficient Funds Rebecca M. Blank,Michael S. Barr,2009-03-26

One in four American adults doesn't have a bank account Low income families lack access to many of the basic financial services middle class families take for granted and are particularly susceptible to financial emergencies unemployment loss of a home and uninsured medical problems Insufficient Funds explores how institutional constraints and individual decisions combine to produce this striking disparity and recommends policies to help alleviate the problem Mainstream financial services are both less available and more expensive for low income households High fees minimum balance policies and the relative scarcity of banks in poor neighborhoods are key factors Michael Barr reports the results of an in depth study of financial behavior in 1 000 low and moderate income families in metropolitan Detroit He finds that most poor households have bank accounts but combine use of mainstream services with alternative options such as money orders pawnshops and payday lenders Barr suggests that a tax credit for banks serving primarily disadvantaged customers could facilitate greater equality in the private financial sector Drawing on evidence from behavioral economics Sendhil Mullainathan and Eldar Shafir show that low income individuals exhibit many of the same patterns and weaknesses in financial decision making as middle class individuals and could benefit from many of the same financial aids They argue that savings programs that automatically enroll participants and require them to actively opt out in order to leave the program could drastically increase savings ability Ronald Mann demonstrates that significant changes in the credit market over the past fifteen years have allowed companies to expand credit to a larger share of low income families Mann calls for regulations on credit card companies that would require greater disclosure of actual interest rates and fees Raphael Bostic and Kwan Lee find that while home ownership has risen dramatically over the past twenty years elevated risks for low income families such as

foreclosure may well outweigh the benefits of owning a home The authors ultimately argue that if we want to demand financial responsibility from low income households we have an obligation to assure that these families have access to the banking credit and savings institutions that are readily available to higher income families *Insufficient Funds* highlights where and how access is blocked and shows how government policy and individual decisions could combine to eliminate many of these barriers in the future

Striving to Save Margaret Sherrard Sherraden, Amanda Moore McBride, 2010-05-25

Striving to Save will inform and inspire social policy with its breakthrough approach in understanding how low income families make ends meet while striving to make a better life for themselves and their families Scholarly work in savings debt household finance and behavior economics will benefit from this pioneering study that provides real life context for some of the most important issues of our day Tom Shapiro Brandeis University The central contribution of the book is to use original qualitative research to provide readers with a nuanced understanding of the financial difficulties facing low income households their financial decision making processes and their paths to saving and building assets over time The book provides an essential corrective to the unidimensional view of poor households as unable and unwilling to save Michael Barr University of Michigan In *Striving to Save* Margaret Sherrard Sherraden and Amanda Moore McBride examine savings in eighty four working families with low incomes including fifty nine families who participated in a groundbreaking program of matched savings and financial education In depth interviews with these families along with savings and survey data shed light on saving in low income households The book concludes with recommended public policy approaches for increasing savings in households that are striving to save Margaret Sherrard Sherraden is Professor of Social Work at the University of Missouri St Louis Amanda Moore McBride is Assistant Professor of Social Work at Washington University St Louis

Financial Exclusion and the Poverty Trap Pamela Lenton, Paul Mosley, 2012-02-27 The persistence of poverty hurts us all and attacking poverty is a major policy objective everywhere In Britain the main political parties have an anti poverty mandate and in particular an agreed commitment to eliminate child poverty by 2020 but there is controversy over how this should be done This book addresses one of the main causes of poverty financial exclusion the inability to access finance from the high street banks People on low or irregular incomes typically have to resort to loan sharks doorstep lenders and other informal credit sources a predicament which makes escape from the poverty trap doubly difficult Over the last fifteen years a strategy of breaking down the poverty trap has been implemented known in the UK as community development financial institutions CDFIs typically non profit lending institutions focussed on the financially excluded and seeking to learn from the achievements of microfinance around the world Focussing on the period 2007-09 during which the UK went into a global recession this book investigates how CDFIs work and how well they have helped low income people and businesses to weather that recession Based on a study of eight CDFIs in four UK cities we ask what ideas for overcoming financial exclusion have worked well and which have worked badly What can we learn from the experience of these CDFIs which can

help reduce poverty in this country and globally We assess the impact of CDFIs using a range of indicators including income assets education health and ask what changes in policy by both CDFIs and government agencies for example benefits agencies might be able to increase impact Some of the key lessons are CDFIs need to work with appropriate partners to build up savings capacity in their clients the community environment is vital in determining who escapes from the poverty trap and CDFIs can never function properly unless they learn how to control their overdue debts This book will be vital reading for those concerned with social policy microfinance and anti poverty policies in industrialised countries and around the world
