Introduction to Optical Fiber Communication Systems William B. Jones, 1988 For seniors or first year graduate students this text is a general introduction to optical electronics with a strong emphasis on underlying physical properties and on the design of optical communications systems Jones provides balanced coverage of optical fibers transmitting devices photodetectors and systems and pays special attention to topics of emerging importance including integrated optical devices heterodyne detection and coherent optical systems The book's practical engineering orientation satisfies the latest ABET recommendations for more design instruction in electrical engineering courses **Optical Communications**, 2004

Optical Networks Solutions Manual Rajiv Ramsaswami, 2001-10-31 Photonic Networks Giancarlo Prati, 2011-09-26 The day when fiber will deliver new yet now only foreseeable broadband services to the end user is getting nearer and nearer as we make our way towards the prophetic year 2000 Step by step as we move from first generation lasers and fibers to the by now common erbium doped fiber amplifiers looking forward to such things as wavelength multiplexing and solitons photonic switching and optical storage the community of researchers in optical communications has stepped into the era of photonic networks It is not just a question of terminology Optical communication means technology to the same extent that photonic network means services If it is true that information is just as marketable a product as oil or coke the providing of an extensive global information infrastructure may end up having an even greater impact than the setting up of a world wide railroad network did at the beginning of the industrial era Just like wagons bandwidth will be responsible for carrying and delivering goods to customers The challenge for all of us in this field is for it to function in every section of the overall network transport access and customer area in the best possible way the fastest most economical and most flexible New services provided by a new network that exploits the potential and peculiarities of photonics surely requires a rethinking of solutions new ideas new architectures new design especially where electronics is still dominant as in transport and access networks
