Part A: Completion

Fill in the blanks with the correct word or phrase. Write your answers in the spaces provided.

The nervous system is made up of the brain, spinal cord, and nerves. The brain is the control center of the body. It receives information from the senses and sends out instructions to the rest of the body. The spinal cord is a long, thin, tube-like structure that runs down the back. It carries messages between the brain and the rest of the body. Nerves are bundles of fibers that carry messages between the brain, spinal cord, and the rest of the body.

The nervous system is divided into two main parts: the central nervous system (CNS) and the peripheral nervous system (PNS). The CNS is made up of the brain and spinal cord. The PNS is made up of all the other nerves in the body. The PNS is further divided into the somatic nervous system, which controls voluntary movements, and the autonomic nervous system, which controls involuntary functions like heart rate and digestion.
