Optimizing the U.S. Ground-Based Optical and Infrared Astronomy System National Research Council, Division on Engineering and Physical Sciences, Board on Physics and Astronomy, Committee on a Strategy to Optimize the U.S. Optical and Infrared System in the Era of the Large Synoptic Survey Telescope (LSST), 2015-06-26 New astronomical facilities such as the under construction Large Synoptic Survey Telescope and planned 30 meter class telescopes and new instrumentation on existing optical and infrared OIR telescopes hold the promise of groundbreaking research and discovery How can we extract the best science from these and other astronomical facilities in an era of potentially flat federal budgets for both the facilities and the research grants Optimizing the U S Ground Based Optical and Infrared Astronomy System provides guidance for these new programs that align with the scientific priorities and the conclusions and recommendations of two National Research Council NRC decadal surveys New Worlds New Horizons for Astronomy and Astrophysics and Vision and Voyages for Planetary Sciences in the Decade 2013 2022 as well as other NRC reports This report describes a vision for a U S OIR System that includes a telescope time exchange designed to enhance science return by broadening access to capabilities for a diverse community an ongoing planning process to identify and construct next generation capabilities to realize decadal science priorities and near term critical coordination planning and instrumentation needed to usher in the era of LSST and giant telescopes What We Think About When We Try Not To Think About Global Warming Per Espen

Stoknes, 2015 Today about 98 percent of scientists affirm that climate change is human made and about 2 percent still question it Despite that overwhelming majority though about half the population of rich countries like ours choose to believe the 2 percent And paradoxically this large camp of deniers grows even larger as more and more alarming proof of climate change has cropped up over the last decades This disconnect has both climate scientists and activists scratching their heads growing anxious and responding usually by repeating more facts to win the argument But the more climate facts pile up the greater the resistance to them grows and the harder it becomes to enact measures to reduce greenhouse gas emissions and prepare communities for the inevitable change ahead Is humanity up to the task It is a catch 22 that starts says psychologist and climate expert Per Espen Stoknes from an inadequate understanding of the way most humans think act and live in the world around them With dozens of examples he shows how to retell the story of climate change and apply communication strategies more fit for the task Publisher's description **SOUVENIR of 3rd International Science Congress ISC-2013**

Nigeria Poland Romania Slovakia Ukraine Venezuela and Turkey **The World's Search for Sustainable Development** Mukul Sanwal, 2015-11-05 This text traces the evolution of sustainable development and climate change from the time it emerged in international consultations and agreements The three sections of the book focusing on the framework climate change and sustainable development seek to cover the essentials of the politics of natural resource usage at the global level The book explores the evolution of sustainable development and climate change within the framework of the United Nations and the way the concept has been defined through intergovernmental meetings agreements and consensus within the multilateral system It also explores the best ways of reducing the risk to the planet while enabling societies to pursue sustainable development paths The challenges call for a transformation of social systems to facilitate a broadly acceptable change The book also explores the adoption of low carbon models different from the high carbon socio technical systems and related social practices **Handbook of the Politics of the Arctic** Leif Christian Jensen, Geir Hønneland, 2015-09-25 The Arctic has again become one of the leading issues on the international foreign policy agenda in a manner unseen since the Cold War Drawing on the perspectives of geo politics and international law this Handbook offers fresh insights and perspectives on the most pressing issues grouped under the headings of political ascendancy climate and environmental issues resources and energy and the response and policies of affected countries After the War Ruth H. Howes, Caroline L. Herzenberg, 2015-12-01 This book examines the lives and contributions of American women physicists who were active in the years following World War II during the middle decades of the 20th century It covers the strategies they used to survive and thrive in a time where their gender was against them The percentage of PhD s in physics has risen from 6% in 1983 to 20% in 2012 an all time high for women By understanding the history of women in physics these gains can continue It discusses the major classes of women physicists those who worked on military projects and those who worked in industrial laboratories and at universities largely in the late 1940s and 1950s While it includes minimal discussion of physics and physicists in the 1960s and later this book focuses on the challenges and successes of women physicists in the years immediately following World War II and before the eras of affirmative actions and the use of the personal computer **Accidental Conflict** Stephen Roach, 2022-11-08 The misguided forces driving conflict escalation between America and China and the path to a new relationship A timely fluid readable assessment of a testy and rapidly changing global relationship Kirkus Reviews starred review In the short span of four years America and China have entered a trade war a tech war and a new Cold War This conflict between the world's two most powerful nations wouldn't have happened were it not for an unnecessary clash of false narratives America falsely blames its trade and technology threats on China yet overlooks its shaky saving foundation China falsely blames its growth challenges on America's alleged containment of market based socialism ignoring its failed economic rebalancing In a hard hitting analysis of both nations economies politics and policies Stephen Roach argues that much of the rhetoric on both sides is dangerously misguided amplified by information distortion and more a reflection of each nation's

