**Mad World: The Seduction of Insanity** Mark Romel,2018-02-07 Blaise Pascal said Men are so necessarily mad that not to be mad would amount to another form of madness Crazy people get locked up Their madness is easy to detect They have drastically disordered thoughts It s as if their dream content is leaking into their daytime reality They don t make sense They can t keep it together They re incoherent They can t interact meaningfully with others They have lost touch with reality But what if there s a second kind of madness a much more subtle and dangerous kind that goes unnoticed In this version of madness people have ordered thoughts indeed often highly ordered They make sense They keep it together They can meaningfully interact with others often brilliantly and they seem completely in touch with reality What s not to like Not one of them is locked up Far from it In fact some of them are running our world

**Pathological Altruism** Barbara Oakley,Ariel Knafo,Guruprasad Madhavan,David Sloan Wilson,2011-09-19 The benefits of altruism and empathy are obvious These qualities are so highly regarded and embedded in both secular and religious societies that it seems almost heretical to suggest they can cause harm Like most good things however altruism can be distorted or taken to an unhealthy extreme Pathological Altruism presents a number of new thought provoking theses that explore a range of hurtful effects of altruism and empathy Pathologies of empathy for example may trigger depression as well as the burnout seen in healthcare professionals The selflessness of patients with eating abnormalities forms an important aspect of those disorders Hyperempathy an excess of concern for what others think and how they feel helps explain popular but poorly defined concepts such as codependency In fact pathological altruism in the form of an unhealthy focus on others to the detriment of one s own needs may underpin some personality disorders Pathologies of altruism and empathy not only underlie health issues but also a disparate slew of humankind s most troubled features including genocide suicide bombing self righteous political partisanship and ineffective philanthropic and social programs that ultimately worsen the situations they are meant to aid Pathological Altruism is a groundbreaking new book the first to explore the negative aspects of altruism and empathy seemingly uniformly positive traits The contributing authors provide a scientific social and cultural foundation for the subject of pathological altruism creating a new field of inquiry Each author s approach points to one disturbing truth what we value so much the altruistic good side of human nature can also have a dark side that we ignore at our peril

**The Management of Living Beings or Emo-management** Delphine Van Hoorebeke, 2018-08-01. This book is based on the author's research carried out over the last ten years in terms of emotional management. It establishes the intervention of emotions at all levels of management, the Littr definition of management being the art of the possible, the art of guiding, managing, handling, motivating, even resolving and arranging. Emotion is a subject studied particularly in management in English speaking countries and has become a topic of growing interest in organizational behavior. Emotion is in this book considered based on its etymological origin: *ex movere* put into action by the external factors. The objective is to demonstrate a new vision of responsible management and to confront the current challenges in motion. In this way, the latter tends to take into consideration the living, i.e. the psychobiological, neurological and sociological aspects of people in business.

Emotion and the Seduction of the Senses, Baroque to Neo-Baroque Lisa Beaven, Angela Ndalianis, 2018-07-31. Emotion and the Seduction of the Senses: Baroque to Neo-Baroque examines the relationship between the cultural productions of the baroque in the seventeenth century and the neo baroque in our contemporary world. The volume illuminates how, rather than providing rationally ordered visual realms, both the baroque and the neo baroque construct complex performative spaces whose spectacle seeks to embrace, immerse and seduce the senses and solicit the emotions of the beholder.

Michael Kotick, a longtime senior marketing executive, helps you navigate the treacherous terrain in this essential guide for anyone concerned about building goodwill, boosting a brand, and making sales. Instead of overcomplicating modern marketing strategy with jargon, he explains how to use an intuitive, attraction-based framework to understand what successful marketers are doing, how they're doing it, and where they're headed next. He explores topics like pickup lines and why nice guys finish last, primarily using the psychology of attraction to uncover what people really want from brands today.
