With the advent of new digital communication technologies the end of print culture once again appears to be as inevitable to some recent commentators as it did to Marshall McLuhan And just as print culture has so often been linked with the rise of modern industrial society so the alleged demise of print under the onslaught of new media is often also correlated with the demise of modernity This book charts the elements involved in such claims print culture technology history through a method that examines the iconography of materials marks and processes of print and in this sense acknowledges McLuhan s notion of the medium as the bearer of meaning Even in the digital age many diverse forms of print continue to circulate and gain meaning from their material expression and their history However Frances Robertson argues that print culture can only be understood as a constellation of diverse practices and therefore discusses a range of print cultures from 1800 the present post print culture The book will be of interest to undergraduate and postgraduate students within the areas of cultural history art and design history book and print history media studies literary studies and the history of technology      Library of Congress Catalog: Motion Pictures and Filmstrips Library of Congress,1968      *The Art of Found Objects* Robert Craig Bunch,2016-09-23 In this first book of interviews with visual artists from across Texas more than sixty artists reflect on topics from formative influences and inspirations to their common engagement with found materials Beyond the art itself no source is more primary to understanding art and artist than the artist s own words After all who can speak with more authority about the artist s influences motivations methods philosophies and creations Since 2010 Robert Craig Bunch has interviewed sixty four of Texas finest artists who have responded with honesty clarity and naturally great insight into their own work None of these interviews has been previously published even in part Incorporating a striking full color illustration of each artist s work these absorbing self examinations will stand collectively as a reference of lasting value      **Abstractions and Embodiments** Janet Abbate,Stephanie Dick,2022-08-30 Cutting edge historians explore ideas communities and technologies around modern computing to explore how computers mediate social relations Computers have been framed both as a mirror for the human mind and as an irreducible other that humanness is defined against depending on different historical definitions of humanness They can serve both liberation and control because some people s freedom has historically been predicated on controlling others Historians of computing return again and again to these contradictions as they often reveal deeper structures Using twin frameworks of abstraction and embodiment a reformulation of the old mind body dichotomy this anthology examines how social relations are enacted in and through computing The authors examining Abstraction revisit central concepts in computing including algorithm program clone and risk In doing so they demonstrate how the meanings of these terms reflect power relations and social identities The section on Embodiments focuses on sensory aspects of using computers as well as the ways in which gender race and other identities have shaped the opportunities and embodied experiences of computer workers and users Offering a rich and diverse set of studies in new areas the book

explores such disparate themes as disability the influence of the punk movement working mothers as technical innovators and gaming behind the Iron Curtain Abstractions and Embodiments reimagines computing history by questioning canonical interpretations foregrounding new actors and contexts and highlighting neglected aspects of computing as an embodied experience It makes the profound case that both technology and the body are culturally shaped and that there can be no clear distinction between social intellectual and technical aspects of computing Contributors Janet Abbate Marc Aidinoff Troy Kaighin Astarte Ekaterina Babinsteva Andr Brock Maarten Bullynck Jiahui Chan Gerardo Con Diaz Liesbeth De Mol Stephanie Dick Kelcey Gibbons Elyse Graham Michael J Halvorson Mar Hicks Scott Kushner Xiaochang Li Zachary Loeb Lisa Nakamura Tiffany Nichols Laine Nooney Elizabeth Petrick Cierra Robson Hallam Stevens Jaroslav velch      **Paint Shop Pro Photo XI for Photographers** Ken McMahon, 2007 This clear beautifully illustrated introduction to Corels Paint Shop Pro Photo XI provides coverage of all of the tools and features needed to edit and enhance digital photographs It contains real life workflow projects with clear step by step tutorials eye catching visuals and numerous tips and tricks to get users up and running fast      **Motion(less) Pictures** Justin Remes, 2015-02-24 Conducting the first comprehensive study of films that do not move Justin Remes challenges the primacy of motion in cinema and tests the theoretical limits of film aesthetics and representation Reading experimental films such as Andy Warhol's Empire 1964 the Fluxus work Disappearing Music for Face 1965 Michael Snow's So Is This 1982 and Derek Jarman's Blue 1993 he shows how motionless films defiantly showcase the static while collapsing the boundaries between cinema photography painting and literature Analyzing four categories of static film furniture films designed to be viewed partially or distractedly protracted films which use extremely slow motion to impress stasis textual films which foreground the static display of letters and written words and monochrome films which display a field of monochrome color as their image Remes maps the interrelations between movement stillness and duration and their complication of cinema's conventional function and effects Arguing all films unfold in time he suggests duration is more fundamental to cinema than motion initiating fresh inquiries into film's manipulation of temporality from rigidly structured works to those with more ambiguous and open ended frameworks Remes's discussion integrates the writings of Roland Barthes Gilles Deleuze Tom Gunning Rudolf Arnheim Raymond Bellour and Noel Carroll and will appeal to students of film theory experimental cinema intermedia studies and aesthetics