fears and vulnerabilities than a credible assessment of the risks they face Outlining the disastrous toll of conflict escalation between China and America Roach offers a new road map to restoring a mutually advantageous relationship *Einstein's Entanglement* W. M. Stuckey, Michael Silberstein, Timothy McDevitt, 2024-10-30 Einstein introduced quantum entanglement in 1935 and referred to it as spooky actions at a distance because it seemed to conflict with his theory of special relativity Today some refer to it as the greatest mystery in physics and the 2022 Nobel Prize in Physics was even awarded for experimental confirmation of the spookiness While the mystery is experimentally well established its solution remains elusive because it is commonly believed that quantum entanglement entails that quantum mechanics is incomplete that the world works according to spooky actions at a distance that causes from the future create effects in the present that there is superdeterministic causal control of experimental procedures that people can correctly disagree on the outcome of one and the same experiment and that a single experimental measurement can produce all possible outcomes In this book a rigorous solution to the mystery of quantum entanglement is provided that entails none of those things The key to this seemingly impossible feat is to use Einstein's own language a principle explanation that foregoes the need for any constructive explanation of quantum entanglement such as those listed above Ironically the proposed principle explanation is Einstein's own relativity principle as grounded in quantum information theory So contrary to popular belief quantum mechanics and special relativity are far from inconsistent as both are a consequence of the exact same relativity principle The Routledge Atlas of South Asian Affairs Robert W. Bradnock, 2015-10-14 South Asia has developed from a group of newly independent post Colonial states of at most secondary importance to the wider world to its current position as a region of central strategic importance to both global economic development and world peace and stability This Atlas highlights the global significance of South Asia in relation to economic geopolitical and strategic interests It provides a coherent descriptive and analytical account of the key elements of the complex societies that make up the region and its component countries Illustrated with more than 100 original maps and offering concise entries on key issues the book is structured thematically in these sections Global Context Geographical Environments Historical Evolution of South Asia Key Issues in modern South Asia Economy and Security Designed for use in teaching undergraduate and graduate classes and seminars in geography history economics anthropology international relations political science and the environment as well as regional courses on the South Asia this book is also a comprehensive reference source for libraries and decision makers focusing on South Asia *Carbon Pricing* Larry Kreiser, Mikael Skou Andersen, Birgitte Egelund Olsen, Stefan Speck, Janet E. Milne, 2015-08-28 Carbon Pricing reflects upon and further develops the ongoing and worthwhile global debate into how to design carbon pricing as well as how to utilize the financial proceeds in the best possible way for society The world has recently witnessed **An Assessment of ARPA-E** National Academies of Sciences, Engineering, and Medicine, Division on Engineering and Physical Sciences, Board on Energy and Environmental Systems, Policy and Global Affairs, Board on Science, Technology, and Economic

Policy, Committee on Evaluation of the Advanced Research Projects Agency-Energy (ARPA-E), 2017-08-28 In 2005 the National Research Council report *Rising Above the Gathering Storm* recommended a new way for the federal government to spur technological breakthroughs in the energy sector It recommended the creation of a new agency the Advanced Research Projects Agency Energy or ARPA E as an adaptation of the Defense Advanced Research Projects Agency DARPA model widely considered a successful experiment that has funded out of the box transformative research and engineering that made possible the Internet GPS and stealth aircraft This new agency was envisioned as a means of tackling the nation's energy challenges in a way that could translate basic research into technological breakthroughs while also addressing economic environmental and security issues Congress authorized ARPA E in the 2007 America COMPETES Act and requested an early assessment following 6 years of operation to examine the agency's progress toward achieving its statutory mission and goals This report documents the results of that assessment It includes both an operational assessment of the agency's funding programs and a technical assessment of its awards to the extent possible *The New Oxford Handbook of Economic Geography* Dariusz Wójcik, 2018-01-04 The first fifteen years of the 21st century have thrown into sharp relief the challenges of growth equity stability and sustainability facing the world economy In addition they have exposed the inadequacies of mainstream economics in providing answers to these challenges This volume gathers over 50 leading scholars from around the world to offer a forward looking perspective of economic geography to understanding the various building blocks relationships and trajectories in the world economy The perspective is at the same time grounded in theory and in the experiences of particular places Reviewing state of the art of economic geography setting agendas and with illustrations and empirical evidence from all over the world the book should be an essential reference for students researchers as well as strategists and policy makers Building on the success of the first edition this volume offers a radically revised updated and broader approach to economic geography With the backdrop of the global financial crisis finance is investigated in chapters on financial stability financial innovation global financial networks the global map of savings and investments and financialization Environmental challenges are addressed in chapters on resource economies vulnerability of regions to climate change carbon markets and energy transitions Distribution and consumption feature alongside more established topics on the firm innovation and work The handbook also captures the theoretical and conceptual innovations of the last fifteen years including evolutionary economic geography and the global production networks approach Addressing the dangers of inequality instability and environmental crisis head on the volume concludes with strategies for growth and new ways of envisioning the spatiality of economy for the future *NDA/ NA 14 years English & General Knowledge Topic-wise Solved Papers (2006 - 2019)* Disha Experts, 2019-07-19 **Why Philosophy?** Paolo Diego Bubbio, Jeff Malpas, 2019-06-04 Do we really need philosophy The present collection of jargon free essays aims at answering the question of why philosophy matters Each essay considers the central question Why Philosophy from different angles the unavoidability of doing

