Chart Exploring China by Sampan Boat and Painting Scroll Landscapes Grades 4-8 Religion, Culture, and the Public Sphere in China and Japan Albert Welter, Jeffrey Newmark, 2017-02-23 This collection examines the impact of East Asian religion and culture on the public sphere defined as an idealized discursive arena that mediates the official and private spheres. Contending that the actors and agents on the fringes of society were instrumental in shaping the public sphere in traditional and modern East Asia, it considers how these outliers contribute to religious, intellectual, and cultural dialog in the public sphere. Jürgen Habermas conceptualized the public sphere as the discursive arena which grew within Western European bourgeoisie society, arguably overlooking topics such as gender minorities and non-European civilizations as well as the extent to which agency in the public sphere is effective in non-Western societies and how practitioners on the outskirts of mainstream society can participate. This volume responds to and builds upon this dialogue by addressing how religious, intellectual, and cultural agency in the public sphere shapes East Asian cultures, particularly the activities of those found on the peripheries of historic and modern societies.

A Comparison of World Religions Mary M. Saurer,2005-11-22 Human beings have inhabited the world for millions of years and the oldest religious art found in caves and on bones dates as far back as 30 000 years From earliest times and still today people share their ideas and form a group with others who have drawn similar conclusions about the meaning of life and the ultimate reality They might call their group a religion others might call it a cult But the name they give to their concept of God does not mean that they worship a different god only that they hold a different concept of the Source and Power of that which was is and always will be Every religion serves as a way of life an opportunity to practice ones accepted beliefs and a way to socialize with those who hold similar views Religions can be dictated but beliefs cannot They are private and unique to the individual It is ones own experience with that which he or she perceives as God that prompts the acceptance of a belief system quiet endurance when there seems to be no choice or the withdrawal from religion altogether Public and personal wars have been fought in the name of righteous indignation in support of different belief systems that came from efforts to answer the questions of life Many individuals have lived lives of frustration and confusion as a result of the commonly accepted belief system of the culture into which they were born In this study we look briefly at the historical and geographical conditions related to the emergence of specific religious views and the situation of the people whose lives are

influenced by them Our intent is not to determine which religion is right or wrong Using a comparison point chart we examine the basic premises of each belief system and how the holding of a premise impacts the lives of those who live it as if it were true
