Some jobs require a light touch than others, reducing the force that staples or nails are fired at reduces the chance of damage thinner, more dictated surfaces.

NOTE : After marking any adjustments, always test the settings on a piece of scrap material. If you are shooting soft material, the adjustment of the driving force may not have a noticeable effect on the shooting.

- To adjust the force of the nail gun/stapler, turn the dial clockwise to increase the drive force. Turn the dial counterclockwise to decrease the drive force. The drive force indicator also shows increase or decrease.

NOTE : Always keep your fingers away from the discharge area of the tool when driving a staple and when using the accessory to install screen or wire. Failure to keep fingers out of the way can result in serious personal injury
