**Van de Graaf generator:**

A Van de Graaff generator will supply a charge to its dome and anything else in contact with the dome. When the object in contact is a person, the person is slowly charged. Similar charges accumulating on the person's hair cause repulsion amongst hair strands causing them to stand up.

energy efficiency of wastewater treatment processes for large centralized wastewater treatment plants WWTPs have been  
increasing Global warming impacts energy sustainability and biosolids generation are among several key drivers towards the  
establishment of energy efficient WWTPs WWTPs have been recognized as major contributors of greenhouse gas emissions  
as these are significant energy consumers in the industrialized world The quantity of biosolids or excess waste activated  
sludge produced by WWTP will increase in the future due to population growth and this pose environmental concerns and  
solid waste disposal issues Due to limited capacity of landfill sites more stringent environmental legislation and air pollution  
from incineration sites there is a need to rethink the conventional way of dealing with wastewater and the sludge production  
that comes with it This book provides an overview of advanced biological physical and chemical treatment with the aim of  
reducing the volume of sewage sludge Provides a comprehensive list of processes aiming at reducing the volume of sewage  
sludge and increasing biogas production from waste activated sludge Includes clear process flowsheet showing how the  
process is modified compared to the conventional waste activated sludge process Provides current technologies applied on

The 4 volume set examines topics in depth with an emphasis on innovative research and technologies for those working in applied areas. Published in partnership with and endorsed by the International Water Association (IWA), demonstrating the authority of the content. Editor in Chief Peter Wilderer, a Stockholm Water Prize recipient, has assembled a world class team of volume editors and contributing authors. **Resources in Education**, 2000-04      *Mining Science*, 1910      *Metrology: from Physics Fundamentals to Quality of Life* P. Tavella, M.J.T. Milton, M. Inguscio, 2018-01-03. Metrology is a constantly evolving field and one which has developed in many ways in the last four decades. This book presents the proceedings of the Enrico Fermi Summer School on the topic of Metrology held in Varenna, Italy, from 26 June to 6 July 2017. This was the 6th Enrico Fermi summer school devoted to metrology, the first having been held in 1976. The 2017 program addressed two major new directions for metrology: the work done in preparation for a possible re-definition of four of the base units of the SI in 2018, and the impact of the application of metrology to issues addressing quality of life, such as global climate change and clinical and food analysis, on science, citizens, and society. The lectures were grouped into three modules: metrology for quality of life, fundamentals of metrology, and physical metrology. Fundamental constants and topics covered included food supply and safety, biomarkers, monitoring climate and air quality, new SI units, measurement uncertainty, fundamental constants, electrical metrology, optical frequency standards, and photometry and light metrology. The book provides an overview of the topics and changes relevant to metrology today and will be of interest to both academics and all those whose work involves any of the various aspects of this field.
