NOTE: The FICO® is a credit score, which is a numeric representation of an individual's credit worthiness, based on prevailing information available on the credit files at the time of scoring. The majority of credit grantors use some sort of credit scoring model to help predict what kind of credit risk you may be. Other factors, such as your salary and length of employment, may also be considered in credit decisions, which are made for you. As a risk management tool, FICO® does not provide one conclusion, prediction or credit decision for credit grantors.
