international levels among developed and developing countries alike Postgraduate Research Engagement in Low Resource Settings sets out to garner strategies for fostering efficiency of research conduct among the students and faculty so as to enhance high quality output for the envisaged personal societal national and international socioeconomic transformation Covering a range of topics such as intellectual property mental health and quality assurance this book is ideal for research supervisors higher education faculty librarians educators administrators researchers academicians and students

Halvorsen: Sharing Knowledge, Transforming Societi ,2023-01-10 In June 2016 the Norwegian Programme for Capacity Development in Higher Education and Research for Development Norhed hosted a conference on the theme of knowledge for development in an attempt to shift the focus of the programme towards its academic content This book follows up on that event The conference highlighted the usefulness of presenting the value of Norhed s different projects to the world showing how they improve knowledge and expand access to it through co operation A wish for more meta knowledge was also expressed and this gives rise to the following questions Is this way of co operating contributing to the growth of independent post colonial knowledge production in the South based on analyses of local data and experiences in ways that are relevant to our shared future Does the growth of academic independence as well as greater equality and the ability to develop theories different to those imposed by the better off parts of the world give rise to deeper

understandings and better explanations Does it at least spread the ability to translate existing methodologies in ways that add meaning to observations of local context and data and thus enhance the relevance and influence of the academic profession locally and internationally This book in its varied contributions does not provide definite answers to these questions but it does show that Norhed is a step in the right direction Norhed is an attempt to fund collaboration within and between higher education institutions We know that both the uniqueness of this programme and ideas of how to better utilise the learning and experience emerging from it call for more elaboration and broader dissemination before we can offer further guidance on how to do things better This book is a first attempt

Democracy and the Discourse on Relevance Within the Academic Profession at Makerere University Kronstad Felde, Tor Halvorsen, 2021-09-20 Democracy and the Discourse on Relevance Within the Academic Profession at Makerere University is set against the backdrop of the spread of neoliberal ideas and reforms since the 1980s While accepting that these ideas are rooted in a longer history the authors reveal how neoliberalism has transformed the university sector and the academic profession In particular they focus on how understandings of what knowledge is relevant and how this is decided have changed Taken as a whole reforms have sought to reorient universities and academics towards economic development in various ways Shifts in how institutions and academics achieve recognition and status combined with the flow of public funds away from the universities and the increasing privatisation of educational services are steadily downgrading the value of public higher education As research

universities adopt user and market oriented operating models and prioritise the demands of the corporate sector in their research agendas the sale of intellectual property is increasingly becoming a primary criterion for determining the relevance of academic knowledge All these changes have largely succeeded in transforming the discourse around the role of the academic profession in society In this context Makerere University in Uganda has been lauded as having successfully achieved transformation However far from highlighting the allegedly positive outcomes of this reform this book provides worrying insights into the dissolution of Ugandas academic culture Drawing on interviews with over ninety academics at Makerere University from deans to doctoral students the authors provide first hand accounts of the pressures and problems the reforms have created Disempowered overworked and under resourced many academics are forced to take on consultancy work to make ends meet The evidence presented here stands in stark contrast to the successes claimed by the university However as the authors also show local resistance to the neoliberal model is rising as academics begin to collaborate to regain control over what knowledge is considered relevant and wrestle with deepening democracy The authors careful expos of how neoliberalism devalues academic knowledge and the urgency of countering this trend makes Democracy and the Discourse on Relevance Within the Academic Profession at Makerere University highly relevant for anyone working in higher education or involved in shaping policy for this sector

Osakwe, 2017-12-14 Trade multilateralism in the twenty first century faces a serious test as weakness in the global economy and fast paced technological changes create a challenging environment for world trade This book examines how an updated and robust rules based multilateral framework anchored in the WTO remains indispensable to maximizing the benefits of global economic integration and to reviving world trade By examining recent accessions to the WTO it reveals how the growing membership of the WTO has helped to support domestic reforms and to strengthen the rules based framework of the WTO It argues that the new realities of the twenty first century require an upgrade to the architecture of the multilateral trading system By erecting its upper floors on the foundation of existing trade rules the WTO can continue to adapt to a fast changing environment and to maximize the benefits brought about by its ever expanding membership **The Impact of**
