Nilsson,William V. Lindberg,2008 In psychology visual perception is the ability to interpret information from visible light reaching the eyes The resulting perception is also known as eyesight sight or vision The various physiological components involved in vision are referred to collectively as the visual system The visual system in humans allows individuals to assimilate information from the environment The act of seeing starts when the lens of the eye focuses an image of its surroundings onto a light sensitive membrane in the back of the eye called the retina The retina is actually part of the brain that is isolated to serve as a transducer for the conversion of patterns of light into neuronal signals The lens of the eye focuses light on the photoreceptive cells of the retina which detect the photons of light and respond by producing neural impulses These signals are processed in a hierarchical fashion by different parts of the brain from the retina to the lateral geniculate nucleus to the primary and secondary visual cortex of the brain The major problem in visual perception is that what people see is not simply a translation of retinal stimuli i.e the image on the retina Thus people interested in perception have long struggled to explain what visual processing does to create what we actually see This book presents leading edge research from around the globe on this field **HWM** ,2004-02 Singapore s leading tech magazine gives its readers the power to decide with its informative articles and in depth reviews **HWM** ,2003-10 Singapore s leading tech magazine gives its readers the power to decide with its informative articles and in depth reviews **HWM** ,2004-02 Singapore s leading tech magazine gives its readers the power to decide with its informative articles and in depth reviews JCPenney [catalog] ,2000 Backpacker ,2007-12 Backpacker brings the outdoors straight to the reader s doorstep inspiring and enabling them to go more places and enjoy nature more often The authority on active adventure Backpacker is the world s first GPS enabled magazine and the only magazine whose editors personally test the hiking trails camping gear and survival tips they publish Backpacker s Editors Choice Awards an industry honor recognizing design feature and product innovation has become the gold standard against which all other outdoor industry awards are measured **HWM** ,2004-02 Singapore s leading tech magazine gives its readers the power to decide with its informative articles and in depth reviews **Electronics World + Wireless World** ,1993 **HWM** ,2004-11 Singapore s leading tech magazine gives its readers the
