What Should Individuals Do about Climate Change? Marion Hourdequin,Dan C. Shahar,2025-06-10 Climate change is a pressing problem Does each of us have a moral responsibility to help tackle it In this volume Marion Hourdequin and Dan Shahar debate the timely issue of individual behavior and climate change examining what it takes to live morally in a warming world Hourdequin argues there are important reasons for people to translate their concerns about climate change into actions in their personal lives This includes attending to the many ways a single individual can help catalyze systemic change through choices about voting and political participation food and clothing energy use travel and so on Shahar disagrees because he endorses moral specialization and division of labor in a world filled with many problems He argues we should not expect everyone to take action on every serious issue rather it is acceptable and even desirable for people to focus on certain issues and decline to act on others including climate change The two authors take turns responding to each other and then defending their ultimate conclusions This volume is sure to draw attention to the question of individual choice in climate change debates and to help clarify some of the best thinking on this issue Key Features Refocuses attention from big picture debates over the actions of nations and corporations to more tractable questions about individual choices Examines whether there are good reasons to structure our daily lives to reduce our impacts on the climate Explores whether it would be best if individuals became moral specialists by focusing on a small number of problems while declining to act on many others Is highly accessible with clear language and an easy to follow format Provides a glossary of key terms that are bolded in the main text Includes section summaries that give an overview of the main arguments and a comprehensive bibliography for further reading

Sons of the Movement Jean Bobby Noble,2006 Sons of the Movement documents the female to male FtM transition process from an insider s point of view and details the limitations of both surgical procedures and pronouns Bobby Noble challenges both the expectations of masculinity and white masculinity As a result this text is equally invested in creating both gender trouble and race trouble calling for a new provocative analysis of the field of gender studies This is an accessible treatise arguing that the relation among FtM transsexual masculinity female masculinity and feminism is an underexplored site of politics in the field While FtM transsexuals have been viewed with some suspicion within feminist and lesbian circles Sons of the Movement argues

that since FtMs have the potential to offer a unique vantage point on both feminism and masculinity FtM masculinity instead should be rearticulated as an alterantive and pro feminist embodiment of non phallic masculinity
