Explain the difference between a chemical change and a physical change. Use the examples provided to support your explanation.

A chemical change is a process in which a substance is transformed into one or more new substances. This transformation is usually indicated by a change in color, odor, or state of matter. A physical change is a process in which a substance is transformed into one or more new substances, but the chemical composition of the substance remains the same. Examples of physical changes include melting, boiling, and dissolving.

For the chemical change, the chemical composition of the substance changes. For example, when iron burns, it reacts with oxygen to form iron oxide, which is a new substance with different properties than the original iron.

*Behavior Analysis and Learning* W. David Pierce,Carl D. Cheney,2013-04-15 Behavior Analysis and Learning Fourth Edition is an essential textbook covering the basic principles in the field of behavior analysis and learned behaviors as pioneered by B F Skinner The textbook provides an advanced introduction to operant conditioning from a very consistent Skinnerian perspective It covers a

range of principles from basic respondent conditioning through applied behavior analysis into cultural design. Elaborating on Darwinian components and biological connections with behavior, the book treats the topic from a consistent worldview of selectionism. The functional relations between the organism and the environment are described and their application in accounting for old behavior and generating new behavior is illustrated. Expanding on concepts of past editions, the fourth edition provides updated coverage of recent literature and the latest findings. There is increased inclusion of biological and neuroscience material as well as more data correlating behavior with neurological and genetic factors. The material presented in this book provides the reader with the best available foundation in behavior science and is a valuable resource for advanced undergraduate and graduate students in psychology or other behavior-based disciplines. In addition, a website of supplemental resources for instructors and students makes this new edition even more accessible and student friendly.
