Emotions and Affect in Language Learning Larisa Nikitina, 2025-04-17 This book explores emotions and affect in language learning during total lockdown during the early phase of the COVID 19 pandemic when all teaching and learning activities had to transition online Having classes online and learning in lockdown was an unknown disconcerting and emotionally saturated experience for both the teachers and their students majoring in foreign languages To explore this the author conducted a study at a Malaysian university using perezhivanie a concept introduced by Lev Vygotsky 1896 1934 as a theoretical foundation for pedagogically oriented research on affect and emotions It refers to an

intense emotional lived through experience that often leads to a qualitative change within an individual To capture the students experiences of learning in total lockdown she also employs photovoice methodology as an analytical approach In her book Nikitina demonstrates using the photovoice method to capture the emotional ebbs and flows inherent in perezhivania The theoretical framework of perezhivanie and novel photovoice methodology adopted in this book can be employed in future explorations of emotional labours of students and their teachers in a wide range of educational settings This book s theoretical anchoring robust methodology and rigorous analysis of visual and linguistic data findings presented in this book will contribute to a better understanding of learning and teaching during challenging circumstances for students and academics of applied linguistics psychology of language learning or second language acquisition Photographic Elicitation and Narration in Teachers Education and Development Antonio Bautista García-Vera, 2023-01-23 This open access book discusses the functionality of the use of the language of photography in teachers initial and ongoing training It analyzes the nature of photography as a representation system facilitating inquiry and reflection on its practice for teachers and evocating on theories and beliefs that may guide their work in classrooms Photography is used to represent symbolically and affectively possible contradictions in teaching activities or the inconsistencies between planned teaching tasks and the educational purposes pursued Resolving these conflicts is one of the ways to promote professional development This book also describes photo elicitation and photographic storytelling as work procedures By analyzing the contributions of these techniques the development of teachers is improved Yamada: Knowledge, Education and Social Structur , 2023-06-27 In searching for the potential that lies in African societies the chapters of this volume consider relationships between knowledge education and social structure from multiple angles from a macro continental scale to national education systems schools and local communities The themes that cut across the chapters include education as a mode of transmitting values the contrasting effects of school credentials and knowledge for use politics and interactions among people surrounding a school and knowledge acquisition as a subjective process The rich empirical analyses suggest that the subjective commitment of and mutuality among people will make the acquired knowledge a powerful tool for conviviality to realize a stable life even given the turmoil created by rapid institutional and environmental changes that confront African societies Visual Pedagogies , 2022-12-12 This international collection presents theoretical empirical and practice led considerations of what can be envisioned as visual pedagogies offering classic creative and contemporary re workings of these paradigms In complementary yet overlapping parts this book explores understandings of visual pedagogies as learning with through and or about images visual and digital environments embodied performances and immersive experiences As visual practices in academia gain momentum the need to navigate visuality in ways that enhance sensibility and awareness of how what we observe analyze criticize and reflect on in any given moment continues to grow We understand visual pedagogies as nomadic in the sense that the how and the what of image centered learning is not separable What does this mean First it means

recognizing pedagogical practices as always already implicated In other words the form itself carries its own message Visual pedagogies respond to and are actualized within the cultural contexts in which they are working At the same time they carry the possibilities of being taken up in diverse ways beyond one particular context As living morphing practices visual pedagogies expand on contextual affordances while at the same time providing the means of exceeding them Thus there are folk literacies in perpetual movement that are producing visual pedagogies where points of traction for theorizing and research can form These then can be mobilized as springboards for analysis and examination of how visual pedagogies become apparent This book takes up multiple diverse contexts through an international selection of authors The parts work to address conceptual empirical and practical considerations through different emphases yet in conversation with each other

Shame, Modesty, and Honor in Islam Ayang Utriza Yakin, Adis Duderija, An Van Raemdonck, 2023-12-28 With a particular emphasis on definitions continuities and change this edited volume examines the historical role and function of haya or feelings of shame modesty and honor in Islamic theology and law and explores contemporary Muslims engagements with the concept The book explores various conceptions of haya and the practices associated with the concept in both Muslim majority and minority contexts The empirically rich contributions reveal how haya is socially constructed in varying social and cultural environments across the globe From medieval Islam to the modern day this book demonstrates the importance of haya and its temporal and spatial transformations

Developments Erica Burman, 2020-07-28 How does developmental psychology connect with what used to be called the developing world What do cultural representations indicate about the contemporary politics of childhood How is concern about child sexual exploitation linked to wider securitization anxieties In other words what is the political economy of childhood and how is this affectively organized This new edition of *Developments Child Image Nation* fully updated is a key conceptual intervention and resource reflecting further on the contexts and frameworks that tie children to national and international agendas A companion volume to Burman's *Deconstructing Developmental Psychology* third edition 2017 this volume helps explain why questions around children and childhood including their safety welfare their interests abilities sexualities and their violence have so preoccupied the late twentieth and twenty first centuries showing how the frames for these concerns have extended beyond their Euro US contexts of origination In this completely revised edition Burman explores changing debates and contexts offering resources for interpreting continuities and shifts in the complex terrain connecting children and development Through reflection on an increasingly globalised marketised world that prolongs previous colonial and gendered dynamics in new and even more insidious ways *Developments* analyses the conceptual paradigms shaping how we think about and work with children and recommends strategies for changing them Drawing in particular on feminist and post development literatures as well as original and detailed engagement with social theory it illustrates how and why reconceptualising notions of individual and human development including those informing models of children's rights and interests is needed to foster more just and

