based on Rogers core conditions provides a strong theoretical basis for students to understand reflective practice The use of questions and examples throughout are engaging and will be useful for students and tutors alike I think this book will be excellent for all healthcare workers students and qualified alike Whilst it is aimed at nurses the principles apply across healthcare I think it is a real gem and certainly the best book I have read about reflective practice Dr Rosie Stenhouse Nursing Studies University of Edinburgh UK      Developing Portfolios for Learning and Assessment Val Klenowski,2002 Drawing on the author s own experience of using and researching student portfolios this book analyses the implications for the development of the portfolio for assessment      The End of Composition Studies David W Smit,2007-03-29 Setting forth an innovative new model for what it means to be a writing teacher in the era of writing across the curriculum The End of Composition Studies urges a reconceptualization of graduate work in rhetoric and composition systematically critiques the limitations of current pedagogical practices at the postsecondary level and proposes a reorganization of all academic units David W Smit calls into question two major assumptions of the field that writing is a universal ability and that college level writing is foundational to advanced learning Instead Smit holds writing involves a wide range of knowledge and skill that cannot be learned solely in writing classes but must be acquired by immersion in various discourse communities in and out of academic settings The End of Composition Studies provides a compelling rhetoric and rationale for eliminating the field and reenvisioning the profession as truly interdisciplinary a change that is necessary in order to fulfill the needs and demands of students instructors administrators and our democratic society      **Visual Writing** Alex Baratta,2010-07-12 Considering the fact that the academic essay continues to be widely used as an assessment tool within education there is a need for students to develop their skills in this area However it is often the case that students perceive instruction in academic writing if it is offered at all as boring This book addresses these two issues First the book can be used by students themselves even in the absence of academic writing classes as a self help guide from which they can develop their knowledge of academic writing and subsequent proficiency Second by discussing the components of academic writing in terms such as film which are familiar to today s generation students are enabled to relate to the material better and see what might have been perceived as dull from a brand new perspective Visual learners in particular will enjoy the analogous link between films and essays and students today are arguably more visually literate than previous generations being exposed to visuals on a daily basis through text message iconography computer games and the Internet The visual instruction provided in turn helps to facilitate mental visuals in students minds from which their knowledge of essay writing can start to develop      *Literacy Projects for Student-Centered Classrooms* Karrell Hickman,2007-04-18 Meets NCTE and IRA standards offers guidelines for using the student centered approach to literacy instruction and presents four long term research projects that encourage teamwork and creativity      **Reflective Practice in Nursing** Chris Bulman,Sue Schutz,2013-05-06 Reflective Practice is increasingly recognised as an important topic that has the potential to help nurses to develop and learn from their practice This practical
