Composing Media Composing Embodiment Kristin L Arola, Anne Wysocki, 2012-03-31 What any body is and is able to do cannot be disentangled from the media we use to consume and produce texts from the Introduction Kristin Arola and Anne Wysocki argue that composing in new media is composing the body is embodiment In Composing Media Composing Embodiment they have brought together a powerful set of essays that agree on the need for compositionists and their students to engage with a wide range of new media texts These chapters explore how texts of all varieties mediate and thereby contribute to the human experiences of communication of self the body and composing Sample assignments and activities exemplify how this exploration might proceed in the writing classroom Contributors here articulate ways to understand how writing enables the experience of our bodies as selves and at the same time to see the work of our writing in mediating selves to make them accessible to institutional perceptions and constraints These writers argue that what a body does and can do cannot be disentangled from the media we use nor from the times and cultures and technologies with which we engage To the discipline of composition this is an important discussion because it clarifies the impact s of literacy on citizens freedoms and societies To the classroom it is important because it helps compositionists to support their students as they enact learn and reflect upon their own embodied and embodying writing

Kennedy explores the development and history of the hill stations of the raj. He shows that these cloud enshrouded havens were sites of both refuge and surveillance for British expatriates, sanctuaries from the harsh climate as well as an alien culture, artificial environments where colonial rulers could nurture, educate and reproduce themselves, commanding heights from which orders could be issued with an Olympian authority. Kennedy charts the symbolic and sociopolitical functions of the hill stations over the course of the nineteenth and early twentieth centuries, arguing that these highland communities became much more significant to the British colonial government than mere places for rest and play. Particularly after the revolt of 1857, they became headquarters for colonial political and military authorities. In addition, the hill stations provided employment to countless Indians who worked as porters, merchants, government clerks, domestics and carpenters. The isolation of British authorities at the hill stations reflected the paradoxical character of the British raj itself. Kennedy argues, while attempting to control its subjects, it remained aloof from Indian society. Ironically, as more Indians were drawn to these mountain areas for work and later for vacation, the carefully guarded boundaries between the British and their subjects eroded. Kennedy argues that after the turn of the century, the hill stations were increasingly incorporated into the landscape of Indian social and cultural life.