Teaching and Digital Technologies Michael Henderson,Geoff Romeo,2016-01-08 Teaching and Digital Technologies Big Issues and Critical Questions helps both pre service and in service teachers to critically question and evaluate the reasons for using digital technology in the classroom Unlike other resources that show how to use specific technologies and quickly become outdated this text empowers the reader to understand why they should or should not use digital technologies when it is appropriate or not and the implications arising from these decisions The text directly engages with policy the Australian Curriculum pedagogy learning and wider issues of equity access generational stereotypes and professional learning The contributors to the book are notable figures from across a broad range of Australian universities giving the text a unique relevance to Australian education while retaining its universal appeal Teaching and Digital Technologies is an essential contemporary resource for early childhood primary and secondary pre service and in service teachers in both local and international education environments **The Natriuretic Hormones** Harvey Craig Gonick,Vardaman M. Buckalew,2015-11-24 The title follows from the original demonstration by Dr Hugh de Wardener in 1961 that a humoral agent is produced after extracellular volume expansion which results in a vigorous diuresis and natriuresis Thus the name of natriuretic hormone was coined In the years that followed several investigators pursued the search for the hormone What

resulted however was the discovery of several hormones with different characteristics all of which were natriuretic Initially it was found that the hormone was similar in action to ouabain or digoxin hence the appellation of ouabain like or digoxin like The hormone was found to be an inhibitor of Na K ATPase which would fit with it being a cardiotonic steroid On the other hand neither ouabain or digoxin migrated on Sephadex gel filtration in the same locus as the hormone Other investigators claim to have identified the hormone initially as a vanadium diascorbate later as bufadienolides such as marinobufagenin yet later as a macrocyclic derivative of inorganic carbon suboxide with a molecular weight of 408 Da Some support for the latter finding was derived from an earlier report that a semi purified Sephadex derived compound was found to have a molecular weight of about 12 000 Da but the active compound when split from its carrier protein had a molecular weight of exactly 408 Da This compound had not been further identified As further development was the demonstration by Bricker and colleagues that a natriuretic substance could be purified from uremic urine This turned out to be a xathurenic acid derivative Meanwhile the focus began to turn to natriuretic peptides derived from heart ANF and BNP These peptides have a shorter duration of action than the cardiotonic steroid like hormone and ANF has proved to be most useful as a measure of heart failure It should also be stressed that marinobufagenin like ANF is elevated in congestive heart failure whereas the steroid like hormone is depressed or absent in this state This review will attempt to describe and contrast the properties of each of the proposed natriuretic hormones including their locus on Sephadex separation potency duration of action chemical structure if known behavior in hypertension renal failure heart failure and brain disease As most recent work has focussed on marinobufagenin this hormone will be brought up to date by investigators in the field

Research Handbook on Climate Governance

Karin Bäckstrand, Eva Lövbrand, 2015-11-27 The 2009 United Nations climate conference in Copenhagen is often represented as a watershed in global climate politics when the diplomatic efforts to negotiate a successor agreement to the Kyoto Protocol failed and was replaced by a fragmented and decentralized climate governance order In the post Copenhagen landscape the top down universal approach to climate governance has gradually given way to a more complex hybrid and dispersed political landscape involving multiple actors arenas and sites The Handbook contains contributions from more than 50 internationally leading scholars and explores the latest trends and theoretical developments of the climate governance scholarship