equitable forms of professional practice with children and their families Burman offers an important contribution to a set of urgent debates engaging theory and method policy and practice across all the disciplines that work with or lay claim to children's interests A persuasive set of arguments about childhood culture and professional practice Developments is an invaluable resource to teachers and students in psychology childhood studies and education as well as researchers in gender studies *Promoting Qualitative Research Methods for Critical Reflection and Change* Wang, Viktor, 2021-04-16 The philosophical foundation of emancipatory knowledge lies in critical theory In this paradigm instrumental and communicative knowledge are not rejected but are limited If we do not question current scientific and social theories and accepted truths we may never realize how we are constrained by their inevitable distortions and errors Without the possibility of critical questioning of ourselves and our beliefs such constraining knowledge can be accepted by entire cultures The research paradigm that is relevant for constructing this kind of knowledge is the critical paradigm Data are always qualitative and have specific methods of research Quantitative research unquestionably has a place and is fundamental to scientific advances but qualitative research delves into what it is to be human Through qualitative research we gain insight into communicative knowledge its rich nature and the mechanisms by which communicative knowledge is formed and interpreted Qualitative research enables the necessary exploration and critical analysis of social systems and uncovers and facilitates critical reflections on the inevitable assumptions which shape social behavior and interaction thereby stimulating and empowering change *Promoting Qualitative Research Methods for Critical Reflection and Change* provides readers with a comprehensive array of qualitative research methods which can be implemented in a variety of contexts for a variety of purposes The chapters explore the impact uses and methodologies for qualitative research across various fields of research This book is ideal for practitioners researchers academicians and students interested in the use of qualitative research methods

La fotografía en la formación del profesorado Antonio Bautista García-Vera, 2019-07-15 La funcionalidad que aporta el lenguaje de la fotografía en situaciones de formación del profesorado es uno de los rasgos que confieren a este libro su carácter extraordinario. La fotografía se emplea para facilitar a los docentes la indagación y reflexión sobre su práctica y para evocar las teorías y creencias que orientan sus trabajos en aulas y escuelas. Asimismo se usa para representar simbólicamente y afectivamente las incoherencias entre las tareas de enseñanza planteadas y los fines educativos perseguidos. La resolución de esos conflictos es una de las formas de promover el desarrollo profesional docente. Otro indicador que muestra el interés de este libro es el fin formativo de procedimientos de trabajo como la foto-elicitación y la narración fotográfica porque desde hace tres décadas en el campo de las ciencias sociales se han utilizado principalmente para recoger datos en metodologías de investigación cualitativa. La fotografía nutre de sensibilidad artística la formación de maestros y maestras para afrontar la incertidumbre y dificultades especiales emergentes y por lo tanto para hacer mejor su trabajo cada día.

Exploring Diary Methods in Higher Education Research Xueming Cao, Emily F. Henderson, 2021-03-28 This methodologically oriented collection brings together higher education diary research studies from international contexts to showcase the versatility of the method and its adaptability to higher education research. While keeping a diary is a familiar personal practice, diary method is a neglected form of research in higher education studies as well as the social sciences more broadly. This book showcases the range of options within diary method as well as the benefits and challenges that this fascinating but mysterious method may bring to students and academic researchers alike. The benefits and the risks and challenges of diary research are discussed across the empirical studies included in the volume. Using a variety of solicited diary techniques including audio-written and photo diaries and focusing on different aspects of higher education including undergraduate and postgraduate students and academics, these studies include salient topics such as LGBTQ identities, faith, caring responsibilities, international students, socioeconomically disadvantaged students, and employability. This important contribution to methodological innovation in the higher education research field promotes diary method as a viable option in social sciences and beyond. Whether new to the method or a seasoned diary researcher, this book is ideal reading for anyone who would like to learn the fundamentals of diary research and explore its feasibility in empirical contexts.

Critical Visual Methods to Advance Racial Justice in Educational Research Angela M. Wiseman, Marva Cappello, Jennifer D. Turner, 2025-09-23 Critical Visual Methods to Advance Racial Justice in Educational Research advances critical research methodologies for analyzing visual and multimodal data with particular attention to racial justice and minoritized communities. It presents innovative theoretical frameworks and analytical approaches for examining how visual representations impact, perpetuate, and potentially transform systemic inequities in educational research. Organized into three sections, this book explores analytic frameworks, methods for critical visual analysis, and visual praxis in schools and communities. Contributors weave together transformative theories while demonstrating innovative approaches to visual

analysis including photovoice collage slow looking and radical curation that center participant perspectives The book showcases rigorous approaches to analyzing visual data while maintaining methodological depth Key findings illustrate how visual methodologies can reveal hidden power structures document lived experiences and generate new knowledge about how minoritized communities engage with and create visual meaning The work advances understanding of perspectives across the lifespan from children to youth to adults through visual and multimodal research methods This book is designed for emerging and established educational scholars interested in critical visual and multimodal methodologies and serves as an ideal text for undergraduate and graduate research courses It offers valuable insights for researchers studying representation identity and equity while advancing innovative approaches for analyzing visual and multimodal data in educational research
